- **EBITDA** was at **Rs. 40.72 crore** in H1 FY27 as against Rs. 36.05 crore in H1 FY26, YoY growth of 12.93%
- **Profit after Tax** was at **Rs. 14.55 crore** in H1 FY27
- Basic EPS stood at **Rs. 0.77** in H1 FY27

Management Comment:

Commenting on the results, **Mr. Harpreet Singh Nibber, Chairman & Managing Director, Pritika Auto Industries Limited said:**

"We are pleased to report a strong performance for the second quarter and first half of FY27, with sustained growth in production volumes and revenue reflecting the continued momentum across our business. During Q2 FY27, our production volumes increased by 21.61% year-on-year to 15,665 tonnes, while net revenue grew by 31.55% to ₹153.19 crore. For H1 FY27, production volumes rose by 18.86% to 30,033 tonnes, translating into a 29.04% year-on-year increase in net revenue to ₹298.16 crore. This performance reflects healthy customer demand, improved execution and our continued focus on scaling operations.

Our operating performance also remained resilient, with EBITDA increasing by 13.97% year-on-year to ₹21.21 crore in Q2 FY27 and by 12.93% to ₹40.72 crore in H1 FY27. EBITDA margins, however, continued to be impacted by elevated input costs and the evolving product mix. We remain focused on cost optimisation, operational efficiencies and improving realisations to support a gradual improvement in our profitability profile. Encouragingly, our EBITDA margin improved sequentially to 13.85% in Q2 FY27 from 13.45% in Q1 FY27.

On the business front, we continue to deepen our engagement with established customers while pursuing opportunities with global manufacturers. In a significant development, our subsidiary, Pritika Engineering Components Limited, has secured a high-value export order from a prominent European precision-engineering manufacturer based in Italy. Under this order, the Company will manufacture and supply specialised engineering components. This order marks an important breakthrough in our high-precision machined casting exports and reflects the global recognition of our metallurgical capabilities, advanced

CNC/HMC machining infrastructure and stringent quality standards, including specialised radiography and 3D precision scanning. We believe this engagement will provide a strong foundation for recurring, margin-accretive international business and further strengthen our participation in global supply chains.

In addition, our earlier announced order from KION USA represents an important step in strengthening our international customer relationships. We are happy to inform that product has been approved by the customer and regular production is expected in year 2027-28. We also continue to build on repeat and incremental business from established customers, including Mahindra & Mahindra Swaraj and CNH Industrial, reflecting their confidence in our manufacturing capabilities, product quality and delivery performance.

The broader automotive industry is undergoing a significant transformation, with evolving requirements across conventional, electric and hybrid mobility platforms. We believe our engineering capabilities, manufacturing experience and established customer relationships position us to address the changing requirements of the industry and participate in emerging opportunities. The recent export order also reinforces our ability to leverage our precision engineering and manufacturing capabilities across specialised industrial applications. We will continue to focus on customer diversification, product development and strengthening our presence across domestic and international markets.

As we move into the second half of FY27, our priorities remain centred on sustaining volume growth, improving capacity utilisation, enhancing operational efficiencies and maintaining a disciplined approach to costs and working capital. With a growing production base, long-standing customer relationships and opportunities to expand our international presence, we remain focused on building a stronger and more scalable business.

I would like to thank our employees for their continued commitment and contribution, and express my gratitude to our customers, business partners and shareholders for their trust and continued support."

About Pritika Auto Industries Limited:

Pritika Auto Industries Ltd. is a flagship company of the Pritika Group of Industries which was set up in 1974 by Mr. Raminder S. Nibber, manufacturing small forgings. Over the last five decades and under Mr. Nibber's visionary leadership, the Company has established itself as a robust and reliable brand in its market, specializing in machined castings and automotive components. A quality driven organization, Pritika produces world class components from modern facilities. Pritika has manufacturing facilities situated at Dera bassi, Hoshiarpur and Mohali (Punjab), and Tahliwal, Una (Himachal Pradesh) with a total capacity of over 72,000 metric tons per annum (MTPA).

Catering primarily to tractors and commercial vehicles, Pritika focuses on expanding and diversifying its product portfolio. The Company manufactures a wide range of products such as axle housings, wheel

housings, hydraulic lift housings, end cover, plate differential carrier, brake housings, cylinder blocks, and crank cases, among others. Pritika is one of the biggest component suppliers in the tractor segment of the automobile industry in India and supplies to OEMs like M&M Swaraj, Swaraj Engines Ltd, TAFE, Escorts, SML, Mahindra, TMTL, Ashok Leyland, New Holland Tractors India Ltd., Brakes India etc. The Company's vision is to provide products which meet customer's quality requirement constantly at competitive prices.
