Shailesh Haribhakti launches JAANO, an open learning platform with a conversational AI avatar

Developed by Alan Scott LearniX Limited, a Group company of Alan Scott Enterprises Limited, JAANO brings together 58 curated sources across nine subjects with an AI learning guide informed by Shri Haribhakti's thinking and more than 35 years of corporate experience

Mumbai – 23rd November, 2026: Alan Scott Enterprises Limited (ALANSCOTT, BSE: 539115) today announced that Shri Shailesh V. Haribhakti, Group Chief Mentor, has launched JAANO, a web-based learning platform developed by Group company Alan Scott LearniX Limited. JAANO helps students, educators, entrepreneurs and professionals explore developments in science, technology and society by combining a free, searchable collection of original sources curated by Shri Haribhakti with a conversational AI guide that helps users ask questions, connect ideas and find material for further reading.

Key Highlights:

- **Platform:** JAANO, a web-based open learning app – www.jaano.tech
- **Developed by:** Alan Scott LearniX Limited
- **Catalogue:** 58 curated sources across nine subjects, including artificial intelligence, cybersecurity, robotics, sustainability and energy, space science, health and medicine, and governance
- **Sources include:** ISRO, NASA Science, Quanta Magazine, Our World in Data and the International Energy Agency
- **Formats:** Articles, podcasts, videos, research reports and public datasets
- **Access:** Catalogue free to browse; three free questions for registered users; optional ₹1,000 guide pass for up to 200 questions over one year; separate voice pass

Why JAANO Matters for Learners in India:

Finding a reliable starting point can be difficult when a subject is unfamiliar. JAANO gives learners a place to begin, whether they are exploring a topic for a class, for work or out of curiosity. A student following Chandrayaan can find mission updates from ISRO and discoveries from NASA and the Webb Space Telescope; a teacher preparing a lesson on clean energy can find electricity data and public research reports; and a young professional interested in AI can start with essays and interviews by researchers in the field.

How the AI Learning Guide Works:

Users can ask the JAANO Learning Guide for an explanation, a connection between topics or a suggestion on what to read next. The guide draws on the curated collection and points users back to the original sources. It is built on QIML technology developed in India by Dr. Jitesh Jain at Alan Scott LearniX and Qubiverse Labs. With the optional voice pass, users can hear answers in an AI-generated recreation of Shri Haribhakti's voice.

Commentary

Shri Shailesh V. Haribhakti said, "Hyper personalised learning on the move is now a reality. Conflated with all other information sources, it is an unmatched Learning and Development interface. Jeeto Jaano!"

The People Behind JAANO:

- **Shri Shailesh V. Haribhakti**, founder of JAANO, is a chartered and cost accountant whose career spans corporate governance, board leadership and sustainability. He curated the collection to share the sources and ideas that have informed his own learning.
- **Dr. Jitesh Jain**, a quantum physicist and AI architect, is the founder and Managing Director of Alan Scott LearniX Limited, which designed and developed JAANO and its conversational AI avatar.

- **Shri Sureshkumar P. Jain**, Managing Director & CEO of Alan Scott Enterprises Limited, is a chartered accountant and entrepreneur with extensive experience in capital markets and financial services. He conceived the AI avatar of Shri Haribhakti and the formation of JAANO.
