1See — Compliance Intelligence Platform

Advancing Compliance Through Real-Time Intelligence · By Satrix

1See unifies security Governance, Risk & compliance (GRC) into a single platform — enabling continuous visibility and control across your entire digital environment.

Compliance today is fragmented and reactive. 1See changes that.

- See** Centralized visibility across systems and risk
- Understand** Real-time, contextual intelligence at every layer
- Act** Automated, decisive response to risk

HOW 1SEE WORKS

KEY CAPABILITIES

- Unified Visibility**
Single pane of glass across all compliance and security controls
- Real-Time Dashboards**
Instant view into risk posture, gaps, and control effectiveness

- Continuous Monitoring**
Always-on compliance tracking — never reactive again
- Regulatory Alignment**
Built-in frameworks: ISO, NIST, SOC2, GDPR, PCI-DSS, DPDPA

Founder's Message

Sachhin Gajjaer · Managing Director & Founder

We are building a centralized model. One that aligns cybersecurity, compliance, and infrastructure into a single system of control.

At Satrix, we believe this is the gap that matters. Security and compliance cannot sit on the side. They must be built into the core of how modern digital environments are designed and operated.

Because the challenge is not just protecting systems. It is governing them at scale.

Transparency and trust our core values for our investors and stakeholders.

We did not build Satrix to add another layer of security.

Sachhin Gajjaer

Managing Director & Founder,
Satrix Information Security
