PRESS RELEASE

Duroply launches DURO HDMMR™ — High Density Max Moisture Resistant Engineered Board

Kolkata, September 9, 2026:

Duroply Industries Limited is expanding its existing product portfolio in the engineered wood panel category. The Company will trade in MDF/HDF boards starting its first product line under the brand name **DURO HDMMR™**.

Engineered with a dense, calibrated core and heat-treated construction, **DURO HDMMR™** is designed to resist warping and moisture-related damage over time, holding its shape, screws, and finish under conditions that test ordinary boards. Suited for environments exposed to moisture, pests, and frequent use, it is built for daily-use applications — not display purposes alone.

The Company has adopted an asset-light business model, without any investment in manufacturing infrastructure.

Commenting on the launch, Mr. Akhilesh Chitlangia, Managing Director & CEO, Duroply, said:

*"The launch of **DURO HDMMR™** marks an important step in Duroply's product portfolio expansion and our entry into the MDF/ HDF category. We see significant potential in high-density fibreboard solutions as applications across furniture, interiors and other specialised segments continue to evolve. Through **DURO HDMMR™**, we aim to provide customers with a reliable, high-performance board solution backed by the Duroply brand."*

*Developed to address the growing demand for high-performance wood panel solutions, **DURO HDMMR™** is a product designed for applications requiring strength, stability, durability and a high-quality finish."*
