Dear Sir/Madam,

Subject: Press Release

Pursuant to applicable provisions of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, as amended, (“SEBI Listing Regulations”) please find enclosed press release of the Company announcing that **“Coforge Advances AI-Powered Vehicle Lifecycle Intelligence.”**

We request you to take the above on record.

For Coforge Limited

**Barkha Sharma
Company Secretary & Compliance Officer**

Encl.: As above

Coforge Advances AI-Powered Vehicle Lifecycle Intelligence

Princeton, NJ, USA | Greater Noida, India | September 20, 2026 – Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced expanded capabilities that help automotive lenders, fleet operators, and remarketing organizations transform vehicle inspections into AI-powered lifecycle intelligence, enabling faster and more informed business decisions throughout the remarketing process.

When a vehicle is returned, organizations often lack a trusted view of its condition, delaying critical decisions around repair, certification and resale. The solution creates a single, trusted vehicle condition report that brings together vehicle history, inspection data, operational context, and evidence from multiple enterprise systems.

The solution assembles information including VIN, mileage, maintenance history, and return data before inspections begin. During the inspection process, standardized workflows capture 360-degree condition evidence, assessments and wear. The result is a trusted digital record that can be used throughout the vehicle lifecycle.

"Vehicle inspections should not end with documentation. They should create intelligence that powers every downstream decision," **said Niraj Patel, Senior Vice President, Coforge.** "By creating a trusted condition record, organizations can make faster, more confident decisions about repair, certification, routing, and remarketing."

The solution is already operating at scale and supporting more than 60,000 vehicles annually. By transforming inspection data into actionable intelligence, Coforge helps clients reduce delays and optimize vehicle remarketing outcomes.

About Coforge

Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes—lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
