MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Global Economy

The global economy has held up better than many expected. The IMF's latest estimates put 2025 growth at around 3.2%, easing only slightly to 3.1% in 2026, helped along by front-loaded trade activity ahead of tariff changes, softer effective tariff rates, and easier financial conditions in several major economies. Advanced economies are tracking growth of roughly 1.5–1.6%, while emerging and developing economies remain the primary growth engine at just above 4%.

The US economy has continued to show resilience, supported by steady consumer spending and a gradually easing interest rate environment, with growth expected near 2.4% in 2026. The Eurozone remains the relative laggard among major blocs, still weighed down by soft industrial demand and structural rigidities in labour and capital markets. China continues to “normalise” toward more moderate, lower single-digit growth as stress in its property sector persists.

Global headline inflation has continued to cool, estimated at around 4.1% for 2025 and projected to ease further to roughly 3.8% in 2026. That said, the path isn't perfectly smooth — geopolitical tensions, including the conflict in the Middle East, and shifting trade policy remain the key swing factors that could push growth or inflation off course. On balance, 2025-26 has been a story of cautious resilience: growth holding up better than feared, inflation trending the right way, but with real downside risk still on the table.

Indian Economy

India's growth story has, if anything, strengthened over the past year. Real GDP grew 7.8% in Q1 FY 2025-26 — a five-quarter high at the time — and then surprised further with 8.2% growth in Q2, comfortably ahead of the RBI's own projections. On the back of this momentum, the RBI has revised its full-year FY 2025-26 growth forecast upward more than once, moving from 6.5% to 6.8% and then to 7.3%, with some private estimates now running closer to 7.6%.

This acceleration has been driven by resilient private consumption (up nearly 7.9% in Q2), a pickup in investment activity, and tailwinds from the GST rate rationalisation effective September 2025, softer crude prices, and continued monetary easing. Manufacturing (up 9.1% in Q2) and financial, real estate and professional services (up over 10%) have been standout performers, while agriculture posted a more moderate 3.5%.

Inflation has been the other bright spot for the year — CPI inflation fell to an eight-year low of around 1.6% by mid-2025 before ticking up modestly, staying comfortably within the RBI's target band and giving the central bank room to keep policy supportive. India's external position has also improved, with the current account deficit narrowing on the back of strong services exports and record remittance inflows.

Looking ahead to FY 2026-27, growth is expected to moderate somewhat but remain robust, with RBI projections pointing to around 6.6–6.9% and the IMF's latest estimate for India at roughly 6.3–6.5%. India's ambition to sustain close to 8% annual growth on the road to its 2047 developed-economy goal remains intact, though it will continue to hinge on lifting capital formation and deepening participation in global value chains.

Outlook — Macroeconomics

India's position as the world's fourth-largest economy, with a GDP of about USD 4 trillion, reflects real structural progress rather than a one-off cyclical bounce. The outlook for the rest of FY 2025-26 and into FY 2026-27 remains constructive, underpinned by strong domestic investment, expanding manufacturing activity, and improving trade and financial market conditions.

Several policy measures already put in place are expected to keep consumption momentum going. The revision of the income tax exemption limit to ₹12.75 lakh has added to household disposable income, and the GST rate rationalisation rolled out in September 2025 has meaningfully lowered consumer prices across a broad basket of goods. The RBI, after a cumulative 100 basis point rate cut through the first half of 2025, has kept the repo rate steady at 5.25% through 2026 under a neutral stance, balancing continued growth support with inflation vigilance. The 8th Pay Commission, constituted in November 2025, remains in the consultation stage, with the fitment factor and revised pay structure yet to be finalised — actual salary revisions are likely to take effect only over 2027-28, with arrears backdated to January 2026.

Externally, India's trade agenda has moved from negotiation to execution. The India–UK Comprehensive Economic and Trade Agreement, signed in July 2025, formally came into effect on 15 July 2026, cutting tariffs on the large majority of goods traded between the two countries and opening up better market access for Indian textiles, leather, footwear and engineering goods. Coupled with moderating inflation, this is expected to support consumer demand, broaden market access, and reinforce India's growth trajectory over the medium term.

