Subject: Submission of Investor Presentation on SC Health Suite - Planned Public Launch on 27 November 2026

Reference: Regulation 30 read with applicable provisions of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Dear Sir/Madam,

We are pleased to enclose the Company's **35-slide investor presentation titled "SC Health Suite - A Platform for Global Healthcare Partnerships"** for information of the Exchange, shareholders and other stakeholders. It outlines an important digital-health technology initiative within the Company's developing healthcare strategy.

SC Health Suite is scheduled for public launch on 27 November 2026, with a **three-month introductory free-access programme**. Designed as a browser-first wellness platform, its planned capabilities encompass **15 wellness and self-monitoring modules**, family and caregiver features, trend tracking and user-controlled wellness summaries. The platform is intended to be accessible through compatible smartphones without requiring a dedicated wearable.

In addition to consumer engagement, the platform is designed to enable opportunities across **corporate wellness, clinics, insurers, healthcare brands and international technology partners** through prospective subscription, API, co-branded and white-label models. The Company believes this ecosystem approach could provide a foundation for scalable, diversified digital-health services over time.

The presentation includes market context, milestones and **illustrative revenue and EBITDA scenarios**. These are assumption-driven planning cases, **not achieved results, signed contracts, confirmed partnerships or assured financial guidance**. Outcomes depend on product readiness, adoption, healthcare requirements and commercial execution.

We will disclose material developments in accordance with applicable law. Kindly take the enclosed presentation on record and disseminate it to investors.

Thanking you,

Yours faithfully,
For SC AGROTECH LIMITED

SC HEALTH SUITE

A PLATFORM FOR GLOBAL HEALTHCARE PARTNERSHIPS

15 wellness tools · browser-first · family and enterprise solutions

PLANNED LAUNCH / 27 NOV 2026

STRATEGIC INVESTOR PRESENTATION

A new digital-health growth avenue

One platform. Multiple monetisation engines.

Consumer wellness

Browser-first health checks, family profiles, longitudinal engagement and subscriptions.

Institutional solutions

Corporate wellbeing, clinics, insurers and post-discharge monitoring offerings.

Global integrations

APIs, white-label deployments, cross-brand programs and licensing opportunities.

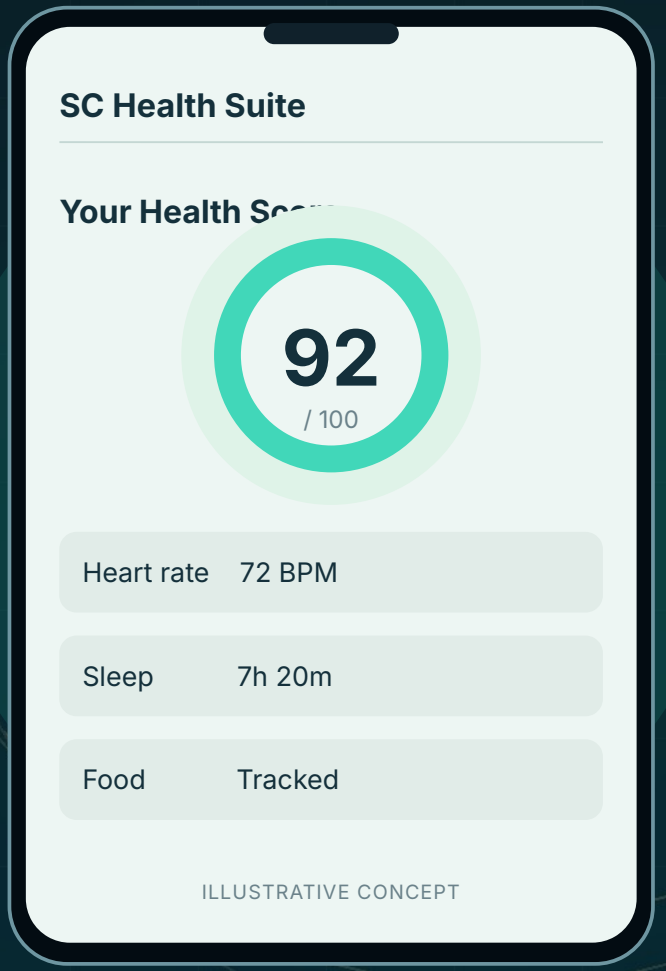
The value proposition extends beyond a single wellness application: the product can become a distribution and engagement layer for multiple healthcare brands.

27 November 2026 | planned public launch

15 wellness modules

3 MONTHS

introductory free access



Planned full-functionality release subject to final acceptance testing and go-live verification.

Why a phone-first health platform?

NO WEARABLE

Use existing smartphone cameras, microphones and motion sensors.

NO DOWNLOAD

Discover and use the service directly through a browser.

FAMILY + CONTINUITY

Move beyond one-off checks to daily wellness history.

