Mr. K R Anandan shall be relieved from the position of Chief Financial Officer w.e.f. 23rd May 2026 and shall continue as a Whole-Time Director and Key Managerial Personnel of the Company.

**Leadership Comment:**

**Mr. Ashwin Muthiah, Chairman - SPIC** said: "This quarter's results highlight our strong operational discipline. Even though sales were lower than the corresponding period last year, and despite a little over 2 weeks of plant shutdown for scheduled maintenance, we delivered a significant increase in profits through efficient cost control and prudent raw-material sourcing.

Our continued focus on natural gas and environmentally friendly practices is strengthening our sustainability-led manufacturing. In line with the Government's policies, we remain committed to earth-friendly fertilizers. We continue to support Indian farmers and contribute to the nation's food-security goals. With global geopolitical uncertainties persisting, we continue to closely monitor the situation on a regular basis."

**Fertilizer sector overview:**

In Q4 FY26, India's fertilizer sector faced input cost stress owing to multiple factors including rising phosphate prices, China's sulphur-related export restrictions, West Asia supply disruptions, and subsidy uncertainty. While NPK fertilizer volumes are expected to rise, overall DAP complex fertilizer expansion will be subdued, though a gradual recovery is foreseen.

In FY26, India's fertilizer production within the Index of Eight Core Industries recorded its weakest annual growth in 13 years, contracting 0.1 per cent year-on-year (Y-o-Y). The moderation is attributed to LNG shortages and plant shutdowns.

Continued geopolitical tensions in West Asia could have a cascading impact on both energy supplies and fertiliser availability, which are critical for agricultural output.