Industry Overview

The Indian textile and apparel sector continues to move through a period of real transformation, backed by sustained government support and favourable global demand trends. The Production Linked Incentive (PLI) scheme and the PM MITRA Parks initiative — seven integrated parks approved with a combined outlay of over ₹4,445 crore — are progressively building integrated textile hubs with shared infrastructure, common effluent treatment facilities, and accredited testing labs, giving manufacturers scale advantages that were previously out of reach for most players. Branding initiatives such as Kasturi Cotton continue to position Indian cotton as a premium, traceable global commodity.

The industry is also steadily embracing Textiles 4.0 — automation, digitisation, and data-driven production — alongside a growing emphasis on sustainable manufacturing, as global buyers place increasing weight on traceability and environmental compliance. Taken together, these developments should continue to improve productivity, sharpen competitiveness, and draw further foreign investment, positioning India to expand its role as a key global textile hub for both domestic and export demand.

Strengths

- **Robust Domestic Market:** India's growing middle class and rising disposable incomes continue to fuel strong domestic demand for textiles and apparel, providing a stable consumption base that cushions the industry against global downturns.
- **Competitive Advantage in Cotton:** As one of the world's largest cotton producers, India enjoys raw material security and cost efficiency that supports both domestic manufacturing and exports of cotton-based textiles.
- **Government Support:** Initiatives such as the PLI scheme, PM MITRA Parks, and export incentives are building world-class infrastructure and strengthening India's positioning in global value chains.
- **Skilled Workforce:** A vast pool of skilled and semi-skilled workers in weaving, spinning and garment manufacturing gives the sector flexibility and productivity across traditional and modern setups.

Weaknesses

- **Fragmented Industry Structure:** The predominance of small and medium enterprises limits economies of scale and bargaining power, constraining investment in technology and brand-building.
- **Technology Gaps:** Adoption of Industry 4.0 practices — automation, digitisation, advanced manufacturing — remains slower than among global peers, affecting efficiency and competitiveness in high-value markets.
- **High Dependence on Cotton:** Despite rising global demand for synthetic and blended fabrics, the industry's continued reliance on cotton limits diversification and exposes it to output and price fluctuations.
- **Compliance Challenges:** Stricter global norms on sustainability, labour, and ESG disclosure remain difficult for many smaller firms to meet, risking reputational damage and lost export opportunities.

Opportunities

- **Global Shift to Sustainable Textiles:** Rising consumer preference for eco-friendly, organic and recyclable fabrics gives India a chance to differentiate through sustainable production and capture premium markets.
- **Rising FDI Inflows:** Foreign investment in integrated textile parks and advanced manufacturing is accelerating technology transfer and building global supply chain linkages.
- **Export Expansion:** The India–UK Comprehensive Economic and Trade Agreement, now in effect from 15 July 2026, cuts tariffs on the bulk of goods traded between the two countries and should meaningfully lift India's textile and apparel export share; further agreements under negotiation, including with the EU, add to this pipeline.
- **Textiles 4.0:** Automation, AI-driven production and digital supply chain management can materially improve productivity and cost efficiency, helping Indian firms meet global buyers' expectations on speed, transparency and traceability.

Threats

- **Global Economic Uncertainty:** Slower growth in advanced economies and volatile consumer demand could weigh on export momentum, with any downturn in global retail and fashion markets posing risk to order volumes.
- **Geopolitical Tensions:** Trade disruptions, evolving tariff structures and currency fluctuations continue to create uncertainty for exporters, with developments in key markets affecting supply chain reliability and profitability.
- **Climate Risks:** The sector remains highly exposed to climate change, from cotton crop failures due to erratic monsoons to the pressures of water-intensive manufacturing, affecting both input costs and long-term sustainability.
- **Intense Global Competition:** Competitors such as Bangladesh and Vietnam, with lower production costs and preferential trade access, continue to press on India's market share and margins.

