Dear Sir,

Sub: Disclosure under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 - Press Release and Bagging/Receiving of Orders/Contracts

In compliance with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find enclosed herewith copy of Press Release issued by the Company titled '*Aerolloy Technologies Selected by Safran Aircraft Engines for Critical Titanium Castings for the LEAP Engine Programmes*' is enclosed as **Annexure -1'**

Further, the disclosure required under Regulations 30 of SEBI Listing Regulations read with SEBI Circular SEBI/HO/CFD/PoD2/CIR/P/0155 dated November 11, 2024, is enclosed as **Annexure-2.**

This is for your information and record.

Yours faithfully,

For PTC Industries Limited

PRESS RELEASE

Aerolloy Technologies Selected by Safran Aircraft Engines for Critical Titanium Castings for the LEAP Engine Programme

Programme to Leverage Aerolloy's Integrated Titanium Manufacturing Capability under PTC ONE™ - from Melt to Mission™

Key Highlights

- **Development order from Safran Aircraft Engines.** Aerolloy Technologies Limited, a wholly owned subsidiary of PTC Industries Limited, has received a development order for **critical Titanium cast part numbers, fully machined, ready-to-fit supply** for the LEAP engine programme.
- **Long-term production framework established.** Aerolloy Technologies and Safran Aircraft Engines have signed a Memorandum of Understanding establishing the commercial framework for these components. Upon successful completion of development and qualification, the programme is expected to transition into long-term serial production.

Bengaluru, India - October, 2026: Aerolloy Technologies Limited, a wholly owned subsidiary of PTC Industries Limited (NSE: PTCIL | BSE: 539006), today announced that it has been selected by **Safran Aircraft Engines**, one of the world's leading commercial aircraft engine manufacturers, for the development and manufacture of **critical Titanium cast components, fully machined, ready-to-fit supply** for the **LEAP engine programme**.

This represents the second set of orders received by Aerolloy Technologies from Safran Aircraft Engines for titanium castings under the LEAP engine programme, further strengthening and expanding the scope of the ongoing relationship.

Aerolloy Technologies and Safran Aircraft Engines have also signed a **Memorandum of Understanding** establishing the framework for long-term production supply following successful development and qualification.

The LEAP engine is among the world's most important commercial aero-engine programmes, powering the Airbus A320neo, Boeing 737 MAX and COMAC C919 aircraft families. The components under this programme comprise complex structural Titanium castings and will be supplied in a fully machined, ready-to-fit condition.

PTC ONE™ - from Melt to Mission™

The LEAP programme will be manufactured through **PTC ONE™ - from Melt to Mission™**, the Group's integrated manufacturing system for transforming advanced aerospace materials into mission-critical components.

For this programme, Aerolloy's role will combine Titanium material capability, precision investment casting, HIP, vacuum heat treatment, special processes, precision machining, assembly and inspection under one manufacturing organisation.

This integrated approach provides process continuity, quality control, traceability and supply-chain resilience - all of which are critical for global aerospace programmes where performance, reliability and repeatability are essential.

Chairman and Managing Director's Statement

Mr. **Sachin Agarwal**, Chairman & Managing Director, PTC Industries Limited, said:

"We are grateful to Safran Aircraft Engines for the trust placed in Aerolloy Technologies and PTC Industries through this important programme. Being selected for critical Titanium components for the LEAP engine is a strong validation of the integrated aerospace manufacturing capability that we have been building over several years.

The significance of this programme lies in the depth of responsibility - from Titanium material capability to precision casting, special processes, machining, assembly and inspection - with components supplied in a fully machined, ready-to-fit condition."

Signing ceremony between Safran Aircraft Engines and PTC Industries at Supplier Conference India 2026, Bengaluru

ABOUT PTC INDUSTRIES LIMITED

PTC Industries Limited is an advanced manufacturing company with over six decades of experience in critical and super-critical engineering applications.

Through its wholly owned subsidiary Aerolloy Technologies Limited and its global manufacturing operations, the Group is building one of the world's most integrated capabilities for Titanium and Superalloy materials, precision castings and machined components serving aerospace, defence, space and energy markets.

PTC ONE™ - from Melt to Mission™ Compounding Capability. Creating Value.

Annexure-2

**Disclosure in terms of Regulations 30 of SEBI Listing Regulations, read with SEBI Circular
SEBI/HO/CFD/PoD2/CIR/P/0155 dated November 11, 2024-
Bagging/Receiving of Orders/Contracts**

Sr. No.	Particulars	Remarks
1	Name of the entity awarding the Order/Contract	Safran Aircraft Engines
2	Significant terms and conditions of the Order/Contract awarded in brief	Development order awarded to Aerolloy Technologies Limited (wholly owned subsidiary of PTC Industries Limited) for critical Titanium cast part numbers, fully machined, ready-to-fit supply for the LEAP engine programme.
3	Whether the Order/Contract has been awarded by domestic/international entity	International entity
4	Nature of Order/Contract	Development of critical Titanium cast parts, precision machining, and supply in ready-to-fit condition for commercial aircraft engines.
5	Whether domestic or international	International entity
6	Time period by which the Order/Contract is to be executed	Long Term Agreement
7	Broad consideration or size of the Order/Contract	Not disclosed due to strategic and confidentiality considerations
8	Whether the Promoter/Promoter Group/Group Companies have any interest in the entity that awarded the Order/Contract? If yes, nature of interest and details thereof	No
9	Whether the Order/Contract would fall within related party transactions? If yes, whether the same is done at 'arm's length'	No