PARTNER-READY

Offer a reusable interface for clinics, wellness brands and employers.

A 15-in-1 wellness toolkit

01 PulseCam

02 EyeTest Pro

03 HearCheck

04 CoughLog

05 TremorTrack

06 ReflexTest

07 MemoryGym

08 SkinSnap

09 PostureCheck

10 BreathPace

11 WoundWatch

12 StepSense

13 SleepDiary

14 PillID

15 FoodLens

Everyday checks to build repeat usage

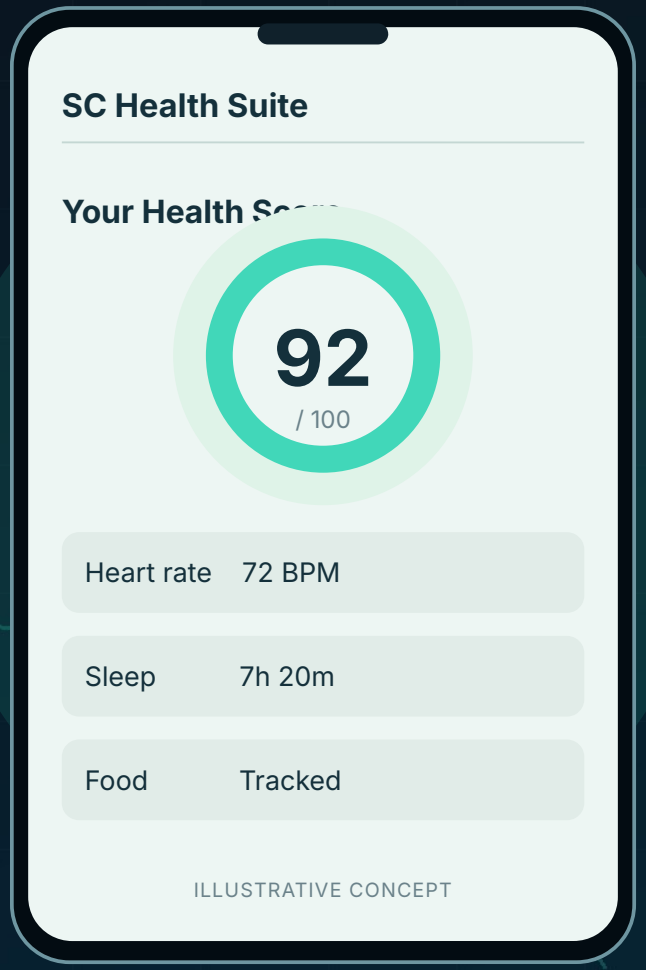
PulseCam	Camera-assisted heart-rate estimate
EyeTest Pro	Vision self-screening
HearCheck	Tone-based hearing self-check
CoughLog	Symptom pattern log
TremorTrack	Motion-sensor tremor tracking
ReflexTest	Reaction-time assessment
MemoryGym	Daily cognitive exercises
SkinSnap	Image-based spot tracking

Tracking, nutrition and family care

PostureCheck	Neck and shoulder scoring
BreathPace	Guided breathing
WoundWatch	Progress photo diary
StepSense	Walk and steps tracking
SleepDiary	Sleep log and optional recordings
PillID	Medication reminders & identification
FoodLens	AI-assisted meal estimates

All tools are positioned as wellness and self-monitoring aids—not diagnostic medical devices.

A unified SC Health Score



Daily signals become a long-term habit.

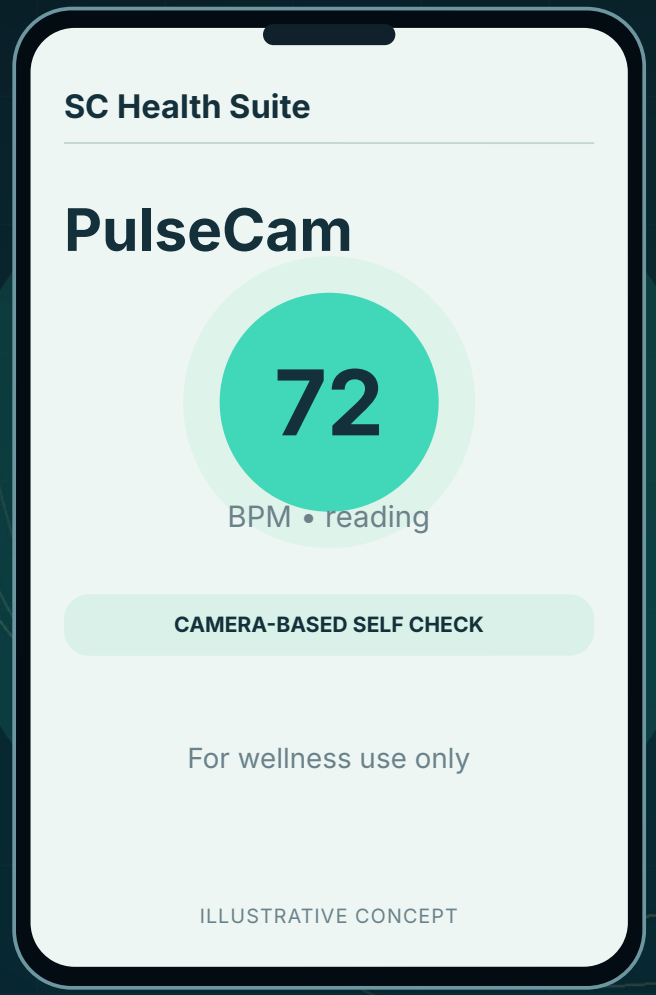
- Aggregated 0–100 wellness score
- Trend tracking across supported tools
- One timeline for individuals and families
- Optional doctor-ready summaries

