## Business Update Release

### Business Update – Silver Touch Technologies Strengthens Digital Infrastructure Footprint in the Power & Energy Sector

The Company has been engaged by Gujarat Urja Vikas Nigam Limited (GUVNL) — the Government of Gujarat's holding company overseeing generation, transmission and distribution of power across Gujarat under the state's Energy and Petrochemicals Department — to provide comprehensive management and OEM-authorised support of the core IT infrastructure underpinning GUVNL's enterprise systems. This engagement covers the computer servers, storage Systems, SAN-Switches, Tape Library and backup architecture with Silver Touch committed to ensuring application uptime services at a 99% SLA that empower GUVNL's e-Urja platform, the ERP backbone connecting the state's electricity generation, transmission and distribution utilities and serving over a crore consumer. This reaffirms Silver Touch's role as a trusted technology partner, keeping Gujarat's critical government infrastructure running reliably, around the clock.

#### Strategic significance

Power and energy utilities sit at the heart of national critical infrastructure — their IT backbones must run continuously, securely and without compromise, as any disruption carries consequences far beyond the enterprise itself. This engagement positions Silver Touch Technologies as a trusted partner safeguarding that continuity for one of Gujarat's most vital public utilities, and reflects three areas of deliberate strategic focus for the Company:

- **Deepening presence in Power & Energy:** extending the Company's engagement with Gujarat's power sector ecosystem beyond project delivery into sustained, mission-critical operations support.
- **Critical infrastructure reliability:** delivering the always-on, high-availability infrastructure management that utilities, government and other essential-services clients increasingly demand as they modernise legacy environments.
- **Digital Transformation of public sector enterprises:** reinforcing Silver Touch's role in enabling large public utilities to run resilient, future-ready digital cores as they scale citizen and enterprise services.

This engagement builds on the Company's long-standing track record in e-Governance and Government/PSU technology delivery, and reflects its continued strategy of expanding into infrastructure management and managed services for sectors where uptime and reliability are non-negotiable.

This update is being shared for the information of shareholders and the investment community. Kindly take the above on record.