Risks and Concerns

The Company has put in place a comprehensive risk management system designed not only to identify and manage the risks linked to its operations, but also to inform the decision-making that guides the Company toward its objectives. Annexure “A” to the Independent Auditor’s Report Responsibilities for Audit of Standalone Financial Statement

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls systems in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure “C” to the Auditors’ Report

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 (‘the Act’)

We have audited the internal financial controls over financial reporting of **M/s. AARNAV FASHIONS LIMITED** (“the Company”), as of 31ST March, 2026, in conjunction with our audit of the standalone financial statements of the Company as at and for the year ended that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to standalone financial statements and such internal financial controls were operating effectively as at 31 March 2026, based on the internal financial controls with reference to standalone financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the “Guidance Note”).

Management’s and Board of Director’s Responsibility for Internal Financial Controls

The Company’s management and Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibility include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the ‘Guidance Note’) and the Standards of Accounting, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized

acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

- The Company is primarily engaged in the business of manufacturing, processing and trading of textiles.
- As at March 31, 2026, the Company does not have any holding company or subsidiary company.

B. Material Accounting policies

I. Statement of Compliance:

These standalone financial statements have been prepared in accordance with the Indian Accounting Standards ("Ind AS") prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time, and other relevant provisions of the Companies Act, 2013. The financial statements have been approved by the Board of Directors for issue on **May 30, 2026**.

II. Basis of preparation and presentation:

The standalone financial statements have been prepared on the historical cost basis except for certain financial assets and financial liabilities that are measured at fair value or amortised cost at the end of each reporting period in accordance with the relevant Ind AS.

Historical cost is generally based on the fair value of the consideration given in exchange for goods or services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The financial statements have been prepared on the accrual basis of accounting and under the going concern assumption.

III. Functional and Presentation Currency:

These standalone financial statements are presented in Indian Rupees (INR), which is the functional currency of the Company. All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakh (₹ in Lakhs) up to two decimal places, unless otherwise stated.

IV. Current and Non-current Classification:

The Company presents assets and liabilities in the Balance Sheet based on current and non-current classification.

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realised, sold or consumed in the Company's normal operating cycle;
- it is held primarily for the purpose of trading;
- it is expected to be realised within twelve months after the reporting date; or
- it is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non-current.

A liability is classified as current when:

- it is expected to be settled in the Company's normal operating cycle;
- it is held primarily for the purpose of trading;
- it is due to be settled within twelve months after the reporting date; or
- the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

All other liabilities are classified as non-current.

Deferred tax assets and deferred tax liabilities are always classified as non-current assets and liabilities in accordance with Ind AS 12 – *Income Taxes*.

The Company's normal operating cycle has been determined as twelve months based on the nature of its business.

V. Use of estimates & Judgments

The preparation of these standalone financial statements in conformity with Indian Accounting Standards (Ind AS) requires the management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent liabilities as at the reporting date, and the reported amounts of income and expenses during the reporting period.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively in the period in which the estimates are revised and in any future periods affected.

The significant areas involving the use of estimates and judgements include:

- Determination of the useful lives and residual values of Property, Plant and Equipment and Right-of-Use Assets;
- Valuation of inventories;
- Assessment of impairment of non-financial assets;
- Measurement of expected credit loss (ECL) on financial assets;
- Measurement of employee benefit obligations;
- Recognition and measurement of deferred tax assets and liabilities;
- Recognition and measurement of provisions, contingent liabilities and contingent assets; and
- Fair value measurement of financial instruments, where applicable.

VI. Material accounting policies

A. Revenue recognition

Revenue is recognised in accordance with Ind AS 115 – Revenue from Contracts with Customers when control of the promised goods or services is transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

The Company applies the five-step model prescribed under Ind AS 115 for recognition of revenue from contracts with customers, which involves:

- identifying the contract with the customer;
- identifying the performance obligations in the contract;
- determining the transaction price;
- allocating the transaction price to the performance obligations; and
- recognising revenue when, or as, the performance obligation is satisfied.

