Press Release

Dual Recognition for Jindal Stainless at CII National Energy Management Awards 2026

- *Jajpur and Hisar units recognised for excellence in energy efficiency, process innovation, and responsible manufacturing.*

National, September 22, 2026: Jindal Stainless, India's leading stainless steel manufacturer, has received dual recognition at the **CII National Award for Excellence in Energy Management 2026**, with its Jajpur and Hisar manufacturing units being honoured for their contributions to energy efficiency and sustainable operations. The awards recognise the company's ongoing efforts to integrate energy-efficient technologies, process innovation, and resource optimisation across its manufacturing operations.

The Jajpur unit was conferred the '**Excellent Energy Efficient Organization**' Award, while the Hisar unit received the '**Excellent Energy-Efficient Unit**' Award at the ceremony held in Hyderabad from September 16–18, 2026. Organised by the Confederation of Indian Industry (CII), the awards recognise organisations demonstrating excellence in energy management, conservation, innovation, and sustainable industrial practices.

The recognition reinforces Jindal Stainless' commitment to embedding energy efficiency within its manufacturing operations and advancing its long-term decarbonisation roadmap.

Commenting on the achievement Managing Director, Jindal Stainless, Mr Abhyuday Jindal, said, "At Jindal Stainless, sustainability and operational excellence go hand in hand. The recognition of our Jajpur and Hisar units at the CII National Awards reflects the commitment of our teams to responsible manufacturing, continuous innovation, and prudent resource utilisation. As we advance our decarbonisation journey, energy efficiency will remain a critical pillar of our efforts to build a more sustainable future."

The **Jajpur unit's** recognition acknowledges its sustained efforts to optimise energy consumption, deploy resource-efficient technologies, enhance process efficiencies, and strengthen environmentally responsible operations. These initiatives support the unit's efforts to improve operational performance while contributing to the company's broader decarbonisation and sustainability objectives.

At the **Hisar unit**, a key component of the evaluation was the presentation of its energy management case study before a distinguished jury panel. The presentation highlighted the plant's integrated approach to energy efficiency through technology adoption, renewable energy integration, waste heat recovery systems, fuel substitution, process optimisation, and employee-led conservation initiatives. Together, these measures support energy conservation, greenhouse gas emission reduction, productivity enhancement, and improved resource efficiency.

The dual recognition highlights Jindal Stainless' continued focus on strengthening its manufacturing capabilities through operational excellence and responsible resource management. By investing in clean energy, energy-efficient technologies, and continuous process improvement, the company remains committed to advancing industrial efficiency and contributing to India's energy transition and climate goals.

About Jindal Stainless

India's leading stainless steel manufacturer, Jindal Stainless, had an annual turnover of INR 42,955 crore (USD 4.86 billion) in FY26 and an annual melt capacity of 4.2 million tonnes. It has 16 stainless steel manufacturing and processing facilities in India and abroad, including in Spain and Indonesia, and a worldwide network in 12 countries, as of March 2026. In India, there are ten sales offices and six service centres, as of March 2026. The company's product range includes stainless steel slabs, blooms, coils, plates, sheets, precision strips, wire rods, rebars, blade steel, and coin blanks.

Jindal Stainless relies on its integrated operations to enhance its cost competitiveness and operational efficiency. Founded in 1970, Jindal Stainless continues to be inspired by a vision for innovation and enriching lives and is committed to social responsibility.

Jindal Stainless remains focused on a greener and sustainable future. The company manufactures stainless steel using electric arc furnace, a process that significantly reduces greenhouse gas emissions and allows for recyclability of scrap without compromising on quality.
