## InfoBeans Technologies Achieves ISO 42001:2023 Certification, Becoming an Early Adopter of the World's First International Standard for AI Management Systems

Indore, India - June 4, 2026 - InfoBeans Technologies Ltd, a global digital engineering and AI solutions company, today announced that it has officially received the ISO/IEC 42001:2023 certification - the world's first international standard for Artificial Intelligence Management Systems (AIMS).

The certification, issued by Staunchly Management and System Services Limited, recognizes InfoBeans for conforming to globally established standards in AI governance, risk management, responsible development, and lifecycle oversight across its internally developed and third-party AI solutions.

A milestone that goes beyond Compliance

ISO 42001:2023 is not a standard that companies are required to meet – it is one that forward-thinking organizations choose to pursue. It signals a deliberate, organization-wide commitment to building and deploying AI responsibly, transparently, and accountably.

For InfoBeans, this certification validates what has always been at the core of its AI practice - the belief that powerful technology must be paired with principled governance.

What the Certification covers

The certification scope includes:

- Internally developed AI tools and solutions built by InfoBeans
- Third-party AI solutions integrated and deployed by InfoBeans
- All supporting functions involved in AI usage, governance, risk management, and lifecycle oversight

This comprehensive scope ensures that responsible AI practices are embedded across the full spectrum of InfoBeans' AI operations - not just in isolated products or teams.

"Receiving the ISO 42001:2023 certification reflects our long-standing commitment to building AI that enterprises can trust. As AI becomes central to how businesses operate, governance and accountability are no longer optional, they are foundational. This certification is our commitment to upholding that standard for every client, every solution, and every deployment." - Leadership, InfoBeans Technologies Ltd

#### About InfoBeans Technologies Ltd

InfoBeans Technologies Ltd is a global digital engineering and AI solutions company headquartered in Indore, India, with offices in Pune and operations across North America, Europe, and the Middle East. The company partners with enterprises to deliver AI-led transformation through its suite of accelerators including InsaneSDD 2.0, InfoBeans RAI, and Expona 2.0, built on a foundation of responsible AI principles and enterprise-grade governance.