1. Sale of goods

Revenue from sale of goods is recognised when control passes to the customer, generally on delivery as per the terms of the contract. Revenue is measured at the transaction price, net of discounts, rebates, returns, GST and other taxes collected on behalf of the Government.

Revenue from export sales is recognised when control of the goods passes to the overseas customer as per the relevant export contract.

Export incentives, where applicable, are recognised when there is reasonable assurance that the Company will comply with the conditions and the incentives will be received.

2. Interest income

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is recognised using the Effective Interest Rate (EIR) method on a time proportion basis. It is recognised on financial assets measured at amortised cost when it is probable that the economic benefits will flow to the Company and the amount can be measured reliably.

3. Rent Income

Rental income is recognised on a systematic basis over the lease term. Where lease arrangements contain escalation or structured rentals, income is recognised on a straight-line basis unless another basis is more representative of the benefit pattern.

4. Carbon Credit and Other Income

Income from carbon credits is recognised when the right to receive such income is established, the amount can be measured reliably and it is probable that the economic benefits will flow to the Company. Other income, including profit on sale of Property, Plant and Equipment, sale of investments, scrap sales and insurance claims, is recognised when the right to receive the income is established.

B. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until it is substantially ready for its intended use or sale. Borrowing costs include interest expense and other costs incurred in connection with borrowings.

A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs that are not directly attributable to a qualifying asset are recognised as an expense in the Statement of Profit and Loss in the period in which they are incurred.

Investment income earned on the temporary investment of specific borrowings pending their utilisation for qualifying assets is deducted from the borrowing costs eligible for capitalisation.

C. Export Benefits

Duty free imports of raw materials under advance license for imports, as per the Foreign Trade Policy, are matched with the exports made against the said licenses and the net benefits / obligations are accounted by making suitable adjustments in raw material consumption.

D. Taxes

Income tax expense comprises current tax and deferred tax and is recognised in the Statement of Profit and Loss, except to the extent it relates to items recognised in Other Comprehensive Income (OCI) or directly in equity, in which case the related tax is also recognised in OCI or equity.

1. Current income tax

Current tax is the amount of income tax payable or recoverable in respect of taxable profit for the year, determined in accordance with the Income-tax Act, 1961. Current tax assets and liabilities are measured using tax rates and laws enacted or substantively enacted at the reporting date.

Management reviews uncertain tax positions periodically and recognises provisions where necessary.

2. Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities and their tax bases using the balance sheet approach.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available for utilisation of deductible temporary differences, unused tax losses and unused tax credits. Deferred tax assets are reviewed at each reporting date and reduced if recovery is no longer probable.

Deferred tax assets and liabilities are measured using tax rates expected to apply when the related asset is realised or the liability is settled, based on enacted or substantively enacted rates at the reporting date.

Deferred tax relating to items recognised in OCI or directly in equity is recognised in OCI or equity, respectively. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset and they relate to the same taxable entity and taxation authority.

MAT credit is recognised as an asset only when there is convincing evidence that the Company will pay normal income tax during the specified period. MAT credit is reviewed at each reporting date and written down if recovery is no longer probable.

E. Leases

The Company, as a lessee, recognizes a right of-use asset and a lease liability for its leasing arrangements, if the contract conveys the right to control the use of an identified asset. Initially the right-of-use assets measured at cost which comprises initial cost of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs incurred. Subsequently measured at cost less any accumulated depreciation/ amortization, accumulated impairment losses, if any and adjusted for any re measurement of the lease liability.

- I. Lease liability is initially recognized at the present value of lease payments not yet paid during the lease term.
- II. Right-of-use asset is measured at cost, comprising the initial lease liability, lease payments made before commencement (less incentives), restoration costs, and initial direct costs.
- III. Lease liability is subsequently measured using the effective interest method. The ROU asset is depreciated as per Ind AS 16.
- IV. For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the lease term.

F. Employee Benefits

A liability is recognized for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Post employment and other long term employee benefits are recognized as an expense in the profit & loss account for the year in which the liabilities are crystallized.

