RateGain Named Fastest Growing SaaS Company at The Economic Times Enterprise AI Awards 2026

Independent jury reinforces RateGain's leadership at the intersection of AI, data and travel technology

India, 18 September 2026: RateGain Travel Technologies Limited (NSE: RATEGAIN, BSE: 543417), a global provider of AI-powered SaaS solutions for the travel and hospitality industry, has been named the Fastest Growing SaaS Company at the ET Enterprise AI Awards 2026. The award places RateGain among the fastest-scaling enterprise AI businesses serving the travel industry globally.

That scale is evident in where the company's technology operates. RateGain works with 33 of the world's top 40 hotel chains, four of the top five airlines, seven of the top ten car rental companies and 25 Global Fortune 500 companies, which together account for a substantial share of how travel is priced, distributed and sold worldwide.

That reach is rooted in a data position built over more than two decades, rather than a recent product cycle. RateGain connects more than 200,000 properties to over 700 demand partners and processes more than 231 billion availability, rate and inventory each year, giving it a broad view of how travel is priced and distributed. In March 2026, the consolidation of its marketing technology capabilities under Sojern added the world's largest and most comprehensive source of travel intent data alongside that. Together, these capabilities give RateGain's AI models access to a proprietary dataset that its competitors do not have, allowing customers to make pricing, distribution and marketing decisions from a single view of the traveller rather than three fragmented ones.

Commenting on the win, Bhanu Chopra, Founder & Managing Director, RateGain Travel Technologies Limited, said, *"We are proud to be recognized as the Fastest Growing SaaS Company at the ET Enterprise AI Awards 2026. The recognition underscores the momentum we are building at the intersection of data, AI and travel technology, and validates the strength of the platform we have built over the past two decades. As our customer base grows, the data and insights generated across the network further strengthen our models and capabilities, creating a compounding advantage. As a global company trusted by some of the world's largest travel brands, this accolade is a meaningful validation of both our growth trajectory and our ability to deliver enterprise AI at scale".*

Presented by The Economic Times, the Enterprise AI Awards 2026 recognize organizations, technology providers and enterprise leaders driving measurable business transformation through artificial intelligence, across categories spanning AI products, enterprise adoption, responsible AI and industry-specific innovation. Entries in the category were assessed by an independent jury on growth in annual recurring revenue, user growth, customer retention and engagement, and the scale of enterprise and SMB adoption.

About RateGain Travel Technologies Limited

RateGain Travel Technologies Limited is a global provider of AI-powered SaaS solutions for travel and hospitality, working with 14,000+ customers and 700+ partners across 160+ countries. RateGain helps travel and hospitality businesses accelerate revenue generation through acquisition, retention, and wallet share expansion.

Today, RateGain is one of the world's largest processors of electronic transactions, price points, and travel intent data, enabling revenue management, distribution, and marketing teams across hotels, airlines, destination marketing organizations, online travel agents, metasearch companies, package providers, car rentals, travel management companies, cruises, and ferries to drive better business outcomes.

Founded in 2004 and headquartered in India, RateGain works with 33 of the Top 40 Hotel Chains, 4 of the Top 5 Airlines, 7 of the Top 10 Car Rental companies, and all leading DMOs, OTAs, and metasearch platforms, including 25 Global Fortune 500 companies, unlocking new revenue every day.
