Dear Sir/Madam,

Subject: Intimation of Press Release

Pursuant to Regulation 30 and applicable regulations, if any, of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("*SEBI Listing Regulations*"), please find enclosed herewith the Press Release to be issued by Anupam Rasayan India Limited today i.e., June 11, 2026, titled "**Anupam Rasayan India Limited becomes the first company in the world to commercialise ETFA (Ethyl trifluoroacetate) using flow chemistry.**"

Disclosure of information as required under Regulation 30 read with Clause 3 of Para B of Part A of Schedule III of the SEBI Listing Regulations and SEBI Master Circular no. HO/49/14/14(7)2025-CFD-POD2/I/3762/2026, issued on January 30, 2026 is enclosed as 'Annexure-A'.

This intimation will also be hosted on the website of the Company at www.anupamrasayan.com.

We request you to kindly note the same and take into your records.

Thanking you,

Yours Faithfully,

For Anupam Rasayan India Limited

Anand Desai
Managing Director
DIN: 00038442

Encl.: As above

ANUPAM RASAYAN INDIA LTD.

Annexure - A

The details required under Regulation 30 read with Clause 3 of Para B of Part A of Schedule III of the SEBI Listing Regulations and SEBI Master Circular No. HO/49/14/14(7)2025-CFD-POD2/I/3762/2026 dated January 30, 2026 are as under:

Sr. No.	Particulars	Details
1.	Name of the product	ETFA (Ethyl trifluoroacetate)
2.	Date of launch	June 11, 2026
3.	Category of the product	Chemical Intermediate
4.	Whether caters to domestic/ international market	Both, domestic and international
5.	Name of the countries in which the product is launched (in case of international)	Multiple countries including the USA, Japan, and others.

Anupam Rasayan India Limited becomes the first company in the world to commercialise ETFA (Ethyl trifluoroacetate) using flow chemistry

Surat, June 11, 2026: Anupam Rasayan India Ltd. (NSE: ANURAS, BSE: 543275), a leading custom-synthesis and specialty chemicals company, is pleased to announce the commercialisation of ETFA (Ethyl trifluoroacetate) production through its proprietary process-by-design continuous flow chemistry platform.

ETFA is a critical fluorinated building block and reagent used in the synthesis of a wide range of organic fluorine compounds. These compounds find extensive applications across the life sciences, pharmaceutical, and performance materials, where fluorine chemistry plays a vital role in enhancing product performance, efficacy, and stability. The global addressable market for ETFA is estimated at approximately USD 500–600 million, highlighting its strategic importance within the specialty chemicals value chain.

The achievement positions Anupam Rasayan India Limited as the first company globally to manufacture ETFA at commercial scale using flow technology. Compared with conventional batch processes, the continuous flow platform offers significant advantages, including enhanced process safety, superior reproducibility, improved scalability, higher operational efficiency, and a lower environmental footprint.

Speaking about the achievement, **Anand Desai, Managing Director of Anupam Rasayan**, said:

“The successful commercialisation of ETFA through our continuous flow chemistry platform represents a significant milestone in Anupam Rasayan’s innovation journey. This achievement not only demonstrates our technological capabilities in complex fluorination chemistry but also highlights our ability to develop and scale differentiated manufacturing solutions that address evolving customer requirements.

Innovation remains at the core of our growth strategy. We will continue to invest in cutting-edge process technologies, research capabilities, and sustainable manufacturing practices to create long-term value for our customers, stakeholders, and the industry at large.”

About Anupam Rasayan India Ltd.:

Anupam Rasayan India Ltd (Anupam) is one of the leading companies engaged in the custom synthesis (CSM) and manufacturing of specialty chemicals in India. Incorporated in 1984, the speciality chemicals major has two verticals: Life science related Specialty Chemicals comprising products related to Agrochemicals, Personal Care and Pharmaceuticals, Performance Materials comprising Electronics & EV Chemicals and Polymers.

Anupam caters to a diverse base of Indian and global customers. It is currently manufacturing products for over 75 domestic and international customers, including 31 multinational companies. Anupam operates via eight manufacturing facilities, with four facilities located at Sachin, Surat, two located at Jhagadia, Bharuch with an aggregate installed capacity of about 30,000 MT and two manufacturing facilities via Jayhawk Fine Chemicals in the USA with an aggregate installed capacity of about 36,000 MT as of March 31, 2026. Anupam offers multistep synthesis capturing larger part of value chain, thereby providing complimentary products for a diverse base of Indian and global customers.