1. Long-term employee benefits

Post-employment and other employee benefits are recognized as an expense in the statement of profit and loss for the period in which the employee has rendered services. A liability is recognized for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

2. Defined contribution plans

The company pays provident fund contributions to publicly administered provident funds as per local regulations. The company has no further payment obligations once the contributions have been paid. Company is complying with the provisions of Gratuity Plan as required as per INDAS 19 as per Actuarial Report.

G. Property, plant and equipment

Property, Plant and Equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price, non-refundable taxes and duties, directly attributable costs, borrowing costs eligible for capitalisation and restoration costs, where applicable.

Subsequent expenditure is capitalised only when future economic benefits are probable and the cost can be measured reliably. Repairs and maintenance are charged to the Statement of Profit and Loss as incurred.

Capital Work-in-Progress includes expenditure on assets not yet ready for use and is transferred to the relevant class of Property, Plant and Equipment when the asset is ready for use.

An item of Property, Plant and Equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on derecognition is recognised in the Statement of Profit and Loss.

Depreciation methods, estimated useful lives and residual value

Depreciation is provided on the Straight-Line Method (SLM) over the useful lives of assets prescribed under Schedule II to the Companies Act, 2013, except where technical assessment supports a different useful life.

Freehold land is not depreciated.

The estimated useful lives of major classes of Property, Plant and Equipment are as follows:

Assets	Estimated useful life
Lease hold land	Lease term (99 years)
Buildings	30 years
Plant and machinery	15 years
Furniture and fixtures	10 years
Office equipment	5 years
Computer	3 Years
Vehicles	8 years

Residual values, useful lives and the depreciation method are reviewed at each reporting date and revised prospectively, if required.

H. Investment properties

Investment property comprises land or buildings held to earn rentals or for capital appreciation, or both, and not for use in operations or for sale in the ordinary course of business.

Investment property is initially recognised at cost, including directly attributable transaction costs. After initial recognition, it is carried at cost less accumulated depreciation and impairment losses, if any, in accordance with Ind AS 40. Subsequent expenditure is capitalised only when future economic benefits are probable and the cost can be measured reliably. Repairs and maintenance are charged to the Statement of Profit and Loss when incurred.

The Company does not have any investment property as at March 31, 2026.

I. Intangibles

Intangible assets are recognized when future economic benefits are probable and cost can be measured reliably.

Intangible assets acquired separately are initially measured at cost. Those acquired in a business combination are measured at fair value on acquisition. After initial recognition, intangible assets are carried at cost less accumulated amortization and impairment losses. Internally generated intangibles, except capitalized development costs, are expensed as incurred.

J. Inventories

Inventories are valued at the lower of cost and net realizable value.

1. Raw materials: cost includes purchase cost and other costs to bring inventories to present location and condition; determined on a Specific Identification Method basis.
2. Finished goods and work-in-progress inventories are measured and recorded at weighted average cost, which includes direct materials, direct labour, and a proportionate share of manufacturing overheads based on normal production capacity, excluding borrowing costs.
3. Stores and spares are measured at cost, which includes the purchase price and other costs incurred to bring the inventories to their present location and condition. The cost is determined using the weighted average cost method.
4. Fuel: cost includes purchase and other costs; determined on weighted average cost method basis.

K. Investment in subsidiaries, joint ventures and associates

Investments in subsidiaries, joint ventures and associates, where applicable, are accounted for at cost in the standalone financial statements in accordance with Ind AS 27, unless classified as held for sale under Ind AS 105.

The Company does not have any investment in subsidiaries, joint ventures or associates as at March 31, 2026.

L. Financial Instruments

Financial instruments are recognised when the Company becomes a party to the contractual provisions of the instrument and are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial instruments, other than those measured at Fair Value Through Profit or Loss (FVTPL), are included in the initial measurement.

