Ramco Systems Signs MoU with Safran Helicopter Engines

To Enable Seamless Engine Data Integration for Helicopter Operators

Chennai, INDIA – September 03, 2026 - Global aviation software provider [Ramco Systems](#) announced that it has signed a **Memorandum of Understanding (MoU)** with [Safran Helicopter Engines](#), world's leading manufacturer of rotorcraft turbines, to collaborate on enabling seamless integration of Safran's engine data with Ramco Aviation Software.

Through this MoU, Ramco and Safran Helicopter Engines will work together to enable engine information post shop visits to flow directly from Safran into the Maintenance Information System (MIS) within Ramco Aviation Software, reducing manual data entry for helicopter operators and allowing them to focus more on keeping aircraft in service. The outcome of this collaboration will be the award by Safran Helicopter Engines of the EngineLife® Connect label, which identifies the best connectivity solutions compatible with its range of products and services.

As part of the MoU, the companies will work on enabling engine configuration, usage metrics, and maintenance events to be automatically ingested into Ramco Aviation Software, improving data accuracy and consistency across maintenance operations.

The partnership will focus on enabling:

- **Engine data ready to use:** Building the technical link to allow Safran's engine information, including configuration, hours, and events, to be directly loaded into Ramco Aviation Software.
- **A trusted data exchange:** Defining joint business processes to ensure reliable and continuous both way data flow between Safran and Ramco.
- **Better digital services for operators:** Using improved data flow to strengthen the digital services provided by Safran to its customers.

The collaboration will also include joint evaluation of data exchange formats and establishment of operational processes to ensure ongoing compatibility.

For operators, the partnership is expected to reduce the time and effort required for engine data initialization within the MIS, while improving the structure, quality, and consistency of data supporting airworthiness and maintenance planning.

Sam Jacob, Executive Vice President & SBU Head – Aviation, Aerospace and Defense, Ramco Systems, said, "With several of the world's largest helicopter operators on our platform, Ramco sits at a unique intersection of the aviation MRO ecosystem — connecting OEMs and operators through a single digital backbone. We're delighted to partner with a leader like Safran Helicopter Engines to enable this seamless digital exchange: Safran gains richer engine maintenance data to strengthen reliability, while operators receive OEM information directly into their systems, cutting manual work and improving productivity. Powered by AI and agentic automation, Ramco Aviation Software is built to make exactly this kind of connected, intelligent ecosystem possible."

[Ramco Aviation Software](#) is trusted by 24,000+ users to manage 4,000+ aircraft globally. With 90+ Aviation organizations onboard, Ramco is the solution of choice for top Airlines, 3rd party MROs, large Heli-Operators, leading Defense organizations, and major Urban Air Mobility companies around the world. Available on cloud, Ramco Aviation Suite provides accessibility with 'Anywhere Apps', significantly accelerating organizational efficiency and agility. Ramco is changing the paradigm of enterprise software with Artificial Intelligence based solutions, intelligent voice enabled user experience, and advanced features such as digital task cards, offline maintenance capability, conversational chatbots, HUBs and cognitive solutions.

About Safran Helicopter Engines:

Safran Helicopter Engines is the world's leading manufacturer of helicopter engines, with more than 75,000 produced since being founded. It offers the widest range of helicopter turboshafts in the world and has more than 2,500 customers in 155 countries.

About Ramco Systems:

Ramco Systems is a world-class enterprise software product/ platform provider disrupting the market with its multi-tenant cloud and mobile-based enterprise software, successfully driving innovation for over 25 years. Over the years, Ramco has maintained a consistent track record of serving 800+ customers globally with two million+ users and delivering tangible business value in Global Payroll, Aviation, Aerospace & Defense, and ERP. Ramco's key differentiator is its innovative product development approach through its revolutionary enterprise application assembly and delivery platform. On the innovation front, Ramco is leveraging cutting-edge technologies around Artificial Intelligence, Machine Learning, RPA, and Blockchain, amongst others, to help organizations embrace digital transformation.
