Subject: Submission of Press Release of Silver Touch Technologies Limited.

Respected Sir/ Madam,

We hereby enclose the Press Release, titled “**Silver Touch Technologies Wins AI-Native DPR Appraisal Platform Order from RITES Limited, a Navratna Government Enterprise**”.

The above intimation will also be made available on company’s website i.e. <https://www.silvertouch.com>.

Kindly take the above intimation on the record.

Thanking you,
Yours Faithfully,

FOR SILVER TOUCH TECHNOLOGIES LIMITED

RAHUL ADVANI
COMPANY SECRETARY & COMPLIANCE OFFICER

Encl: As above

Silver Touch Technologies Limited

Silver Touch House, Opp. Suryarath Complex, Nr. White House, Panchavati Circle, Ellis Bridge, Ahmedabad 380006, Gujarat, India.

Business Update Release

Silver Touch Technologies Wins AI-Native DPR Appraisal Platform Order from RITES Limited, a Navratna Government Enterprise

Company to build India's first self-hosted, multi-model AI platform for infrastructure project appraisal
Establishes Silver Touch's leadership in AI for national infrastructure governance

Ahmedabad, 07th July, 2026: Silver Touch Technologies Limited, a leading digital transformation and IT services company, has been awarded a significant order by **RITES Limited** (A Government of India Navratna Enterprise under the Ministry of Railways) for the **Design, Development, and Implementation of PARAKH — an AI-Based Detailed Project Report (DPR) Appraisal & Intelligence Platform**.

"Silver Touch becomes **one of the first Indian IT companies** to deploy a fully self-hosted, **multi-model AI platform for a Government of India Navratna enterprise** — marking its transition from an IT services company to an AI-native platform company."

"With PARAKH, Silver Touch now owns a referenceable, production-grade AI platform capability **in India's ₹111 lakh crore infrastructure sector** — a domain moat that deepens with every DPR the platform processes."

"Silver Touch to power **RITES' AI brain** for appraising India's largest infrastructure projects — **railways, highways, bridges, ports, airports, metro, and tunnels.**"

Building India's First AI-Native Infrastructure Appraisal Platform

Under this engagement, Silver Touch will architect and deploy a purpose-built AI platform — not a conventional software application with AI features added as an overlay, but a **ground-up AI-native system** designed to transform how India's largest infrastructure consultancy appraises Detailed Project Reports. The platform incorporates:

- Three Self-Hosted Large Language Models (Llama 3.1 70B, Mistral 7B, Qwen 2.5 7B) deployed on NVIDIA A100 GPU infrastructure within RITES' secure data centre — with zero external data egress
- 500+ Codified Engineering Validation Rules drawn from IRC, RDSO, IS, and MORTH standards — delivering deterministic, auditable checks that complement AI intelligence
- Hybrid Retrieval-Augmented Generation (RAG) combining semantic vector search with keyword search across 1,000+ historical DPRs for grounded, citation-backed appraisal
- Four-Layer Hallucination Prevention Framework ensuring every AI-generated insight is citation-mandatory, source-verified, confidence-scored, and human-approved
- Document Intelligence Pipeline processing DPRs of 500 to 5,000 pages with OCR, table extraction, and engineering entity recognition
- GIS Integration with PM GatiShakti National Master Plan, BIM/IFC interoperability, and geospatial analytics
- Multi-Sector Knowledge Graph linking engineering parameters, standards, and validation rules across eight infrastructure domains
- Enterprise-Grade Security with Keycloak IAM, AES-256 encryption, mTLS service mesh, and OWASP Top 10 + LLM-specific security compliance

Significance of the Order

This order is significant for Silver Touch Technologies on multiple dimensions:

AI Leadership, Not AI Integration: Unlike conventional IT projects where AI is an add-on feature, PARAKH is an AI-native platform where artificial intelligence is the core value proposition. The deployment of three self-hosted open-source LLMs with a purpose-built inference pipeline positions Silver Touch among the very few Indian IT companies to deliver a fully self-hosted, multi-model AI platform for a Government of India Navratna enterprise. This is not a pilot or a proof-of-concept — it is a production-grade, mission-critical AI system.

Domain Moat in AI for Infrastructure: The 500+ codified engineering rules, sector-specific ontologies, and historical DPR knowledge base constitute proprietary domain intelligence that deepens with every DPR processed. This creates a compounding competitive advantage — the more DPRs the platform appraises, the more accurate its benchmarking, anomaly detection, and validation become.

Commenting on the order, Mr. Minesh V Doshi, Executive Director of Silver Touch Technologies Limited, said:

"We are honoured to partner with RITES Limited in building what we believe is India's most advanced AI-native infrastructure intelligence platform. PARAKH is not just a technology project — it is a testament to Silver Touch's capability to engineer genuine, production-grade AI systems for mission-critical national applications. The platform deploys self-hosted Large Language Models, a 500-rule engineering validation engine, and a four-layer hallucination prevention system — all within RITES' secure infrastructure with zero external data dependency. We believe this establishes Silver Touch as a pioneer in AI for infrastructure governance, and we look forward to extending this capability across India's infrastructure ecosystem."

The order has been secured through the Government e-Marketplace (GeM) portal following a competitive Quality and Cost-Based Selection (QCBS) evaluation, underscoring the Company's technical and commercial competitiveness.

About Silver Touch Technologies Ltd:

Silver Touch Technologies Limited is a leading publicly listed IT and digital transformation company headquartered in Ahmedabad, India. With a strong presence across India, the UK, the US, and Canada, Silver Touch specializes in e-Governance, Cloud, SAP, AI/ML, and Cybersecurity solutions. The Company has successfully executed numerous national and state-level digital transformation initiatives supporting public service delivery, transparency, and innovation.