Financial Assets

Financial assets are subsequently classified and measured at:

- Amortised Cost;
- Fair Value Through Other Comprehensive Income (FVTOCI); or

- Fair Value Through Profit or Loss (FVTPL), based on the Company's business model for managing the assets and the contractual cash flow characteristics. Trade receivables and other debt instruments that meet the criteria under Ind AS 109 are measured at amortised cost using the Effective Interest Rate (EIR) method. Equity investments are measured at fair value. The Company has elected to present changes in the fair value of certain equity investments in Other Comprehensive Income (FVTOCI). Dividend income is recognised in the Statement of Profit and Loss when the Company's right to receive payment is established. Financial assets are derecognised when the contractual rights to receive cash flows expire or when substantially all the risks and rewards of ownership are transferred. The Company recognises impairment of financial assets using the Expected Credit Loss (ECL) model in accordance with Ind AS 109. For trade receivables, lifetime ECL is recognised using the simplified approach, while for other financial assets, impairment is assessed based on whether there has been a significant increase in credit risk since initial recognition.

Financial Liabilities

Financial liabilities, including borrowings, trade payables and other financial liabilities, are initially recognised at fair value net of directly attributable transaction costs and are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. The Company has not designated any financial liabilities at Fair Value Through Profit or Loss (FVTPL).

A financial liability is derecognised when the obligation is discharged, cancelled or expires. Any difference between the carrying amount of the liability derecognised and the consideration paid is recognised in the Statement of Profit and Loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is presented in the Balance Sheet only when the Company has a legally enforceable right to offset the recognised amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

M. Impairment of non-financial assets

At each reporting date, the Company assesses whether there is any indication that a non-financial asset may be impaired. If such indication exists, the recoverable amount of the asset or Cash Generating Unit (CGU) is estimated. The recoverable amount is the higher of its fair value less costs of disposal and its value in use. An impairment loss is recognised when the carrying amount exceeds the recoverable amount. Impairment losses are recognised in the Statement of Profit and Loss and are reviewed at each reporting date for possible reversal.

N. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, balances with banks and short-term deposits with original maturities of three months or less that are readily convertible into known amounts of cash and are subject to insignificant risk of changes in value.

O. Segment accounting

Operating segments are identified based on the internal reports reviewed by the Chief Operating Decision Maker (CODM) for allocating resources and assessing performance, in accordance with Ind AS 108. The Company operates in a single reportable business segment, namely **Textile Products**.

P. Provisions, Contingent liabilities, Contingent assets and Commitments

Provisions are recognised when the Company has a present legal or constructive obligation arising from a past event, it is probable that an outflow of economic resources will be required to settle the obligation, and a reliable estimate can be made.

Contingent liabilities are disclosed where the existence of an obligation depends on uncertain future events or where an obligation exists but is not probable or cannot be measured reliably. Contingent assets are not recognised but are disclosed when the inflow of economic benefits is probable. Commitments are disclosed where required under applicable accounting standards.

Q. Earnings per share

Basic earnings per share are computed by dividing the profit attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted earnings per share are computed by adjusting the weighted average number of equity shares for the effects of all dilutive potential equity shares in accordance with Ind AS 33.

R. Statement of cash flows

Cash flows are reported using the Indirect Method in accordance with Ind AS 7. Cash flows are classified into operating, investing and financing activities.

The Company has considered twelve months as its normal operating cycle for the purpose of classification of assets and liabilities as current and non-current.

S. Foreign currency translation

Transactions denominated in foreign currencies are recorded at the exchange rates prevailing on the date of the transaction. Monetary assets and liabilities are translated at the closing exchange rates at the reporting date. Exchange differences arising on settlement or translation are recognised in the Statement of Profit and Loss. Non-monetary items measured at historical cost are translated at the exchange rate on the date of the transaction.

T. Fair value measurement

The Company measures financial instruments at fair value wherever required under Ind AS. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair value measurements are classified into the following hierarchy based on the inputs used:

- **Level 1:** Quoted prices in active markets for identical assets or liabilities.
- **Level 2:** Observable inputs other than quoted prices included in Level 1.
- **Level 3:** Unobservable inputs used in the valuation technique.

The Company reviews fair value measurements and the related valuation techniques at each reporting date.

