Subject: Intimation under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Registration of the Company's Wholly owned Subsidiary Company K P International Limited as an E-Waste Recycler on CPCB's EPR Portal

Dear Sir/Madam,

We are pleased to inform you that **Kemistar Corporation Limited has been registered as an E-Waste Recycler under the E-Waste (Management) Rules, 2022, and the Company's name is now appearing on the Central Pollution Control Board (CPCB) E-Waste Extended Producer Responsibility (EPR) Portal under the category of EPR-enabled recyclers.**

This development marks a significant milestone in the Company's strategic expansion into the organised e-waste recycling sector and strengthens its position in the rapidly growing recycling and resource recovery industry.

Strategic Business Opportunities

The registration provides the Company with an opportunity to participate in India's organized e-waste recycling ecosystem and develop business relationships with leading domestic and multinational companies, particularly large-scale electronics manufacturers, electrical and electronic equipment producers, importers, institutional consumers and other organizations having EPR obligations.

Under the E-Waste (Management) Rules, 2022, producers are required to fulfil their applicable EPR obligations through registered recyclers. This creates a structured business opportunity for registered recyclers to undertake recycling activities and generate EPR certificates, subject to applicable regulatory requirements and verification procedures.

Expected Business Benefits and Growth Opportunities

The Company expects this development to open up several business opportunities, including:

1. **Corporate Business Opportunities:** Engagement with reputed national and multinational electronics and electrical equipment manufacturers for e-waste recycling requirements.
2. **EPR Certificate Generation:** Opportunity to generate and transfer EPR certificates to registered producers against eligible recycling activities, in accordance with CPCB guidelines.
3. **Revenue Growth:** Potential to generate additional revenue through e-waste recycling operations, material recovery and associated EPR-related business activities.

4. **Business Diversification:** Expansion of the Company's existing business portfolio into the organised recycling and circular economy sector.
5. **Long-Term Corporate Associations:** Development of strategic business relationships with large corporate houses, electronics manufacturers and institutional e-waste generators.

Management Outlook

The management considers this registration an important step in the Company's growth journey. With increasing regulatory focus on responsible e-waste management, recycling and recovery of valuable materials, the Company sees significant long-term business potential in this sector.

The Company intends to leverage its CPCB registration to establish business associations with reputed corporate organisations and expand its recycling activities, thereby creating additional revenue opportunities and long-term value for its shareholders.

The Company will continue to explore suitable business opportunities in the e-waste recycling sector and will make further disclosures regarding material developments, as and when applicable.

This is for your information and records.

Thanking you,

Yours faithfully,

For, Kemistar Corporation Limited
