Dear Sir/Madam,

Subject: Intimation under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulation, 2015 - Press Release

We are enclosing a copy of the press release titled “GK Energy Receives Rooftop Solar Installation Empanelment for 1,00,000 Households”.

The said information will also be uploaded on the website of the Company www.gkenergy.in.

You are requested to kindly take the above information on your records.

Thanking you,

By order of Board of Directors

GK Energy Receives Rooftop Solar Installation Empanelment for 1,00,000 Households

Pune, 27th August, 2026: GK Energy Limited (“GK Energy” or the “Company”) (BSE: 544525 | NSE: GKENERGY), India's largest decentralized renewable energy infrastructure Company specializing in solar infrastructure deployment across India, the Company has announced that it has received a Letter of Empanelment (“LOE”) from a leading State Government-owned power distribution utility for Grid Connected Rooftop Solar Photovoltaic Projects.

Under the empanelment, the Company has been allocated 1Kw rooftop solar capacity to be installed across 1 lakh households, with combined capacity of 100 MW and contract value of approximately ₹454.50 Crore including GST. With this the Company has already received allocation/empanelment of more than ₹1,092 Crores (including GST) since 1st April, 2026 till date.

As part of the project scope, GK Energy will undertake design, engineering, supply, installation, testing and commissioning of the rooftop solar systems, along with O&M for a period of five years. The projects are to be completed within 60 days from the issuance of the respective work orders.

For GK Energy, this development expands its presence in the rooftop solar segment and builds on its experience in executing decentralized solar projects. The Company will leverage its existing execution capabilities and on-ground network for implementation of these projects.

Commenting on the same, Mr. Gopal Kabra, Chairman, Managing Director & CEO, GK Energy Limited, said:

“This empanelment marks an important step in expanding our presence in the rooftop solar segment and taking clean energy solutions to a wider base of households. Our experience in executing decentralized solar projects across multiple locations provides us with the capabilities and on-ground reach required to undertake projects of this scale.

India's transition towards renewable energy is creating significant opportunities for distributed solar solutions, with rooftop solar playing an important role in bringing clean energy closer to 1,00,000 households. Through this project, we look forward to contributing to the country's renewable energy goals by enabling greater adoption of solar energy at the household level.

As we move forward, our focus will remain on timely execution, service quality and expanding our capabilities across decentralized renewable energy solutions."

About GK Energy

GK Energy Limited is one of India's leading decentralised renewable energy infrastructure execution companies focused on solar-powered agricultural pumping systems, rooftop solar systems, and distributed clean energy solutions.

Founded in 2008, the Company operates through a technology-defined and low-capex business model supported by an extensive OEM/ODM manufacturing ecosystem, decentralised logistics infrastructure, and one of the sector's largest field execution networks. GK Energy's operating architecture enables scalable deployment of renewable energy systems across rural and distributed markets without heavy manufacturing capital intensity.

The Company till June 2026 has cumulatively installed more than 164,500 renewable energy systems and commissioned over 726 MW of renewable energy capacity across India, with operational presence spanning 7,500+ villages. Its execution capabilities are supported by dedicated warehousing infrastructure, logistics capabilities, and a large network of installation and commissioning partners across multiple states.

GK Energy primarily operates across solar-powered agricultural pumping systems, rooftop solar systems, distributed renewable infrastructure, and emerging clean energy segments aligned with India's long-term energy transition and sustainability goals.
