GENESYS

Commenting on the Results, Mr. Sajid Malik – Chairman & Managing Director said,

“During the year in question, the company maintained and grew its position as India’s premier urban digital twin geospatial leader. Over a short span - several marquee cities have been done which is perhaps one of largest such implementations of this technology even the world over from a urban density standpoint

This will lead to scale and better project cycles in the years ahead. And a larger adoption given the benefits that we were able to showcase. We are proud to say that our Varanasi implementation received prestigious the Skoch award for the same .

Secondly , importantly we leveraged the digital twin and 3D infrastructure to launch and win again -a India first - initiative in our automotive connected mobility solutions by winning India’s first HD ADAS navigations maps with the potential to save many lives via road safety . Our first customer was one of the largest and most respected auto OEM’s of this county. We expect in the years ahead ahead to grow the automotive vertical.

Thirdly- we are now building a pre eminent position in a broad swath of location intelligence across many verticals which we hope to scale in the quarters ahead.

Fourthly, we expanded the application of our geospatial and digital twin capabilities beyond urban infrastructure into environmental and river intelligence. During the year, we secured a landmark assignment from the National Mission for Clean Ganga (NMCG) for advanced aerial LiDAR mapping and geotagged videography of the Ganga corridor across four states.”
