Business Update: Order Execution Visibility

Kavveri Defence & Wireless Technologies Limited ("the Company") wishes to inform the Exchange of continued positive momentum in its business operations.

The Company currently has confirmed orders in hand aggregating to ₹22 crores, scheduled for execution over the next three months. These orders are placed by large established defence customers, in India as well as overseas, and cover defence and defence-linked programmes, drawn from the Company's core portfolio of antennas, filters, switches, and other RF components, and are expected to contribute to a meaningful step-up in reported revenue as they are executed.

This order profile reflects the Company's steadily deepening integration into the defence electronics ecosystem, both in India and internationally. Kavveri supplies RF subsystems into platform and programme-level requirements as a qualified, long-cycle vendor, a position built on approved designs and in-house design, fabrication and test capability.

Programmes of this nature carry recurring demand once a product is qualified. A further set of opportunities with domestic and overseas defence customers is at advanced stages of discussion, and is expected to convert into confirmed business beyond this execution window, adding to the Company's revenue trajectory in subsequent quarters.

CONFIRMED ORDERS IN HAND	EXECUTION WINDOW	CUSTOMER AND PRODUCT MIX
Rs. 22 cr	3 months	Large defence customers Antennas, filters, switches and RF components supplied to established defence customers in India and overseas

MANAGING DIRECTOR'S COMMENT

"The execution visibility we now have for the next three months comes from two years of patient product development. We used that time to design, qualify and industrialise our RF products properly, and that work is now bearing fruit. These orders are for large established defence customers, in India as well as overseas, won on engineering merit, approved designs and price, while still carrying a healthy margin profile. Visibility in defence and commercial systems is building up further, with several discussions at advanced stages. With our integration across design, fabrication and testing continuing to strengthen, we are well positioned to convert those opportunities in the quarters ahead."

Mr. Shivakumar Reddy C, Managing Director