DESIGNED FOR ENGAGEMENT, NOT DIAGNOSIS

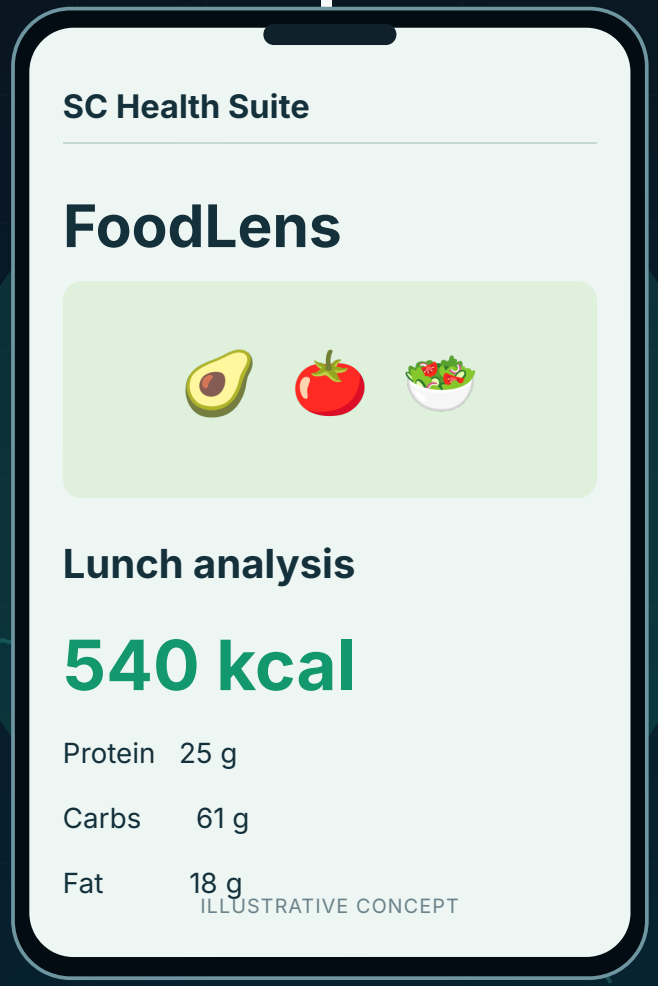
PulseCam | frictionless entry point

Turn the camera into a wellness touchpoint.

- Instant self-check format
- Potential repeat-use and tracking habit
- Extension into opt-in clinician referral pathways
- Measurement requires device and clinical validation



FoodLens | AI-enabled habit formation



From meal photos to personal insights.

