Eimco Elecon (India) Limited

Q2 & H1 FY27 Highlights

Vallabh Vidyanagar, Gujarat, 13th October 2026 – Eimco Elecon (India) Limited, a leading manufacturer of underground mining equipment and engineered solutions, announced its unaudited financial results for the quarter & half-year ended 30th September 2026 – **Q2 & H1 FY27**

Executive Director's Remarks

"Our performance in the second quarter of FY27 reflects the sustained momentum in our business and the effective execution of our strategic priorities. Revenue for the quarter increased to ₹57 crore from ₹33 crore in the corresponding period last year, representing strong year-on-year growth of 70.9%. This performance was driven by robust execution of our order book, supported by healthy order inflows and sustained demand across key business drivers.

This encouraging performance in the first half of the year reinforces our confidence in the underlying strength of our business and the long-term growth opportunities across the mining and infrastructure sectors.

Our EBITDA for the quarter increased by 108.8% year-on-year to ₹11 crore, with the EBITDA margin improving to 18.8%, primarily driven by an improvement in operational leverage on the back of higher revenues and better capacity utilisation, alongside disciplined cost management. PAT stood at ₹8 crore, registering a 46.5% year-on-year increase. Margins improved year-on-year, supported by better capacity utilization and efficient execution, which helped optimise other operating costs. Margins are in line with our targeted range of 18-20%. We remain focused on driving operational excellence while continuing to invest in capabilities that strengthen our competitive position and create sustainable value for our stakeholders.

Looking ahead, we remain optimistic about the demand environment, supported by ongoing infrastructure development and increased mining activity. With a healthy open order pipeline of ₹133 crore, strong customer relationships and a continued focus on innovation, quality and execution, we are well positioned to sustain our growth momentum and capitalize on the opportunities ahead."

- Kamlesh N. Shah

Executive Director, Eimco Elecon (India) Limited

About the Company

Eimco Elecon (India) Limited is a leading manufacturer of underground mining and construction equipment, delivering engineered solutions that enhance safety, productivity and operational efficiency.

Backed by a legacy of engineering excellence, the Company offers advanced mining systems, innovative battery-operated vehicles and high-performance construction equipment designed to address the evolving requirements of the mining and infrastructure sectors.

The Company's capabilities extend beyond equipment manufacturing, supported by a strong service and spares network that enables reliable after-sales support and helps customers maintain equipment performance throughout its operating lifecycle.

With a focus on product development, reliability and customer-centric solutions, Eimco Elecon continues to strengthen its portfolio and broaden its capabilities across mining and construction applications. Through continuous innovation and technology-driven development, the Company remains committed to enabling safer, more efficient and sustainable mining and infrastructure projects while creating long-term value for its customers and stakeholders.
