Press Release

Dear Sir/Madam,

Please find enclosed herewith the Press release issued by the Company with regard receipt of work order from **East India Udyog Ltd**, A/c Uttarakhand Power Corporation under **Ganga Corridor RDSS scheme** for supply and installation and FMS of RTUs, FRTUs, FPIs, SCADA-OMS-DMS infrastructure.

You are requested to take the same on your records.

Thanking You.

Yours Faithfully,

For **Sharika Enterprises Limited**,

Pushpa Yadav

Sharika Enterprises Enters High-Growth SCADA-ADMS Market with Uttarakhand Grid Modernization Project

Wins Strategic Role in UPCL's Ganga Corridor Smart Distribution Initiative under RDSS

Noida, 2nd June 2026: Sharika Enterprises Limited, a leading provider of power sector and smart infrastructure solutions, has secured a key subcontract for the deployment of an Advanced Distribution Management System (ADMS) under Uttarakhand Power Corporation Limited's (UPCL) flagship Ganga Corridor power distribution modernization project. The project is being executed under the Government of India's Revamped Distribution Sector Scheme (RDSS) through **East India Udyog Limited (EIUL)**, the lead contractor.

The project spans the important urban centres of **Dehradun, Haridwar, and Rishikesh**, and is aimed at transforming the region's power distribution network through the implementation of an integrated **SCADA-ADMS platform**, combining Supervisory Control and Data Acquisition (SCADA), Distribution Management System (DMS), and Outage Management System (OMS) functionalities.

The award marks **Sharika's strategic entry into India's rapidly expanding SCADA-ADMS market**, a critical segment driving the digital transformation of the country's power distribution sector. Leveraging advanced grid automation and intelligent network management technologies, Sharika will contribute to building a smarter, more resilient, and highly responsive electricity distribution ecosystem.

The integrated solution is expected to provide utilities with real-time network visibility, intelligent monitoring and control, faster fault identification and restoration, enhanced outage management, and improved operational efficiency. The project will also strengthen grid reliability, improve power quality, optimize asset utilization, and support data-driven decision-making for utility operators.

As Indian utilities accelerate investments in digital infrastructure and smart grids, SCADA-ADMS platforms are emerging as the backbone of next-generation distribution networks, enabling higher efficiency, reliability, and consumer service standards.

Commenting on the development, **Mr. Sanjay Verma, CEO, Sharika Enterprises Limited**, said:

"This project represents a significant milestone for Sharika as we formally enter the SCADA-ADMS segment, one of the fastest-growing areas in India's power sector modernization journey. The award reflects our growing capabilities in grid automation, digital utility solutions, and smart infrastructure. We are committed to supporting utilities in building intelligent, resilient, and future-ready distribution networks that align with India's energy transition and digital transformation goals."

Sharika acknowledged the support and confidence extended by **East India Udyog Limited (EIUL)** and **Spin Engenharia, Brazil**, Sharika's technology partner in developing its indigenous ADMS platform under the Government of India's '**Make in India**' initiative.

With increasing participation in utility automation, smart grids, communication networks, substation modernization, renewable energy integration, and advanced distribution technologies, Sharika continues to strengthen its position as a trusted partner in India's evolving energy infrastructure landscape.

About Sharika Enterprises Limited

Sharika Enterprises Limited is a technology-driven company delivering integrated solutions across the power sector. The company's expertise spans transmission and distribution systems, substation automation, smart grids, communication networks, grid digitalization, renewable energy integration, and advanced energy infrastructure solutions, supporting utilities and industries in building reliable, efficient, and sustainable power systems.