Consumer opportunity

Usage frequency + subscription conversion

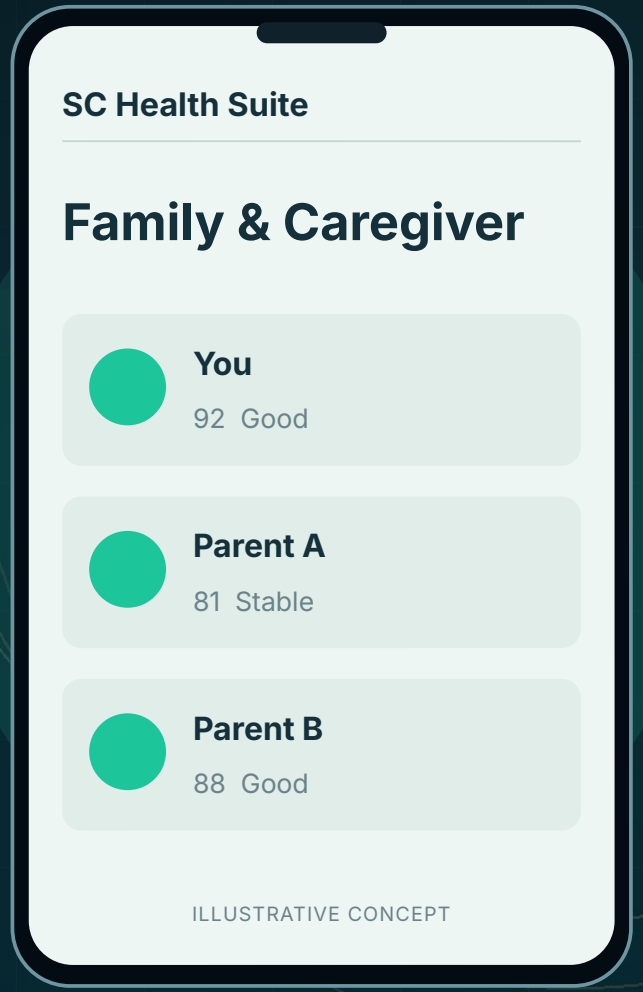
Brand opportunity

Nutrition brands, experts and approved partner programs

Family & caregiver | more value per account

One account.
More than one generation.

- Up to six profiles in the proposed family tier
- Caregiver participation for older relatives
- Multi-user retention and annual plan potential
- Controls for consent, access and data-sharing



Doctor-ready summaries | bridge to care

A richer health conversation starts with better history.

- Portable, user-controlled wellness records
- PDF export or time-limited sharing links
- Potential clinic, teleconsult and post-discharge workflows
- Provider validation and user consent remain essential

A simple journey from discovery to repeat use

01

DISCOVER

Social, search, partners

02

TRY

Browser-based quick check

03

TRACK

Score + wellness timeline

04

SHARE

Family / doctor exports

05

UPGRADE

Consumer / enterprise plans

The product is designed as a recurring engagement layer for multiple services—not only a one-time assessment.

Seven customer segments | multiple channels

INDIVIDUALS	Wellness self-check + premium
FAMILIES	Caregiving and shared history
EMPLOYERS	Wellbeing engagement programs
CLINICS	Between-visit patient tracking
INSURERS	Member engagement + prevention
LABS / PHARMACY	Opt-in referral paths
HOSPITALS	White-label post-discharge workflows

Six revenue engines from one core platform

SUBSCRIPTIONS

Individual and family annual plans

CORPORATE

Per-employee wellness programs

CLINICS

Monthly software subscriptions

INSURERS

Member-based engagement contracts

PARTNERS

Consent-based referral commissions

WHITE-LABEL

APIs and international licensing

No user, client or partner revenue is assumed to be contracted merely by inclusion in this model.

Indicative pricing architecture

SC PLUS	SC FAMILY	CORPORATE	CLINIC
₹149 / month	₹299 / month	₹50–99	₹2k–4,999
₹999 annual plan	₹1,999 annual plan	per employee / month	per clinic / month

White-label/API: dossier planning range ₹10–50 lakh per year per partner; final pricing is subject to commercial contracts.

First 90 days: free access as growth infrastructure

LAUNCH

Browser discovery + onboarding

ACTIVATE

Repeat use + family invites

RETAIN

Wellness score + partner pilots

MONETISE

Tiered paid plans + contracts

Commercial intent: use introductory access to establish activation, retention and proof of engagement before applying monetisation offers.

Distribution playbook | build demand efficiently

ORGANIC

Searchable health-check landing pages and SEO

CREATORS

Short demos, micro-influencers and family invites

INSTITUTIONS

Employers, clinics and medical associations

ECOSYSTEM

Co-branded programs and cross-brand integrations

India digital health market | long-duration tailwind

$7.63B

2025 estimated market

$23.33B

2030 market forecast

25% projected CAGR

Source: MarketsandMarkets, India Digital Health Market, 2025–2030. Broad category market estimate; not SC Health Suite addressable revenue.

SC wellness modules

Product plan

Scale of digital adoption supports an opportunity to build partnerships; it does not establish regulatory integration, clinical approval or commercial traction.

Designed for a global healthcare ecosystem

One platform.
Many partner pathways.

- Hospitals & clinic networks
- Health insurers and wellness plans
- Nutrition, diagnostic and pharmacy brands
- Corporate wellbeing programmes
- International white-label & APIs

ILLUSTRATIVE ECOSYSTEM • NO PARTNERSHIPS IMPLIED

Global partner models | flexible economics

WHITE-LABEL

License technology as a private-brand wellness solution.

CHANNEL

Access local market distribution without surrendering global IP.

API

Embed modules in clinic and wellness platforms.

JOINT SOLUTION

Co-develop approved country-specific offerings.

DATA SERVICES

Consent-led analytics and engagement reporting.

REVENUE SHARE

Commercial partner participation where measurable.

