Sub:Rhetan TMT Successfully Completes Testing and Commissioning of 1 MW Captive Solar Power Project; Commercial Power Generation to Commence Shortly

Ref:Disclosure under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, and in continuation of our earlier communication dated July 27, 2026.

Dear Sir/Madam,

In continuation of our disclosure dated July 27, 2026, the Company is pleased to inform the shareholders and the stock exchanges that the testing and commissioning activities of its 1 MW (AC) Captive Ground-Mounted Solar Power Project have been successfully completed.

With the successful completion of all commissioning activities, the project has now achieved operational readiness, marking the culmination of the Company's renewable energy initiative. The project has successfully progressed through every stage of implementation—from statutory approvals and infrastructure development to installation, testing and commissioning—and is now fully prepared for commercial operation.

The Company expects commercial power generation from the solar power project to commence shortly, following the completion of the remaining operational formalities, if any.

With power costs representing approximately 20% of the Company's overall cost base, the commencement of captive solar power generation is expected to have a positive impact on operational economics by providing a stable and cost-efficient source of energy. The project is expected to enhance operational efficiency, improve cost competitiveness and further strengthen the Company's commitment to sustainable manufacturing practices.

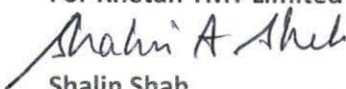

The Company shall keep the Stock Exchanges informed of any further material developments in this regard.

Kindly take the above information on record.

Thanking you.

Yours faithfully,

For Rhetan TMT Limited

Shalin Shah
Managing Director
