Partnership with PepsiCo India for seamless 3PL operations

Contract of 3 PL operations in warehousing & dispatches of PepsiCo at North India

AVG Logistics has bagged prestigious project from **PepsiCo India Holdings** as its logistics partner at one of its largest facilities located in **Kosi Kalan, Uttar Pradesh**.

It involves end-to-end 3 PL operations for PepsiCo's wide range of snacks, handling over a **million cases** per month with benchmark turnaround times to ensure **quality and speedy shipments** across the country.

This engagement marks a significant milestone in AVG Logistics' journey, further reinforcing its credentials in the **FMCG** sector. With a proven track record of delivering seamless logistics solutions, AVG already counts industry leaders like **Nestlé, HUL & ITC** among others esteemed clientele.

Key Highlights- New addition in Fleet segment

AVG became the **first company in India to acquire a fleet of 5 high-tonnage (55 MT) electric vehicles (EVs)**. This milestone was marked by a ceremonial handover in Jamshedpur in March 2025, graced by **Mr. N. Chandrasekaran (Chairman), Mr. Girish Wagh (President), and Mr. Rajesh Kaul (VP & Business Head)**. I've attached a few photos and media coverage for your reference.

Bangalore - Delhi Train Launch

TRANS INDIA
SWR Bengaluru division flags off first PCET

HEAVY SERVICE BENGALURU

The first Parcel Cargo Express Train (PCET) of the Bengaluru division was flagged off from Yesvantpur Railway Station. The inaugural special train will run between Yesvantpur (Bengaluru) to Okhla (New Delhi).

The South Western Railway, Bengaluru Division has leased out PCET to M/s AVG Logistics Ltd with a frequency of 2 round trips per week from Bengaluru (Yesvantpur) to Delhi (Okhla) and back. The total value of the contract for 5 years is Rs. 240 crore. The PCET is a novel initiative by the Indian Railways to lease out an entire train on a month-to-month basis for loading parcels for a period of 5 years. An average PCET consists of 25 parcel vans and 1 brake van. They can transport 350 tonnes of materials in a single trip. After a span of 8 months, the composition is increased to hold 20 parcel vans and 1 brake van with a total extended capacity of 400 tonnes. In a month, at least two trips need to be operated. Being time-scaled trains with lesser transit time, customers will be able to transport parcels in bulk quantity. In the first 3 years, no escalation in freight will be allowed but 10 per cent of escalation will be permitted from the 4th year. The service is expected to attract transport from road traffic to railways.

Nestle South Asia Head LinkedIn post on EV Launch

Balbir S Bhalla · 1st
Transportation-Hub Lead for SAR region at Nestle

The first electric vehicle, capable of carrying a payload of 35 tonnes, has been deployed at one of our state-of-the-art factories in Sanand. This electric vehicle will operate between Sanand and Bhiwandi, representing another stride toward environmentally friendly transportation. Our roadmap aims to fully green this route, with plans to integrate it with existing LNG vehicles. We prioritize genuine partnerships, exemplified by our service provider aligning with Nestle's vision of accelerating greener transportation.

Disruptive & Innovative Customised Solutions

AVG Logistics Limited has always stayed at the forefront of providing customised logistics solutions aimed at:

Cost optimization
 Reducing human intervention
 Optimum utilization of resources and capacity
 Environmentally friendly operations

45-ft Reefer

- Temperature-controlled vehicle with a payload of 22 tonnes
- Equipped with state-of-the-art insulation, safety parameters and predictive alerts
- Benefit customers by optimizing cost and moving towards sustainable transportation

Zero Residual Food Grade Tanker

- State-of-the-art customized Tankers for FMCG clients
- Help in optimum utilization of resources, owing to zero residues
- Payload of 22 Tonnage with a volume of 32m3

Curtain Multi-door Truck

- Customized Multi-door truck with 2 levels
- Palletized movement of goods – completely eradicating human intervention
- Helps in delivering the good in an as-is where-is state
- Reduces loading time by almost 80%
- Enhances the safety of operation and preserves the quality of goods handled

Recent Launch of Liquid Cargo Transportation Through ISO Tanks

AVG Logistics Limited takes a bold step toward greener supply chains with the Launch of its Liquid Cargo rail vertical, enabling safer bulk chemical movement through ISO tanks.

Rail-led liquid logistics delivers safer operations, lower transportation costs, reduced carbon emissions, and long-term sustainable value creation driving a greener logistics future.