Enterprise deployment expands revenue per relationship

CORPORATE

6L employees × ₹1,000 / yr

₹60 Cr

CLINIC SAAS

5,000 clinics × ₹50k / yr

₹25 Cr

INSURER

30L members × ₹150 / yr

₹45 Cr

WHITE-LABEL

100 licenses × ₹35L / yr

₹35 Cr

Illustrative Year 3 scale requirements, not contracts, realised revenue or management commitments.

Differentiated by breadth, distribution and partner optionality

SINGLE-POINT APPS

Often focus on one check or one consumer habit.

CONSULTATION APPS

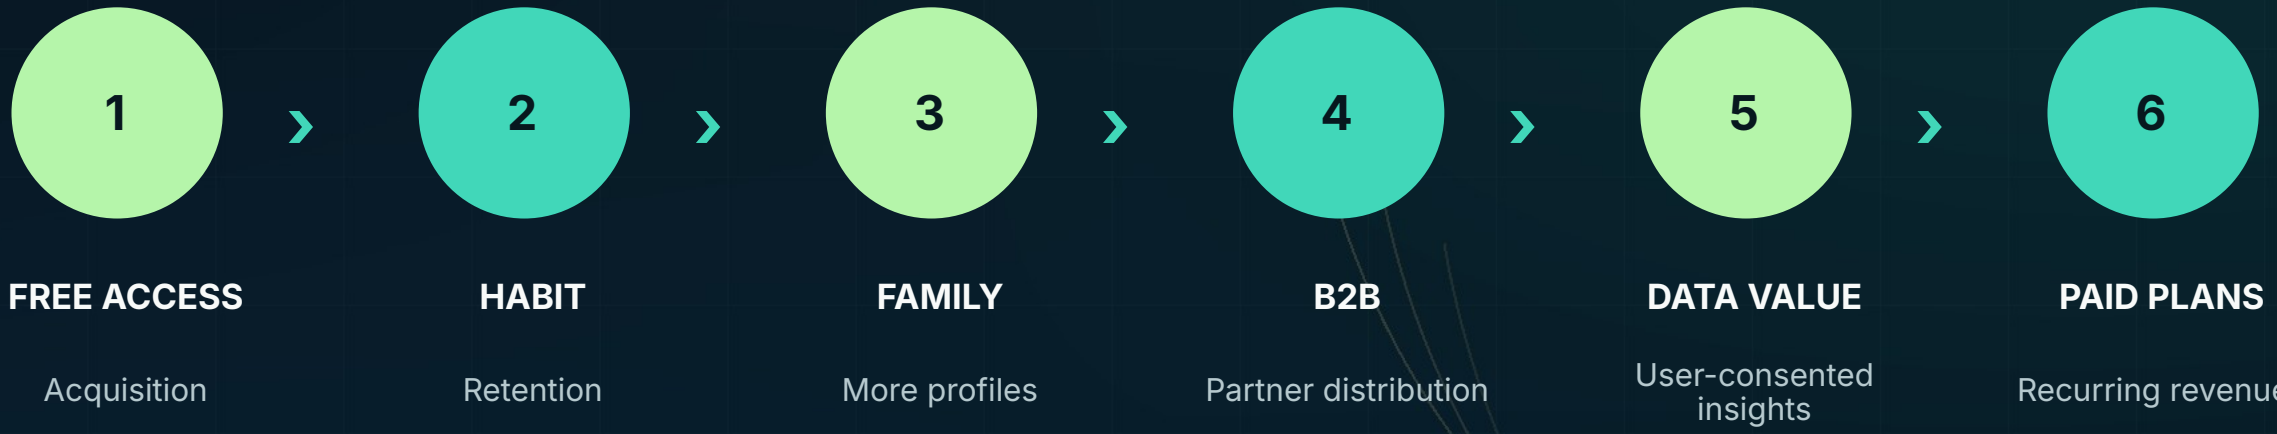
Primarily provide transactions and clinical access.

SC HEALTH SUITE

Seeks to bundle self-checks, longitudinal use and ecosystem integration.

Comparison reflects proposed positioning; functionality, performance and clinical accuracy require independent validation.

An integrated growth flywheel



Critical KPIs: activation • repeat checks • D30 retention • paying conversion • enterprise contracts • net revenue retention

The first 12 months | build the evidence

MONTHS 0–3

LAUNCH

QA, free-access adoption, privacy controls

MONTHS 3–6

ACTIVATE

D30 retention, product reliability, paid plans

MONTHS 6–9

PILOT

Corporate and clinical partner programs

MONTHS 9–12

SCALE

Contracts, localisation, support operations

Years 2–3 | pathway to global partnerships

YEAR 2 / REPLICATE

Localisation · retention · enterprise conversion · validated clinical and partner pilots

YEAR 3 / PLATFORMISE

Insurance programmes · international white-label · APIs · multi-brand bundles

Subject to local data-protection, healthcare and commercial approvals.

