Dear Sir/Madam,

Sub: Press/Media Release for commencement of construction of a new Reclaim Rubber manufacturing facility by Wholly owned Subsidiary

Pursuant to Regulation 30 read with Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform you that the Press/Media Release dated August 24, 2026 with respect to the commencement of construction of a new Reclaim Rubber manufacturing facility in Palakkad, Kerala by Terra Rubber Private Limited, wholly owned Subsidiary of Tolins Tyres Limited.

Further details are provided in the Annexure enclosed with this letter.

You are requested to take the same on your records.

Tolins Tyres' Wholly Owned Subsidiary Terra Rubber Breaks Ground on Reclaim Rubber Manufacturing Facility in Palakkad

Facility to convert scrap tyres and rubber waste into Reclaimed Rubber, creating opportunities across raw-material efficiency, circularity and EPR compliance

Kerala, August 24th, 2026: Tolins Tyres Limited ("Tolins" or "Company"), a leading player in the Tyre & Treads industry, today announced that its **100% wholly owned subsidiary, Terra Rubber Private Limited ("Terra Rubber")**, has commenced construction of a new **Reclaim Rubber manufacturing facility in Palakkad, Kerala**.

The groundbreaking marks an important milestone in the Tolins Group's strategy to strengthen its presence across the rubber value chain while advancing **backward integration, raw-material efficiency and circular manufacturing**.

The facility will utilise **scrap tyres and other rubber waste, including rubber compound waste**, as key raw materials. Through a controlled **devulcanisation process**, the facility will recover usable rubber and convert it into **Reclaimed Rubber**, which can be incorporated into suitable rubber compounds as a substitute for a portion of virgin rubber, depending on product specifications and performance requirements.

Creating Value from Waste

The Terra Rubber facility will enable the Tolins Group to participate further upstream in the rubber value chain by converting end-of-life tyres and rubber waste into a value-added raw material.

Scrap Tyres & Rubber Waste → Devulcanisation → Reclaimed Rubber → Reuse in Rubber Applications

For Tolins, this creates an opportunity to develop an additional raw-material stream, optimise the raw-material mix and improve material efficiency, while reducing reliance on virgin resources.

EPR Certificates: Creating an Additional Revenue Opportunity

The facility also provides Terra Rubber with an opportunity to participate in India's **Extended Producer Responsibility (EPR) framework for waste tyres.**

Under the CPCB's waste tyre EPR framework, registered recyclers can generate EPR certificates against eligible quantities of waste tyres recycled and corresponding eligible recycled products, including Reclaimed Rubber. These certificates can subsequently be transferred to registered tyre producers to help fulfil their EPR obligations.

Accordingly, subject to applicable **CPCB registration, certification and regulatory requirements,** Terra Rubber will have the potential to generate and transfer EPR certificates to tyre producers, creating an additional revenue opportunity alongside the sale of Reclaimed Rubber.

This gives the facility a dual value proposition — **recovering a valuable raw material from waste while creating an additional commercial opportunity through the EPR ecosystem.**

Dr. KV Tolin, Promoter, Chairman and Managing Director, Tolins Tyres, said, “The groundbreaking of Terra Rubber’s Reclaim Rubber facility marks an important milestone in our journey towards building a more integrated and sustainable rubber ecosystem. Through Terra Rubber, we are looking to convert end-of-life tyres and rubber waste into a valuable raw material that can be brought back into productive use.

The facility also provides us with an opportunity to participate in the growing EPR ecosystem for waste tyres. By combining the sale of Reclaimed Rubber with the potential generation and transfer of EPR certificates, subject to applicable regulatory requirements, Terra Rubber has the potential to create multiple avenues of value from the recycling of waste tyres. We believe this initiative can bring together sustainability, resource efficiency and commercial value creation.”

The facility is expected to strengthen the Tolins Group’s participation across the rubber value chain while supporting **resource recovery, waste diversion and a more circular approach to rubber manufacturing**.

About Tolins Tyres Limited:

Tolins Tyres, founded in 1982 is a leading producer in the tyre industry, specializing in a diverse range of Retreading and tyre products. The portfolio includes two and three-wheeler tyres, Light Commercial Vehicle (LCV) tyres and Agriculture tyres. Furthermore, Tolins Tyres takes pride in innovative “Precured Tread Rubber” and other retreading products, showcasing its commitment to cutting-edge technology. These products have not only garnered acclaim in India but have also made a significant impact across 40 countries, including the Middle East, East Africa, Kenya, Jordan, and Egypt. Tolins stands out as the first Indian retread brand to not only enter but thrive in the highly competitive American market for pre-cured retreading products. Led by Chairman and MD Dr. Kalamparambil Varkey Tolin, who brings over three decades of industry experience, the company operates two manufacturing facilities in Kalady, Kerala, strategically located near Kochi and close to natural rubber sources. Additionally, its wholly owned subsidiary, Tolins Tyres LLC, operates in Al Hamra Industrial Zone, Ras Al Khaimah, UAE. Backward integration enhances quality control and cost management, while a network of 8 depots and 3,737 dealers across India ensures efficient sales channels.