Liquid Cargo (ISO Tanks)

- Rail-based ISO tank transportation designed for safe bulk liquid movement
- Enables cost optimization, reduced carbon footprint, and sustainable logistics solutions
- Compliant with stringent safety standards, real-time monitoring and risk-mitigation protocols

Inauguration – Launch of ISO Tank

- Celebrates leadership vision, partner collaboration, and team commitment in launching a rail-led liquid cargo capability
- Sets a new benchmark for customers through scale-ready capacity, consistency, and operational confidence backed by AVG's trusted logistics solution

AVG Logistics Team

- Demonstrates strong cross-functional teamwork enabling seamless execution and operations
- Solves the challenge of safely transporting bulk liquid chemicals over long distances at scale
- Provides an integrated end-to-end logistics solution from origin to destination

Future Growth Drivers: Unlocking Potential for Success

AVG Logistics aims to capitalize on strong macro tailwinds to define a multi-tiered strategy based on pillars of competence

Key Logistics Mega Trends

Increasing shift to multi-modal logistics on the back of strong investments into railways, shipping, and air freight

Changing customer preferences and rapid growth of e-commerce driving need for 3PL and cold chain services

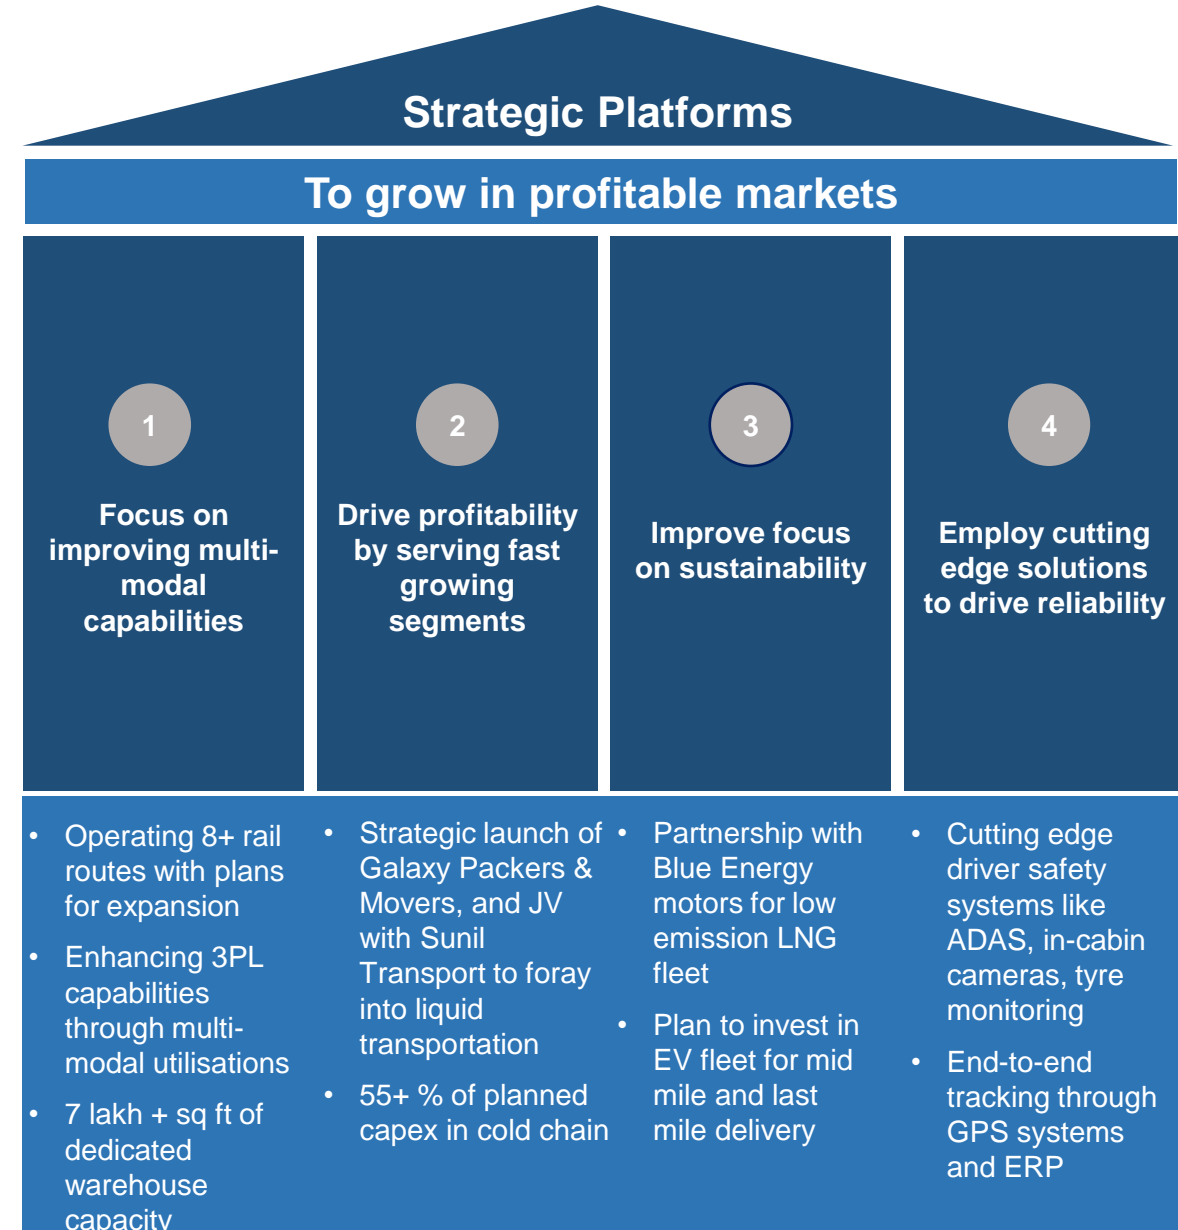

Increasing focus on sustainability as an avenue for greater safety as well as reduced costs

Emerging technology such as ADAS, and GPS tracking to improve reliability and safety of logistics operations

Regulatory focus and government policies such as NLP, ULIP (Unified Logistics Interface Platform) and ONDC (Open Network for Digital Commerce) to promote efficiencies and drive investments at scale

Empowering Supply Chain with Strategic Tech Initiatives

- AVG Logistics revolutionizes the supply chain industry by empowering it with strategic tech initiatives. With a strong focus on operations and warehousing, digital transformation, IoT devices, and central monitoring systems.
- Our dedicated tech team ensures seamless implementation of innovative solutions, enabling a streamlined and sustainable supply chain. Experience the power of strategic tech initiatives and unlock the true potential of your supply chain with AVG Logistics.

AVG Logistics aims to elevate performance while making logistics sustainable and safe for all its stakeholders