Illustrative accelerated commercial scenario

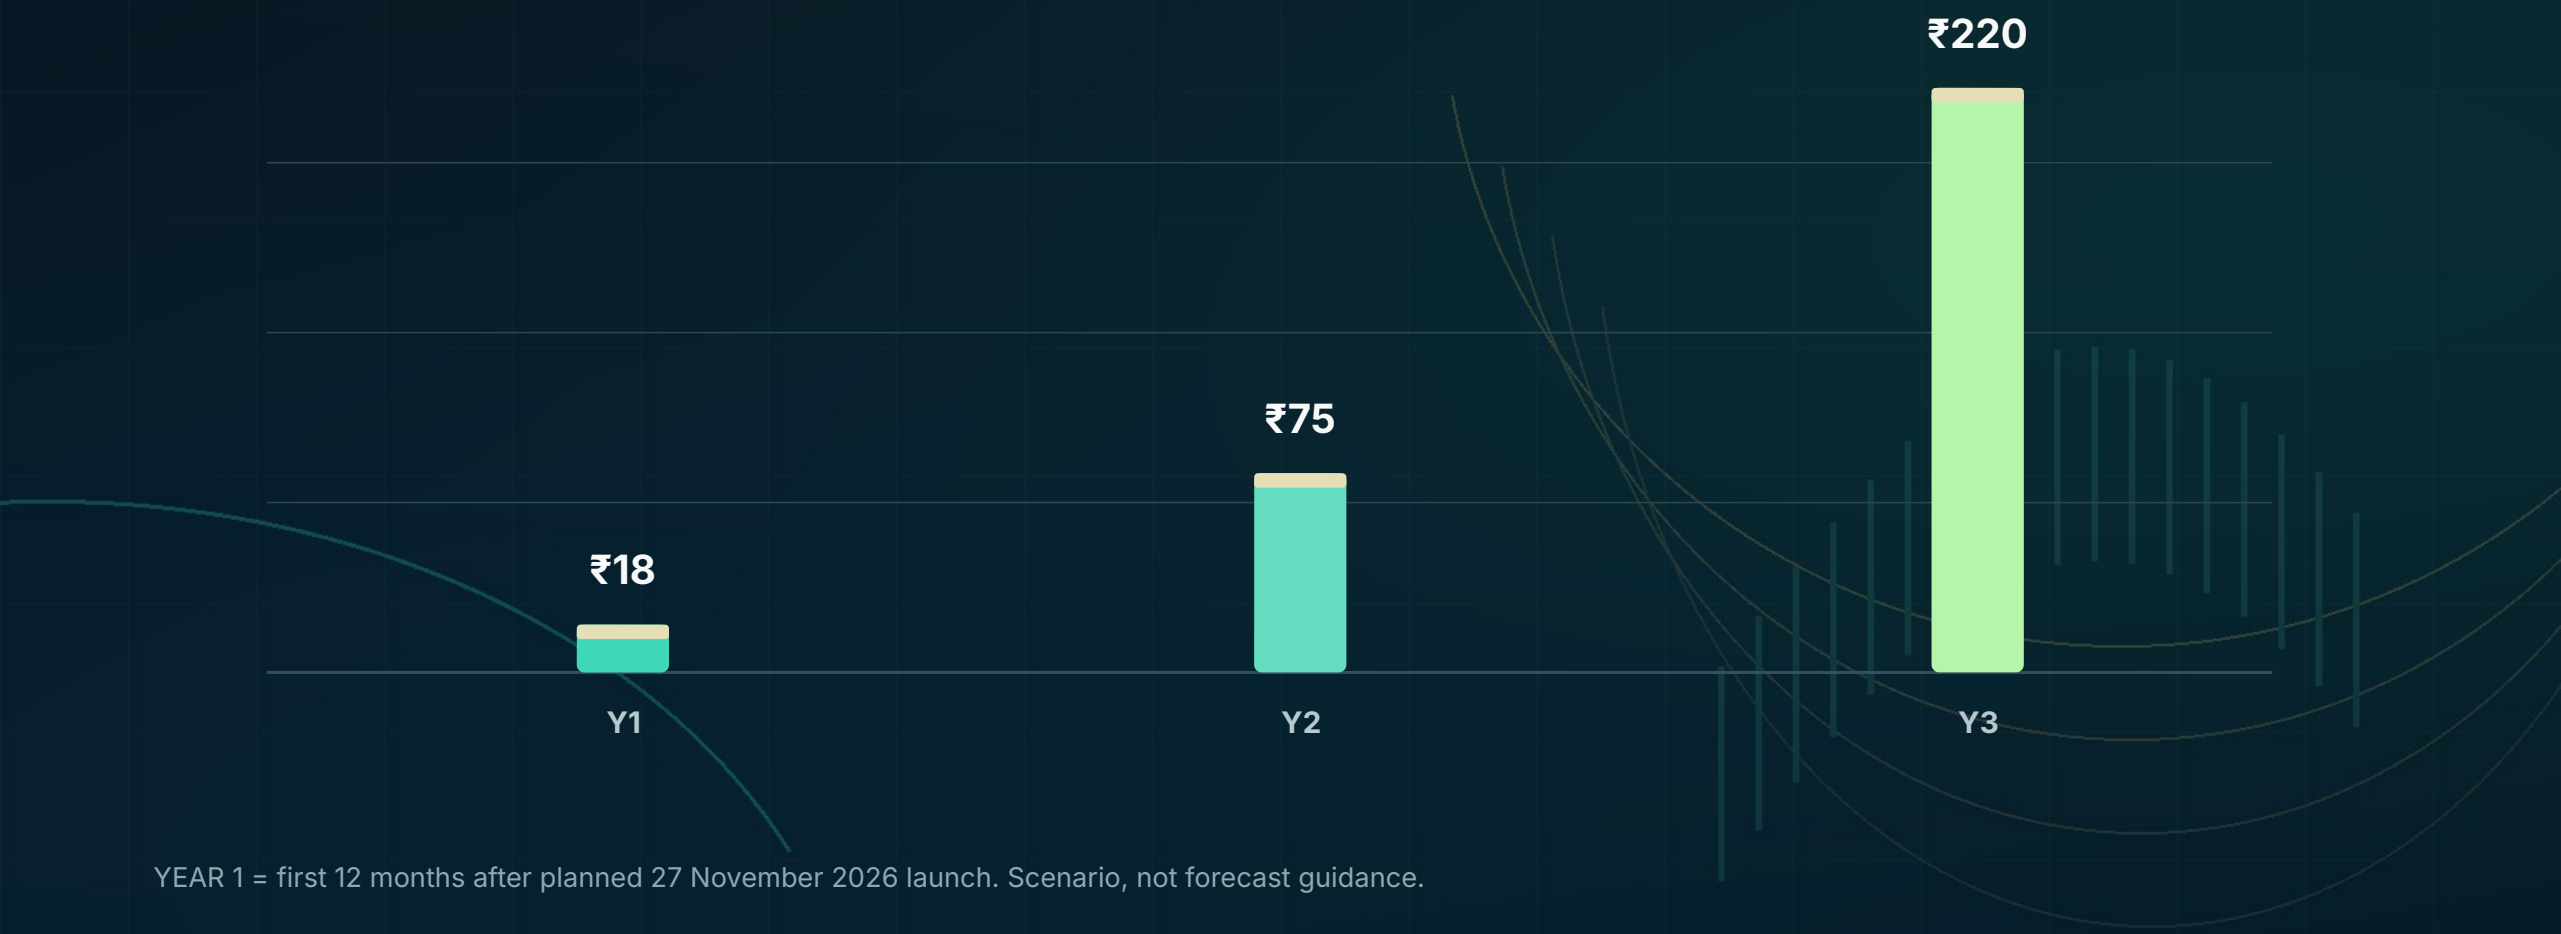
ASPIRATIONAL • ASSUMPTION-DRIVEN

A deliberately ambitious model, not realised revenue or approved guidance.

YEAR 1	YEAR 2	YEAR 3
₹18 Cr	₹75 Cr	₹220 Cr

Scenario assumes substantial enterprise contract wins, high retention, scaled distribution and successful licensing. Each milestone must be earned.

