PRESS RELEASE

Orient Technologies Expands Cybersecurity Business with USD 3.15 Million, Three-Year Securonix Contract; Total Investment to Reach Approximately USD 5 Million

Additional investment to support ~100 cybersecurity hires, partner enablement and a targeted 12% expansion in Orient's cybersecurity customer base

Mumbai, September 10, 2026: Orient Technologies Limited is going ahead with the expansion of its cybersecurity business following the signing of a USD 3.15 million, three-year contract with Securonix, with additional investments planned as the business scales, taking the total investment to approximately USD 5 million over the course of the expansion. Under the strengthened relationship, Orient will take on an expanded mandate as Securonix's exclusive Value-Added Distributor (VAD) and joint go-to-market partner in India, while building capabilities across implementation, professional services, technical support, managed security and SOC enablement.

This arrangement will strengthen Orient Technologies' cybersecurity business by combining technology, implementation, professional services, technical support, managed security and SOC enablement across the security lifecycle. Building on Orient Technologies' experience as a Securonix Managed Security Service Provider (MSSP), the expanded mandate will see Orient lead distribution and joint go-to-market initiatives in India, enable regional partners and support enterprise deployments and integrations.

Orient Technologies has signed a USD 3.15 million contract with Securonix for three years for its cybersecurity business. Additional investments are planned as the business scales, taking the total investment to approximately USD 5 million over the course of the expansion, alongside plans to hire around 100 cybersecurity professionals and target 12% growth in its customer footprint. Together, these initiatives will create an end-to-end cybersecurity model spanning technology adoption, implementation and ongoing security operations.

Speaking on the partnership, **Ajay Sawant, Chairman & Managing Director, Orient Technologies Limited**, said,

“Our expanded relationship with Securonix represents the next stage of Orient's cybersecurity journey. What began as a managed security relationship is evolving into a broader engagement spanning distribution, implementation, professional services and security operations. The contract and planned investments reflect our commitment to building the talent, capabilities and partner ecosystem required to scale this business."

The opportunity is not simply to take another cybersecurity technology to market. It is to help enterprises translate security investments into sustained resilience. By combining Securonix's AI-powered platform with Orient's implementation expertise and managed security capabilities, we intend to support customers across the security lifecycle from deployment and integration to ongoing security operations..”

Enterprise security environments are becoming increasingly complex as organizations manage expanding digital ecosystems alongside evolving cyber threats. This is creating a greater need for security models that connect technology investments with the expertise required to deploy, operate, optimize and sustain them.

Orient Technologies aims to address this requirement by building an integrated security ecosystem around the Securonix platform.

“AI is changing the operating environment for security teams on both sides of the equation. Adversaries have access to tools that can help them move faster, while enterprises are under pressure to use AI responsibly to improve their own defenses,” said ***Toby Weiss, CEO, Securonix****. “Our expanded partnership with Orient Technologies gives customers in India access to Securonix technology alongside the local expertise required to deploy it effectively, integrate it into existing environments, and build security operations that can evolve as those threats change.”*

The expanded relationship reinforces cybersecurity as a key component of Orient Technologies’ broader enterprise technology portfolio and its focus on helping organisations build secure, resilient environments for evolving business needs.

As part of the strengthened relationship, Orient Technologies is also certified and authorized to sell Securonix solutions in India and the United States, further extending the scope of the collaboration.

About Orient Technologies Limited

Founded in 1997, Orient Technologies Limited is an India-headquartered enterprise technology solutions and services company. The Company provides a broad portfolio of technology capabilities spanning Cybersecurity, Cloud Services, Digital Transformation, Data Center Solutions, End User Computing and Infrastructure Management Services.

Headquartered in Mumbai, Orient Technologies serves organizations across banking and financial services, pharmaceuticals and healthcare, manufacturing, government, mid-market businesses, media and communications, real estate and ITeS.

About Securonix

Securonix is transforming security operations with the industry's first Unified Defense SIEM with Agentic AI, built to decide and act across the threat lifecycle with a human-in-the-loop philosophy. Its cloud-native platform unifies detection, investigation, and response, while enabling Sam, the AI SOC Analyst, and a productivity-based AI operating model for the SOC, so organizations can measure and govern AI by the analyst work it delivers. Helping enterprises become Breach Ready and Board Ready, Securonix delivers accountable, outcome-driven security operations at scale. Recognized as a Leader in the Gartner® Magic Quadrant™ for SIEM and a Customers' Choice by Gartner Peer Insights™, Securonix delivers trusted security operations for global enterprises.
