Retaggio Industries Limited Commences Exports to Japan and Hong Kong; Exports Expected to Contribute 20%–25% of Revenue over the Next Three Years

Mumbai, 26 October 2026: Retaggio Industries Limited, engaged in the manufacturing of gold and diamond-studded jewellery, is taking steps to expand its business in international markets, with a focus on developing overseas customer relationships and increasing its export business.

Over the past year, the Company's Promoter, **Mr. Savinay Lodha**, has attended several prominent international jewellery exhibitions, including the Vicenzaoro Jewellery Show in Italy, JCK Las Vegas Show in the United States, HKTDC Hong Kong International Jewellery Show and Japan Jewellery Fair. These exhibitions have provided opportunities to interact with prospective international customers, understand market preferences and explore business opportunities in overseas markets.

The Company's efforts have begun to translate into business, with **exports to Japan and Hong Kong having successfully commenced**. This marks an important development in the Company's efforts to expand beyond the domestic market and establish business relationships with international customers.

The Company intends to build on this progress by strengthening relationships with existing overseas customers, pursuing repeat orders and exploring opportunities in additional international markets. It will continue to focus on developing its export business alongside its domestic operations.

As part of its medium-term business plans, the Company's management expects exports to contribute approximately 20%–25% of its overall revenue within the next three years. This expectation reflects the Company's plans to expand its overseas customer base and increase the contribution of international markets to its business. The achievement of this target will depend on customer demand, the conversion of business opportunities into orders and the Company's ability to fulfil such orders.

Retaggio Industries Limited will continue to focus on expanding its market reach, developing new business relationships and building a diversified revenue base to support its long-term growth.

Forward-Looking Statement: The expected export contribution of 20%–25% over the next three years represents management's current expectation and is not a guarantee of future performance. Actual results may vary depending on market conditions, customer demand, order conversion, execution and other business and economic factors.