Illustrative revenue opportunity | ₹220 Cr in Year 3



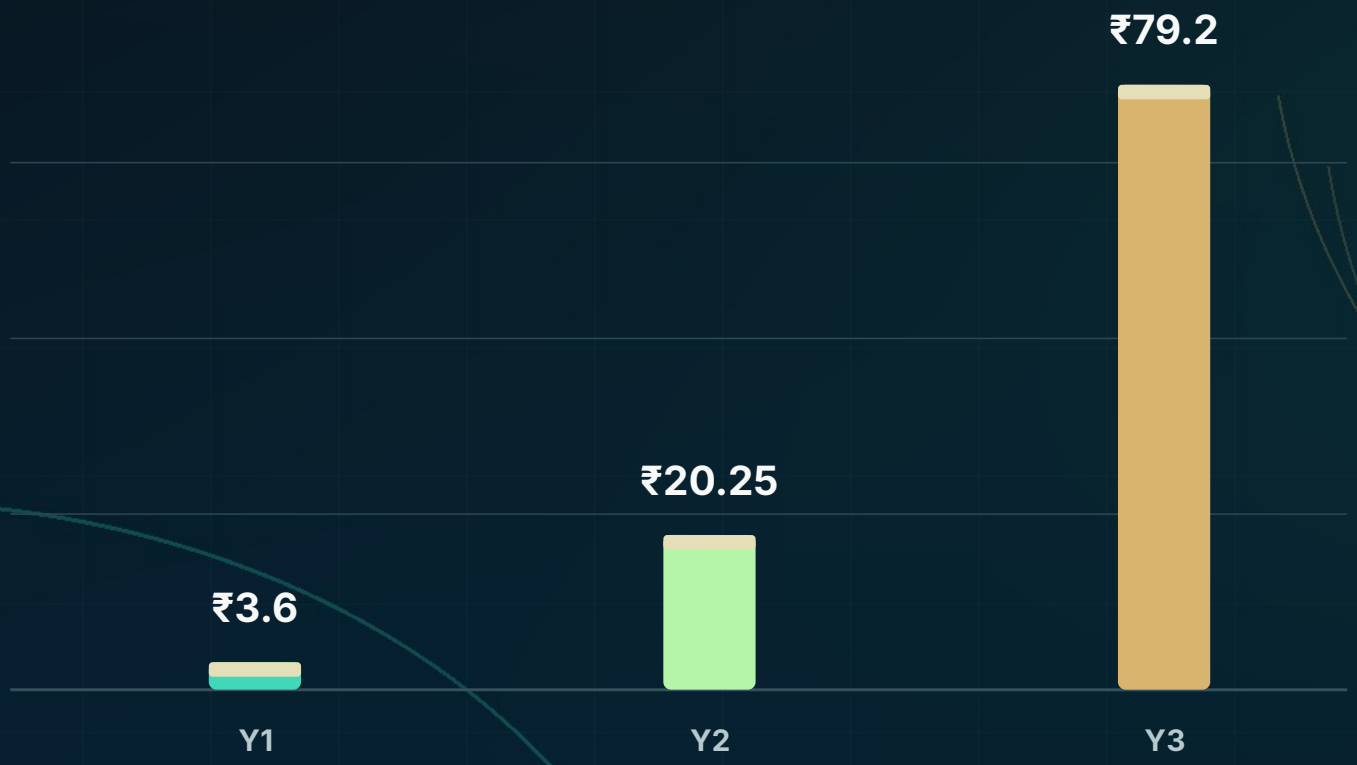
YEAR 1 = first 12 months after planned 27 November 2026 launch. Scenario, not forecast guidance.

Year 3 revenue bridge | 6 monetisation engines

Corporate	₹60 Cr	Insurer	₹45 Cr	Consumer	₹35 Cr
White-label	₹35 Cr	Clinics	₹25 Cr	Partners	₹20 Cr

Scale bridge is mathematical and illustrative; actual partner contracts, users and conversion rates are not yet established.

Illustrative EBITDA leverage | positive-path scenario



EBITDA MARGIN

Y1	20%
Y2	27%
Y3	36%

Based on modeled operating costs of ₹14.4 Cr, ₹54.75 Cr and ₹140.8 Cr respectively.

What must happen to achieve the accelerated case?

CONSUMER	**₹35 Cr**
≈350k avg paying equivalents at ₹1k/year	
CORPORATE	**₹60 Cr**
600k covered employees at ₹1k/year	
CLINICS	**₹25 Cr**
5,000 clinics at ₹50k/year	
INSURERS	**₹45 Cr**
3M covered lives at ₹150/year	
PARTNERS	**₹20 Cr**
≈1M qualified transactions at ₹200 net	
LICENSING	**₹35 Cr**
100 partner contracts at ₹35 lakh/year	

Equivalent paying users = average revenue-generating subscribers; these are required volumes, not current operating metrics.

Three potential scale outcomes | not all will occur

DOSSIER BASE

REVENUE

₹55.6 Cr

EBITDA

₹15.6 Cr

EXPANSION

REVENUE

₹120 Cr

EBITDA

₹32 Cr

ACCELERATED

REVENUE

₹220 Cr

EBITDA

₹79.2 Cr

The dossier base and two alternative scenarios are not cumulative. All are planning cases, not contracted business, estimates of stock returns or audited results.

Governance gates before commercial scale

CLINICAL

Screening performance, contraindications, medical oversight

PRODUCT

Completion of four features currently marked “Soon”

PRIVACY

Health-data permissions, consent, security and retention

COMMERCIAL

Signed contracts, revenue recognition and audited KPIs

GLOBAL

Country-specific laws, licensing and data transfer review

FINANCIAL

Board validation of scenario drivers and capital needs

SC AGROTECH LIMITED / BSE: 526081

THE NEXT CHAPTER IN DIGITAL HEALTH

SC Health Suite is designed as one platform within a wider healthcare ecosystem: consumers, institutions and global brands.

SCHEALTHSUITE.AI

Launch planned 27 Nov 2026. Forward-looking scenarios are illustrative, assumption-driven and subject to management validation; no contracted revenues or assured returns are implied.
