02 Transformation through the years

Systematic de-risking of NBFC · Patient compounding of businesses · Intentional pivot to a capital-light Edelweiss

1. SYSTEMATIC DE-RISKING OF NBFC

Amidst one of the deepest credit cycles, our first priority was clear - strengthen the NBFC balance sheet by systematically reducing both leverage and the wholesale book

We have delivered on both

	NBFC Net Debt	NBFC Wholesale Book	NBFC Equity
2019	₹23,500 Cr	₹18,000 Cr	₹4,300 Cr
2026	**₹2,375 Cr**	**₹1,750 Cr**	**₹2,030 Cr**
	↓ (90%)	↓ (90%)	

Net debt reduced by ~₹21,000 Cr; Wholesale book almost wound down

2· PATIENT COMPOUNDING OF BUSINESSES

While NBFC de-risked, other businesses continued building

Through the entire credit cycle, our operating businesses kept compounding — in AUM, in customers and in profit

Operating businesses grew through the cycle

3· THE OUTCOME

This journey has resulted in capital-light growth for Edelweiss

A capital-light compounder: 10x the profit, ⅓rd the debt

Consolidated PAT (Post MI)

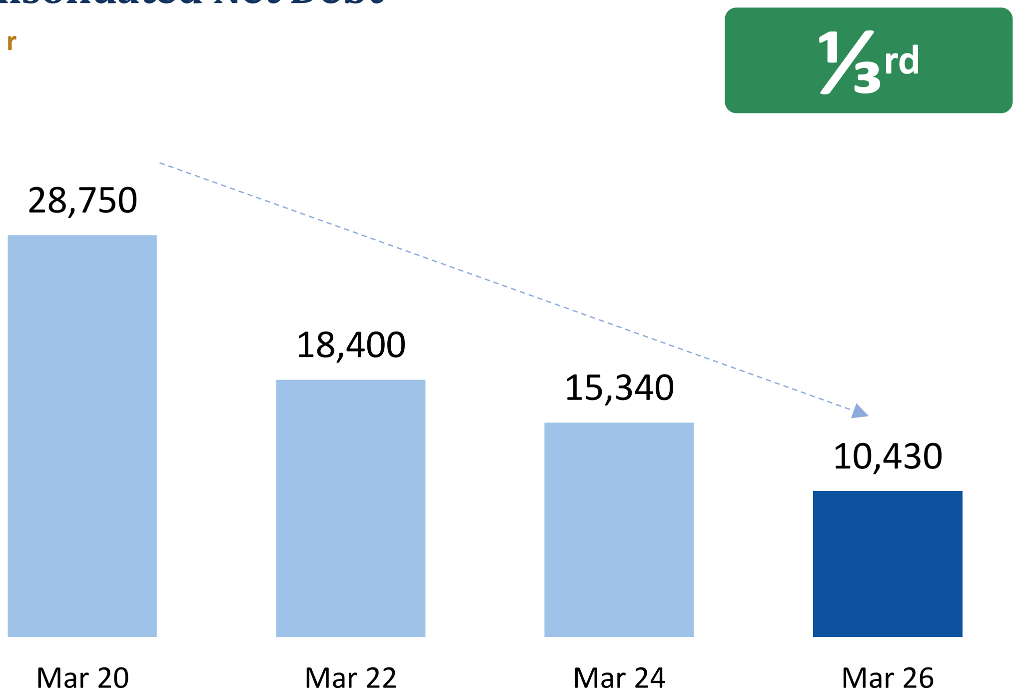
Consolidated Net Debt

₹ Cr



More profit, far less capital — a testimony to our capital-light growth

TO SUMMARIZE . . . WE HAVE TRANSFORMED OVER THE YEARS

Systematic. Intentional. Patient.

Amidst one of the deepest credit cycles – the NBFC rebuilt its balance sheet, while the operating businesses compounded.

The result: a fundamentally different, capital-light Edelweiss.

