Trishakti Industries Deploys CWIP Fleet into Operations, Expected to Drive Higher Revenue; Completes ₹370 Crore Capex Programme

Kolkata, India - November 23, 2026: Trishakti Industries Limited (BSE: 531279), an infrastructure equipment rental company, has successfully deployed machinery worth approximately ₹92 crore, covering 60 units of heavy machinery and access equipment.

With this deployment, the Company has deployed approximately ₹370 crore against its ₹400 crore FY25 - FY27 capital expenditure programme, inclusive of GST. This marks an important milestone in converting capital investments into operational assets for its equipment rental business.

The ₹92 crore represents the value of machinery deployed from the original XCMG purchase order and not the entire order value.

Deployment Highlights:

- **₹92 crore**: value of machinery deployed from the XCMG purchase order, moved from CWIP into operational use
- **60 units**: scope of the original purchase order, covering heavy machinery and access equipment
- **₹370 crore**: cumulative capex deployed under the ₹400 crore FY25–FY27 programme, inclusive of GST

Expanding Operational Capacity and Revenue Potential:

The commissioning and deployment of CWIP machinery marks another step in strengthening the Company's operational capacity. The newly operational assets have been deployed across customer projects, increasing the Company's available rental fleet and enhancing its ability to cater to growing equipment requirements across key sectors.

The deployment is expected to provide an incremental impetus to revenue, with its impact likely to become visible from Q3 FY27 onwards.

Advancing Mission 2030 – Lifting India. Building Tomorrow:

Trishakti's Mission 2030, announced on October 22, 2026, reflects management's long-term ambition to build a cumulative gross block of ₹1,000 crore by FY30.

The deployment of the ₹92 crore XCMG machinery fleet represents another step in expanding the Company's equipment rental platform. As it progresses towards this ambition, the Company intends to maintain a disciplined approach to capital allocation, with a focus on expected utilisation, funding requirements and risk-adjusted returns.

India's Infrastructure Growth Opportunity:

India's infrastructure development continues to create demand for specialised heavy equipment across construction, industrial, renewable energy and other project-led sectors.

The Union Budget 2026 - 27 provides for Union Government capital expenditure of ₹12.22 lakh crore, compared with ₹11.2 lakh crore in the FY2025 - 26 Budget Estimate, representing an increase of approximately 9% on a Budget Estimate-to-Budget Estimate basis.

This infrastructure investment environment provides an opportunity for specialised equipment rental companies. Trishakti intends to build on its expanded fleet and capabilities to address evolving customer and project requirements.

Management Perspective:

Mr. Dhruv Jhanwar, Chief Executive Officer of Trishakti Industries Limited, stated:

"Deploying machinery worth approximately ₹92 crore is an important milestone in our fleet expansion journey. Our focus has been on ensuring that capital investments translate into productive assets that can serve customer requirements.

With this deployment, we expect to see a positive impact on our revenue from Q3 FY27 onwards. With approximately ₹370 crore of our ₹400 crore FY25 - FY27 capex programme now deployed, we have made meaningful progress in strengthening our operating asset base.

As we move towards Mission 2030, we will continue to focus on disciplined capital deployment, asset utilisation and building a scalable equipment rental platform."

About Trishakti Industries Limited:

Trishakti Industries Limited is a BSE-listed infrastructure equipment rental company engaged in providing specialised heavy equipment solutions for infrastructure, steel, industrial, renewable energy and large-scale construction projects across India. The Company continues to expand its fleet and capabilities to support the requirements of India's infrastructure and industrial sectors.

Note: The ₹92 crore deployment represents machinery deployed from the original ₹105.39 crore XCMG purchase order and not the entire order value. The ₹1,000 crore cumulative gross block objective by FY30 is a long-term management ambition. Cumulative capex deployed and cumulative gross block are distinct measures.
