HCLTech Launches HCLTech Pulse to Accelerate AI-Led Transformation for Fast-Scaling Enterprises

Dedicated business unit will help enterprises with annual revenues between $500 million and $5 billion safely scale AI, modernize their technology foundations and accelerate growth

NEW YORK and NOIDA, India, September 17, 2026 — HCLTech, a leading global technology company, today announced the launch of HCLTech Pulse, a dedicated business unit focused on helping enterprises with annual revenues between $500 million and $5 billion safely scale AI, modernize their technology foundations and accelerate growth.

HCLTech Pulse is designed for organizations with enterprise-scale ambitions that have historically had to stitch together niche providers across strategy, platforms, implementation and operations. It helps clients move beyond isolated AI initiatives by connecting AI strategy, data, cyber, platforms, engineering and business-process transformation into a single, integrated transformation agenda.

"This segment represents an approximately $400 billion global technology-services opportunity and is growing at 7–9% annually," said Peter Bendor-Samuel, Founder and Executive Chairman, Everest Group. "As these organizations move from AI experimentation to scaled deployment, the market will reward providers that combine deep technology expertise with industry context and an integrated delivery model."

"AI is rewriting the economics of growth. The real advantage goes to enterprises bold enough to reimagine their processes from the ground up, not just automate what already exists, and to do it safely and responsibly," said C Vijayakumar, CEO and Managing Director, HCLTech. "HCLTech Pulse combines our AI, engineering, cyber, data and industry expertise to help enterprises rethink how work gets done and turn AI investment into measurable business value."

"HCLTech Pulse is our response to a clear, unmet need," said Ashish Kumar Gupta, Global Head, New Business Incubation Group, HCLTech. "HCLTech serves many clients at this stage of scale and understands that the greatest value comes from bringing the right focus, senior attention and platform investments to each client's priorities. HCLTech Pulse brings a sharp focus to simplifying transformation and accelerating time to value, so these organizations can pursue their ambitions with a single, accountable partner."

HCLTech Pulse extends the company's full portfolio, long trusted by the world's largest enterprises, with a delivery model purpose-built for this segment. The unit will focus on high-priority transformation opportunities, including AI strategy and implementation rooted in safety and responsible AI, data and AI platforms, cloud transformation, application and enterprise-platform modernization, cybersecurity, engineering services and managed services.

Through this integrated approach, HCLTech Pulse will help clients develop the capabilities required to adopt AI safely, with greater speed, confidence and governance, and build sustained competitive advantage.