U. Exceptional items

Occasionally, items of income or expense related to the company's ordinary activities, due to their size, type, or incidence, are classified as exceptional items. Such items are disclosed separately in the notes to the financial statements to enhance understanding of the company's performance.

V. Events Occurring After the Balance Sheet Date

Events occurring after the reporting period that provide evidence of conditions existing at the reporting date are adjusted in the financial statements.

Events that are indicative of conditions arising after the reporting period are not adjusted but are disclosed, if material.

W. Employee Benefit Obligations – Regulatory Update

Pursuant to the notification issued by the Ministry of Labour and Employment, The Government of India has consolidated 29 existing labour legislations into a united framework comprising 4 Labour Codes referred as the “New Labour Codes” which became effective from 21st November, 2025. The Company is currently evaluating the financial implication on its employee benefit obligation. As the evaluation is currently in progress, the financial impact is not reasonably determinable at this stage. Consequently no adjustment has been made in the financial results for the period.

X. Rounding off

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Lakhs as per the requirements of Schedule III, unless otherwise stated.

• Recent accounting pronouncements

The Ministry of Corporate Affairs has notified amendments to certain Indian Accounting Standards applicable from the reporting period beginning 1 April 2025.

Key amendments include:

- Ind AS 21 – Foreign currency translation and exchange differences
- Ind AS 1 – Classification of liabilities as current or non-current
- Ind AS 7 & Ind AS 107 – Disclosure requirements for supplier finance arrangements
- Ind AS 12 – Income tax related to Pillar Two model rules

The Company has assessed these amendments and concluded that they do not have a material impact on the financial statements.

3. Financial risk management objectives

The Company's Corporate finance department provides services to business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyse the exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

4. Market risk

The Company's activities expose it primarily to market risk arising from changes in interest rates on its borrowings. The Company monitors its interest rate exposure on an ongoing basis and manages the risk through appropriate financing arrangements. The Company has not entered into any derivative financial instruments to hedge its market risk exposures during the year.

5. Foreign currency risk management

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilizing forward foreign exchange contracts and currency options taken at the time of initiation of the booking by the management. Such decision is taken after considering the factors such as upside potential, cost of structure and the downside risks etc. Quarterly reports are submitted to Management Committee on the covered and open positions and MTM valuation.

with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Disclosure as per Ind AS 113 - Fair Value Measurements

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in an orderly transaction in the principal (or most advantageous) market at measurement date under the current market condition regardless of whether that price is directly observable or estimated using other valuation techniques.

The Company has established the following fair value hierarchy that categorizes the values into 3 levels. The inputs to valuation techniques used to measure fair value of financial instruments are:

Level 1- Level 1 hierarchy includes financial instruments measured using quoted prices. This Includes listed equity instruments that have quoted price. Listed and actively traded equity instruments are stated at the last quoted closing price on the National Stock Exchange of India Limited (NSE).

Level 2- The fair value of financial instruments that are not traded in active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3- Financial instruments are classified under Level 3 if one or more significant valuation inputs are not based on observable market data. To determine their fair value accurately, the Company does not rely solely on a single method; instead, it utilizes the most appropriate technique under the Income Approach (such as the Discounted Cash Flow method based on future cash projections), the Market Approach (such as the Comparable Companies Multiple method using market peer milestones), or the Asset Approach (such as the Net Asset Value method based on the adjusted fair value of underlying assets and liabilities). These valuations are performed at each reporting date by qualified internal teams or external registered valuers, and the final outputs are reviewed by management and presented to the Audit Committee to ensure governance and technical compliance.

Valuation Techniques used to determine fair values:

A) Specific valuation technique is used to determine the fair value of the financial instruments which include:

- For financial instruments other than (ii):- In accordance with generally accepted pricing models based on Net Asset Value analysis using prices from observable market transactions and dealer quotes of similar instruments.
- For financial liabilities (domestic currency loans) :- appropriate market borrowing rate of the entity as of each balance sheet date used.

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods and its non-derivative financial assets. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.