10x

Growth in Consolidated PAT

Capital-light

Asset-light, capital-efficient model

03 Understanding the EFSL P&L

Where the earnings come from — and why they are sustainable

Consolidated PAT is the sum of two elements

Consolidated PAT

=

Operating Business PAT

Robust and predictable

Expect to grow at 20–25%

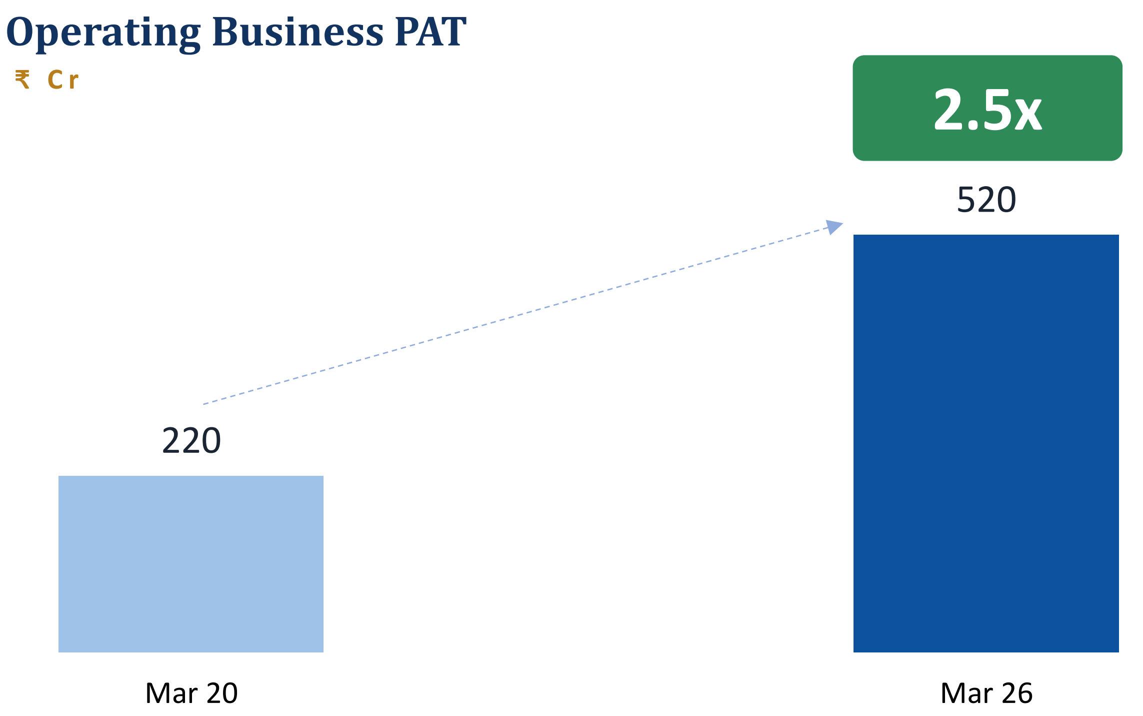
+

Corporate PAT

Episodic, range-bound

₹(100) – 100 Cr
on an annual basis

Operating Business PAT more than doubled since FY20



Core driver of Consolidated PAT; expect to compound at 20-25%

Corporate PAT – episodic and range-bound

FY20	FY26
₹(164) Cr	₹161 Cr

Net interest expense

Falls as corporate net debt keeps declining

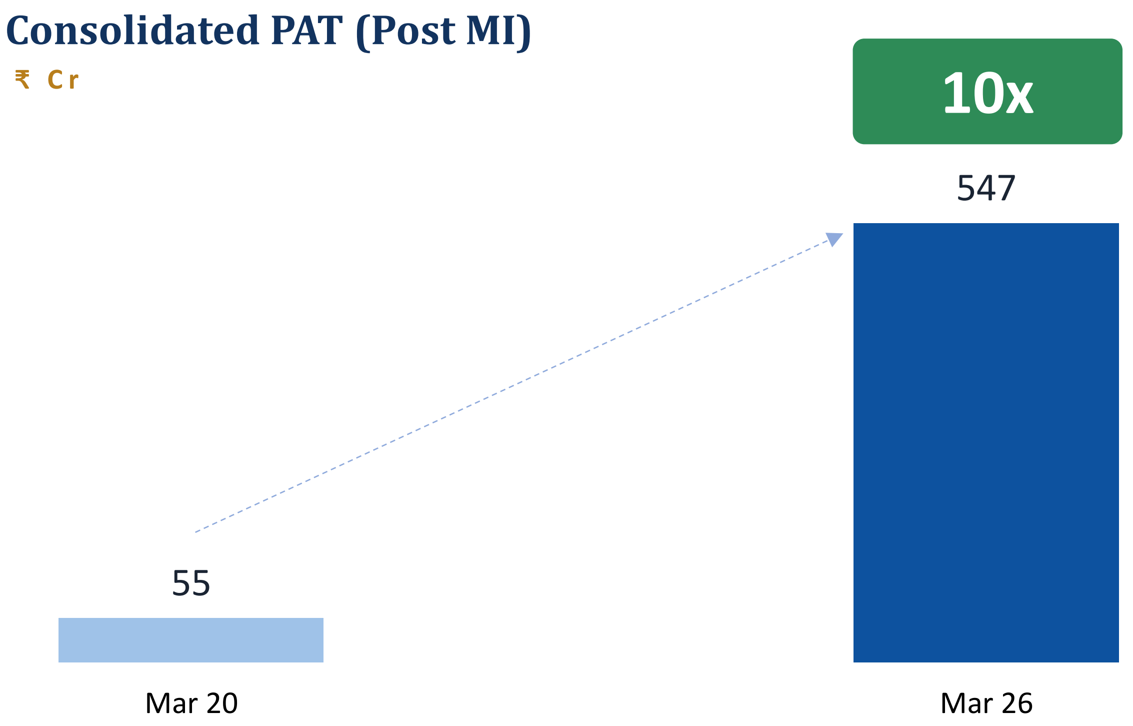
Operating expense

Remains broadly steady

Net capital gains

Episodic fair-value gains — inherently volatile across quarters

Together drove a 10x jump in Consolidated PAT



A compounding engine + a shrinking drag - 10x the profit, ⅓rd the debt

04 Intrinsic Value

Our compass for long-term value creation

How we think about long-term value creation

1	**Fundamentals, not price**	Intrinsic Value reflects the estimated true worth of each business – considering quantitative and qualitative factors
2	**The market catches up**	Markets in the mid-term may over or undervalue businesses, but eventually align in the long-term
3	**Long-term view**	Strategic scale-up investments can temporarily impact near-term PAT and price, but build lasting intrinsic value
4	**It guides capital allocation**	Intrinsic Value of each business informs where we deploy capital
5	**Our ambition**	We expect to compound Intrinsic Value at 15–20% CAGR over the next 5 years

Given Edelweiss Alternatives is in the process of listing in Q3FY27, we find it prudent not to disclose business-wise Intrinsic Value at this stage.

Hence, we are sharing the Total Intrinsic Value of Operating Businesses
