# Wipro and Rubrik Launch Enterprise Resilience as a Service to Deliver Continuous Cyber Resilience

**BENGALURU, India | EAST BRUNSWICK, N.J. – Aug. 05, 2026**: Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading AI-powered technology services and consulting company, and Rubrik, the Security and AI Operations company, today announced the launch of Enterprise Resilience as a Service (ERaaS). The consulting-led, outcome-driven ERaaS is designed to help enterprises prevent, withstand, and rapidly recover from cyber and operational disruptions.

As enterprises accelerate AI adoption and operate in increasingly complex digital environments, ensuring continuous resilience against cyber and operational disruptions has become a critical business priority. ERaaS enables organizations to move beyond the traditional backup and disaster recovery model by operating as a continuously managed, enterprise-wide capability across technology, operations, and business processes.

ERaaS will enable continuous assessment of resilience posture, support recovery decisions, and automate recovery workflows. The new service will transform resilience from a periodic, incident-triggered function to a predictive, self-optimizing capability that evolves continuously. The AI capabilities will be operationalized through Wipro's AI-powered delivery platform WINGS, part of Wipro Intelligence™, the suite of AI-powered platforms, solutions, and transformative offerings.

"Where most resilience engagements start with technology, Wipro's starts with the business use cases, and that distinction is what makes ERaaS stand out," said **Satish Yadavalli, Global Business Head – Cloud, Infrastructure, and Security Services, Wipro Limited**. "Together with Rubrik's Zero Trust recovery capabilities, ERaaS will identify critical systems, map impact tolerances, and quickly establish recovery priorities. Leveraging our consulting capabilities, we will work closely with clients to translate these insights into resilience-by-design architectures, governance frameworks, and recovery playbooks."

"Together with Wipro, we are helping customers operationalize cyber recovery as a core part of a broader enterprise resilience strategy," said **Alok Agrawal, Chief Solutions Officer, Rubrik**. "Moments of disruption are inevitable, which is why this joint offering is critical for safe, confident, agile recovery."

ERaaS is built on Rubrik's unified cyber and data resilience platform, offering capabilities such as immutable protection, rollback of AI-driven changes, rapid identification of clean recovery points and threat-aware recovery. The platform also supports the protection of critical identity systems, enabling organisations to recover data, infrastructure and identities with greater confidence while minimising downtime and business risk.

**Forward-Looking Statements**
The forward-looking statements contained herein represent Wipro's beliefs regarding future events, many of which are by their nature, inherently uncertain and outside Wipro's control. Such statements include, but are not limited to, statements regarding Wipro's growth prospects, its future financial operating results, and its plans, expectations and intentions. Wipro cautions readers that the forward-looking statements contained herein are subject to risks and uncertainties that could cause actual results to differ materially from the results anticipated by such statements. Such risks and uncertainties include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, complete proposed corporate actions, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our business and industry.

Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission, including, but not limited to, Annual Reports on Form 20-F. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
