41.77%

Alkanolamines and Alkyl Alkanolamines
42.85%

Morpholine & Derivatives
4.97%

EO/PO-Based Speciality Products
9.16%

Others
1.25%

Commenting on the results, Mr. Hemant Kumar Ruia, Chairman and Managing Director, said:

"Q2FY27 was a steady quarter for the Company. We kept our sales and profitability in line with the previous quarter despite a demanding operating environment. Supplies of our key raw material were limited for more than a month during the quarter. During that period we moved production towards other products in our portfolio, which allowed us to protect both revenue and margins. Supplies resumed in the later part of the quarter, and operations have remained steady since.

The broader environment continues to present challenges, particularly in the availability and cost of gas and in elevated logistics costs. Shipping rates stayed high through the quarter. Our customers have worked closely with us to absorb the resulting rise in freight costs, which reflects the value they place on reliable supply in uncertain conditions. Demand from the Middle East has stayed resilient.

We continued to invest in research and development during the quarter, with work underway on new products in the ethoxylates and propoxylates categories. Initial commercial supplies of some of these products have begun to select multinational customers, and we see them as a meaningful avenue for future growth.

We have also committed capital expenditure of approximately ₹4 to 5 crore to upgrade our ethylene oxide storage and transportation infrastructure. The investment will further strengthen safety standards and keep us closely aligned with regulatory requirements.

We have strong demand visibility and a healthy order book, which give us confidence in the Company's ability to keep performing steadily through these uncertain times. For now our focus remains on running our operations efficiently and protecting our financial performance. As conditions ease, we intend to put capital into capacity and infrastructure that will support the next phase of growth. The resilience of the business over the past two quarters, together with the progress we have made on products and customers, leaves us well positioned for the opportunities ahead."

ABOUT AMINES & PLASTICIZERS LIMITED

Amines & Plasticizers Limited (APL), founded in 1973 and headquartered in Mumbai, is a leading manufacturer of ethanolamines, alkyl alkanolamines, morpholine derivatives, and gas-treating solvents, catering to diverse industries including oil refining, petrochemicals, pharmaceuticals, agrochemicals, and textiles. The company holds a dominant 75–80% share of the Indian ethanolamines market and exports to over 85 countries across North America, Europe, and Asia. Over the years, APL has steadily diversified its product portfolio, most recently entering the oilfield chemicals segment with solutions such as H2S scavengers and demulsifiers. APL was the first Indian company to indigenously develop and manufacture methyl diethanolamine (MDEA), a critical solvent for gas treatment, and ranks among the top global producers of MEDA based solvents and N-methyl morpholine oxide (NMMO) and continues to invest in R&D to strengthen its position in speciality amines. With a strong focus on innovation-led growth, APL has emerged as a trusted partner to both domestic and international customers across over 85 countries.
