Now with AI Analytics

- ✓ AI-Based Diet Plans
- ✓ Automatic Trend Detection
- ✓ Personalized Health Analysis

Mumbai, INDIA - [20 June 2026] - Nureca Limited (BSE: 543264 | NSE: NURECA), the company behind leading home healthcare brand Dr Trust, today announced that its connected health platform, Dr Trust 360, has surpassed 2.4 million registered users. The milestone reflects the growing adoption of connected home healthcare and the rising demand for tools that help consumers understand and manage their health from home.

Nureca has also recently launched **Dr Trust Intelligence**, an AI-powered analytics suite within the Dr Trust 360 app. It moves beyond displaying raw readings by interpreting body-composition data in plain language, identifying meaningful trends and helping users understand whether their fitness and nutrition efforts are moving in the right direction. The company believes this depth of AI-led body-composition interpretation is differentiated among home healthcare apps available in India.

“Crossing 2.4 million registered users reflects the trust Indian families place in the Dr Trust ecosystem. Dr Trust Intelligence is designed to do more than show a number - it helps users understand what is changing, why it matters and whether their health efforts are producing results. By combining intelligent analytics with India-based data infrastructure, we are making connected preventive healthcare more useful, personal and secure.”

- Saurabh Goyal, Chairman and Managing Director, Nureca Limited

From measurement to meaningful action

Dr Trust Intelligence analyses readings from compatible 4-electrode and 8-electrode smart body-composition scales and converts them into easier-to-understand, personalized guidance. Key capabilities include:

- Plain-language interpretation of body fat, muscle mass, visceral fat and other body-composition metrics.
- Automatic detection of meaningful changes and longer-term trends based on each user's own history.
- Personalized health analysis that helps users understand progress rather than viewing isolated readings.
- AI-based diet guidance and actionable recommendations aligned with individual goals and trends.
- Clear reports that can support more informed conversations with doctors, nutritionists and fitness professionals.

Advanced 8-electrode body-composition analysis

Dr Trust's 8-electrode smart scales measure through both the hands and feet, enabling a more detailed view of body composition than conventional 4-electrode models. Company validation testing indicates up to 98% DEXA-level accuracy for selected metrics, including body fat, muscle mass and visceral fat.*

One connected health ecosystem

Dr Trust 360 brings compatible Dr Trust devices together in a single app, including smart body-composition scales, blood pressure monitors and smart kitchen scales. Users can track body composition, cardiovascular readings and nutrition-related data in one connected environment, making it easier to follow changes over time.

India-based health-data infrastructure

User health data is encrypted and stored and processed on servers located in India. This helps keep sensitive health records within Indian jurisdiction and supports the company's commitment to handling data in line with applicable Indian data-protection requirements.

Availability

Dr Trust Intelligence is available as a premium subscription within the Dr Trust 360 app on Android and iOS. Feature availability may vary by compatible device and subscription plan.

About Nureca Limited

Nureca Limited is a listed Indian home healthcare and wellness company and the parent of the Dr Trust, Dr Physio and Trumom brands. Dr Trust is recognized as one of India's leading home healthcare brands, with more than 1.86 crore customers and a broad portfolio of devices and connected health solutions designed for use at home.
