PRESS RELEASE

Infosys Foundation Collaborates with Madras Medical College to Strengthen Cardio-Obstetric Care for Pregnant Women

Sets up a cardio-obstetric outpatient unit and state-of-the-art catheterization laboratory at the Rajiv Gandhi Government General Hospital, in Chennai

Bengaluru, India – September 9, 2026: Infosys Foundation, the philanthropic and CSR arm of Infosys, today announced the inauguration of an exclusive cardio-obstetric outpatient unit and a state-of-the-art cardio obstetric catheterization laboratory at the Institute of Cardiology at the Rajiv Gandhi Government General Hospital (RGGGH), in Chennai, which is run by the Madras Medical College (MMC). These two units will help strengthen the cardio-obstetric care at RGGGH and help alleviate maternal mortality caused by heart-related diseases.

The inauguration ceremony was graced by **Dr. K. G. Arunraj, Hon'ble Minister for Health, Medical Education and Family Welfare, Government of Tamil Nadu; Dr. Darez Ahamed, IAS, Secretary to Government, Health and Family Welfare Department, Government of Tamil Nadu; Dr. K. Shantharaman, Dean, Madras Medical College (MMC) and Rajiv Gandhi Government General Hospital (RGGGH), Chennai; and Mr. Anil Kumar P. N., Senior Vice President and Center Head, Chennai, Infosys**, along with senior officials and executives from MMC and RGGGH.

This initiative is part of a broader collaboration between Infosys Foundation and MMC, which runs multiple healthcare facilities in Chennai, including the Institute of Social Obstetrics and the Government Kasturba Gandhi Hospital for Women and Children. In August 2024, Infosys Foundation inaugurated a special facility at the Institute of Social Obstetrics that is equipped with a high-risk antenatal ward and other critical care facilities to address cardiac complications among pregnant women.

Infosys Foundation has given a grant of over INR 31 crore to help strengthen MMC’s cardio-obstetric care facilities across its hospitals. In addition, the grant will also contribute towards managing patients under MMC’s internationally acclaimed research program – the National Pregnancy and Cardiac Diseases (NPAC) study, the largest global single-center study on pregnancy-related heart disease, and the Tamil Nadu Pregnancy and Heart Disease Registry (TNPHDR), which is the largest registry in this world in this domain. The main objective of this study is to develop a care protocol for heart disease in pregnancy and evaluate its effectiveness in improving pregnancy outcomes.

Sunil Kumar Dhareshwar, Trustee, Infosys Foundation, said, “Infosys Foundation is committed to addressing healthcare challenges and enabling initiatives towards the care and support for women’s health.

With the inauguration of these units at the Rajiv Gandhi Government General Hospital, we aim to enhance maternal care by addressing the rising concern of cardiac complications during pregnancy. Our support not only aims to reduce maternal mortality but also contributes to research that will drive better healthcare solutions for women across the country."

Dr.K. Shantaraman, Director and Dean of Madras Medical College (MMC), said, "We thank Infosys Foundation for their steadfast support in helping us scale the cardio-obstetric care for pregnant women across our facilities. The new units at the Rajiv Gandhi Government General Hospital, will further establish MMC as a national and international leader in maternal healthcare and research, offering innovative care models to address emerging healthcare challenges."

About Infosys Foundation

Established in 1996, Infosys Foundation supports programs in the areas of education, healthcare, women empowerment, and environmental sustainability, amongst others. Its mission is to work with the underprivileged across the country and strive towards a more equitable society. Infosys Foundation takes pride in working with all sections of society, selecting projects with infinite care, and working in areas that are traditionally overlooked by society at large.
