LG Electronics India Delivers Its Strongest Quarterly Growth Since Listing

Ahmedabad, LG Electronics India Limited (LGE India), India's leading consumer electronics brand, today announced results for the first quarter of FY27, opening the year with growth across every category of its portfolio and a sustainable step-up in profitability, led by premium demand across all categories. LGE India delivered revenue from operations of ₹72.33 billion in Q1 FY27, up 15.5% over ₹62.63 billion in Q1 FY26. EBITDA rose 26.2% to ₹9.04 billion, with margin expanding 106 basis points to 12.5%, while profit after tax grew 27.2% to ₹6.53 billion. This was a quarter where profitability outpaced revenue, driven by a richer premium mix, better operating leverage on higher volumes and continued cost discipline. What distinguished the quarter was the breadth of the growth. Every category contributed to growth - televisions led on a consumer

interest for larger screens, refrigerators grew on premium capacities, air conditioners on extended summer demand, and washing machines kept pace with peak-season categories despite being out of season. This combination reflects growth that is fundamental and portfolio-led, not dependent on any single season or category. Highlighting the results, Mr. Hong Ju Jeon, Managing Director, LG Electronics India Limited, said, "India's consumer durables market is undergoing a structural shift towards premium, technology-led and energy-efficient products - and this quarter demonstrates that our portfolio is built for precisely that shift.
