TCS and Anthropic launch Global Premier Partnership to drive Enterprise AI scaling

As a Global Premier Partner in the Claude Partner Network, TCS will empower 50,000 associates with Claude, powered by Anthropic, transform core enterprise functions, co-innovate industry solutions, and build future-ready AI talent through TCS iON.

TCS and Anthropic will also jointly go to market with AI solutions for highly regulated sectors.

SAN FRANCISCO | MUMBAI, June 11, 2026: [Tata Consultancy Services](#) (TCS) (BSE: 532540, NSE: TCS), a global leader in IT services, consulting, and business solutions, today announced a global strategic partnership with Anthropic, the frontier AI company behind Claude, to help customers scale enterprise AI adoption. TCS will setup a dedicated Business Unit focused on delivering strong customer value propositions, joint industry solutions and deep AI expertise on the Claude family of models through early access to Claude models.

In regulated industries, most AI initiatives stall at the pilot stage, where the requirements for accuracy, auditability and oversight are far more stringent, and the consequences of error significantly higher. This partnership is designed to overcome those barriers. Combining TCS' governance, controls and implementation expertise will enable enterprises to deploy Claude confidently in production, not just in experimentation.

As a Global Premier Partner in the Claude Partner Network, TCS will bring Claude models to enterprises that demand accuracy, deep integration, resilience and strong governance. Combining scaled internal deployment, joint go-to-market offerings, industry co-innovation, and workforce enablement, the partnership gives clients a practical path to enterprise-wide adoption and measurable outcomes.

TCS will equip 50,000 associates across engineering, finance, legal, marketing, and sales with Claude through enterprise-wide licensing. By deploying Claude internally, TCS will gain first-hand experience to transform its own operations while applying those insights to drive client success.

TCS and Anthropic will jointly go to market with AI solutions and services across industries including highly regulated sectors, such as financial services, public services, life sciences, healthcare, aviation, telecom, and medtech. Together, they will co-innovate solutions for domain-specific workflows, modernization, and customer experience transformation, backed by TCS' consulting, engineering, and managed services capabilities.

The partnership also extends to TCS products, platforms and domain specific solutions in the following areas:

- In the UK, Diligenta, TCS' FCA-regulated life and pensions business serving over 22 million Life and Pensions customers, will use Claude to improve customer experience through agentic process transformation at scale. In addition, BFSI Products and Platforms teams will leverage Claude Code to enhance productivity in Software engineering and IT Operations.
- TCS iON conducts over 75 million annual assessments across 1,500 cities in India. Through this partnership TCS iON will deliver high-impact learning and certification on Claude models, helping build a future-ready, AI-certified workforce in India.
- TCS will also bring its domain-led engineering expertise to the Claude Code ecosystem through reusable skills and plugins, including capabilities such as claims adjudication and lending advisory.

K Krithivasan, CEO and MD, TCS, said, *“Enterprise AI value comes from understanding business context, orchestrating complex systems, and applying deep AI engineering talent. By combining Claude with our industry expertise, engineering rigor, and large-scale transformation capabilities, we will help customers move faster to production, especially in industries where trust, resilience, and regulatory discipline are critical. This partnership reflects TCS’ broader strategy to help clients become perpetually adaptive enterprises by turning frontier AI into transformation at enterprise scale.”*

Dario Amodei, Co-founder and CEO, Anthropic, said, *“We built Claude to be safe, trusted, and helpful, particularly in contexts where accuracy matters most. This partnership deepens our commitment to India, our second-largest market, with TCS bringing Claude to enterprises and professionals across the region and globally, including 50,000 of its employees.”*

N Chandrasekaran, Chairman, Tata Sons, said, *“This partnership reflects our shared conviction that AI will be foundational and transformative for enterprises worldwide. By combining Anthropic’s capabilities with Tata Group’s scale, trusted relationships, and nation-building commitment, we will accelerate enterprise reinvention and equip India’s youth with the skills to lead in the AI era.”*

About Anthropic

Anthropic is an AI safety company that builds reliable, interpretable, and steerable AI systems. Founded as a public benefit corporation, Anthropic develops the Claude family of AI models and products, including Claude Code, Claude Cowork, and Claude Enterprise, used by organizations around the world. About Tata Consultancy Services (TCS)

Tata Consultancy Services (BSE: 532540, NSE: TCS) is the technology partner of choice for industry-leading organizations worldwide. Since its inception in 1968, TCS has upheld the highest standards of innovation, engineering excellence and customer service.

It has set an aspiration to become the world's largest AI-led technology services company and is enabling its clients to transform themselves across the full AI stack, from infrastructure to intelligence.

Rooted in the heritage of the Tata Group, TCS is focused on creating long term value for its clients, its investors, its employees, and the community at large. With a highly skilled workforce spread across 56 countries and 194 service delivery centers across the world, the company has been recognized as a top employer in six continents. With the ability to rapidly apply and scale new technologies, the company has built long-term partnerships with its clients. Many of these relationships have endured into decades and navigated every technology cycle, from mainframes in the 1970s to artificial intelligence today.

TCS sponsors 14 of the world’s most prestigious marathons and endurance events, including the TCS New York City Marathon, TCS London Marathon, Tata Mumbai Marathon and TCS Sydney Marathon with a focus on promoting health, sustainability, and community empowerment.

TCS generated consolidated revenues of over US \$30 billion in the fiscal year ended March 31, 2026. For more information, visit www.tcs.com
