Press Release
Noida, 19 November, 2026

MSAFE EQUIPMENTS LAUNCHES ALUMINIUM FORMWORK SOLUTIONS AT ACETECH MUMBAI, MARKING A STRATEGIC MILESTONE IN ITS GROWTH JOURNEY

Noida, India | 19 November 2026 – MSAFE Equipments Limited (BSE: 544695), an integrated scaffolding, access and structural equipment solutions company, today announced its participation in ACETECH Mumbai 2026, Asia's largest architecture, building materials and design exhibition. The four-day event will be held **from 19 to 22 November 2026 at the Bombay Exhibition Centre (NESCO), Goregaon, Mumbai.**

The highlight of MSAFE's presence at **Hall 3, Stall No. G26 & G27** will be its **Aluminium Formwork Solutions**, the Company's newest business vertical. ACETECH will serve as one of the major industry platforms where MSAFE showcases this new offering to developers, contractors and other industry stakeholders, alongside its established portfolio of **Aluminium Scaffolding, MS Scaffolding and FRP Ladders.**

About Aluminium Formwork

Aluminium formwork is a modern construction system made up of lightweight, aluminium panels and components that are assembled on site to form moulds for concrete. It allows walls, slabs, columns and beams to be cast together in a single, monolithic pour, replacing conventional timber and plywood shuttering with a precise, engineered and reusable system.

The system supports faster and more predictable floor cycles, a smooth concrete finish that reduces the need for plastering, lower dependence on manual labour, and strong, consistent structures. Since the same set of panels can be reused many times across floors and projects, it is particularly well suited to high-rise buildings, mass and affordable housing, and large-scale real estate and infrastructure developments.

Visitors to the stall will have the opportunity to experience the formwork components first-hand and **interact with the MSAFE team including Management** to discuss their specific project requirements. Meetings during the exhibition can also be scheduled by writing to cs@msafegroup.com.

Why ACETECH

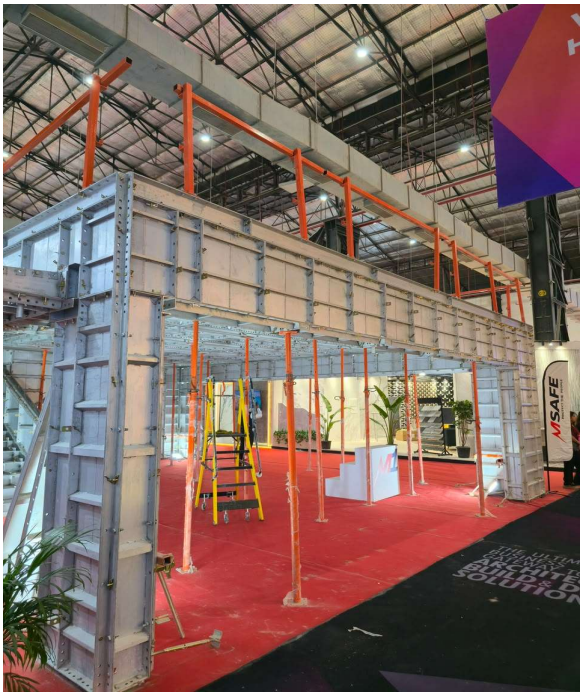

ACETECH brings together architects, real estate developers, contractors, EPC companies and consultants from across India and abroad, the very audience that is driving the shift towards faster and more mechanised construction methods. For MSAFE, it is the right platform to introduce its aluminium formwork offering, build new relationships and gather feedback.