Delivering customer centric operations by adding value at every step

- **Our aim is to truly be a moving force in Indian logistics:** We have entered segments that move the economy across cold chain, FTL, LTL, packers and movers, LNG, and forayed into exports to Nepal and Bangladesh.
- **We cater to our customers** through several innovations such as curtain multi-door trucks that are fully automated loading, with enhanced safety and reliability, zero residual food grade tankers for FMCG clients, and 45 ft reefer trucks
- We cater to all of our **customers' needs** by now **delivering to 19000+ pincodes in India** through a partnership with Indian Postal Service.

Reducing emissions with every shipment

- We aim to lead the **sustainability revolution** with **multiple modes of sustainable transport** such as **7+ rail routes and potential EV investments**
- **Reduced emissions per km** via partnership with Blue Energy Motors (Essar) to procure LNG powered trucks
- **Young fleets with latest BS VI technology** for reduced emissions

Revolutionizing logistics through technology

- **We are at the cutting edge of innovation** with tech initiatives across payment such as completely cashless collections, ERP systems for logistics management, and white-labelled tracking dashboards
- **Reliability at every step** driven by a central monitoring system with a vehicle tracking system, logistics control tower, fleet management system, and security operations centre, **Tyre Management Systems, etc.**
- **Automating internal processes with intelligent business processes**, data analytics, **green driving indicator**, and online market vehicle data
- **Reduced pilferage** through GPS and GIS, **RFID locks, barcode scanners**, and CCTV enabled warehouses
- **State of the art CRM enabled** by customer portal, app, supplier relationship management and driver app

Growth centred around driver safety

- **Enhanced driver safety through in-cabin cameras, ADAS systems** to enhance safety, optimize fuel consumption and reduce maintenance costs
- **Industry leading driver safety with sedex certification**, and regular training and health check up camps with authorized partners
- **Caring at every step for drivers** with free eye tests, medical checkups, **tie-up with IOCL for Swagat facilities**, along with regular training camps.

Industry Overview

India's Logistics Vision for a Sustainable Future

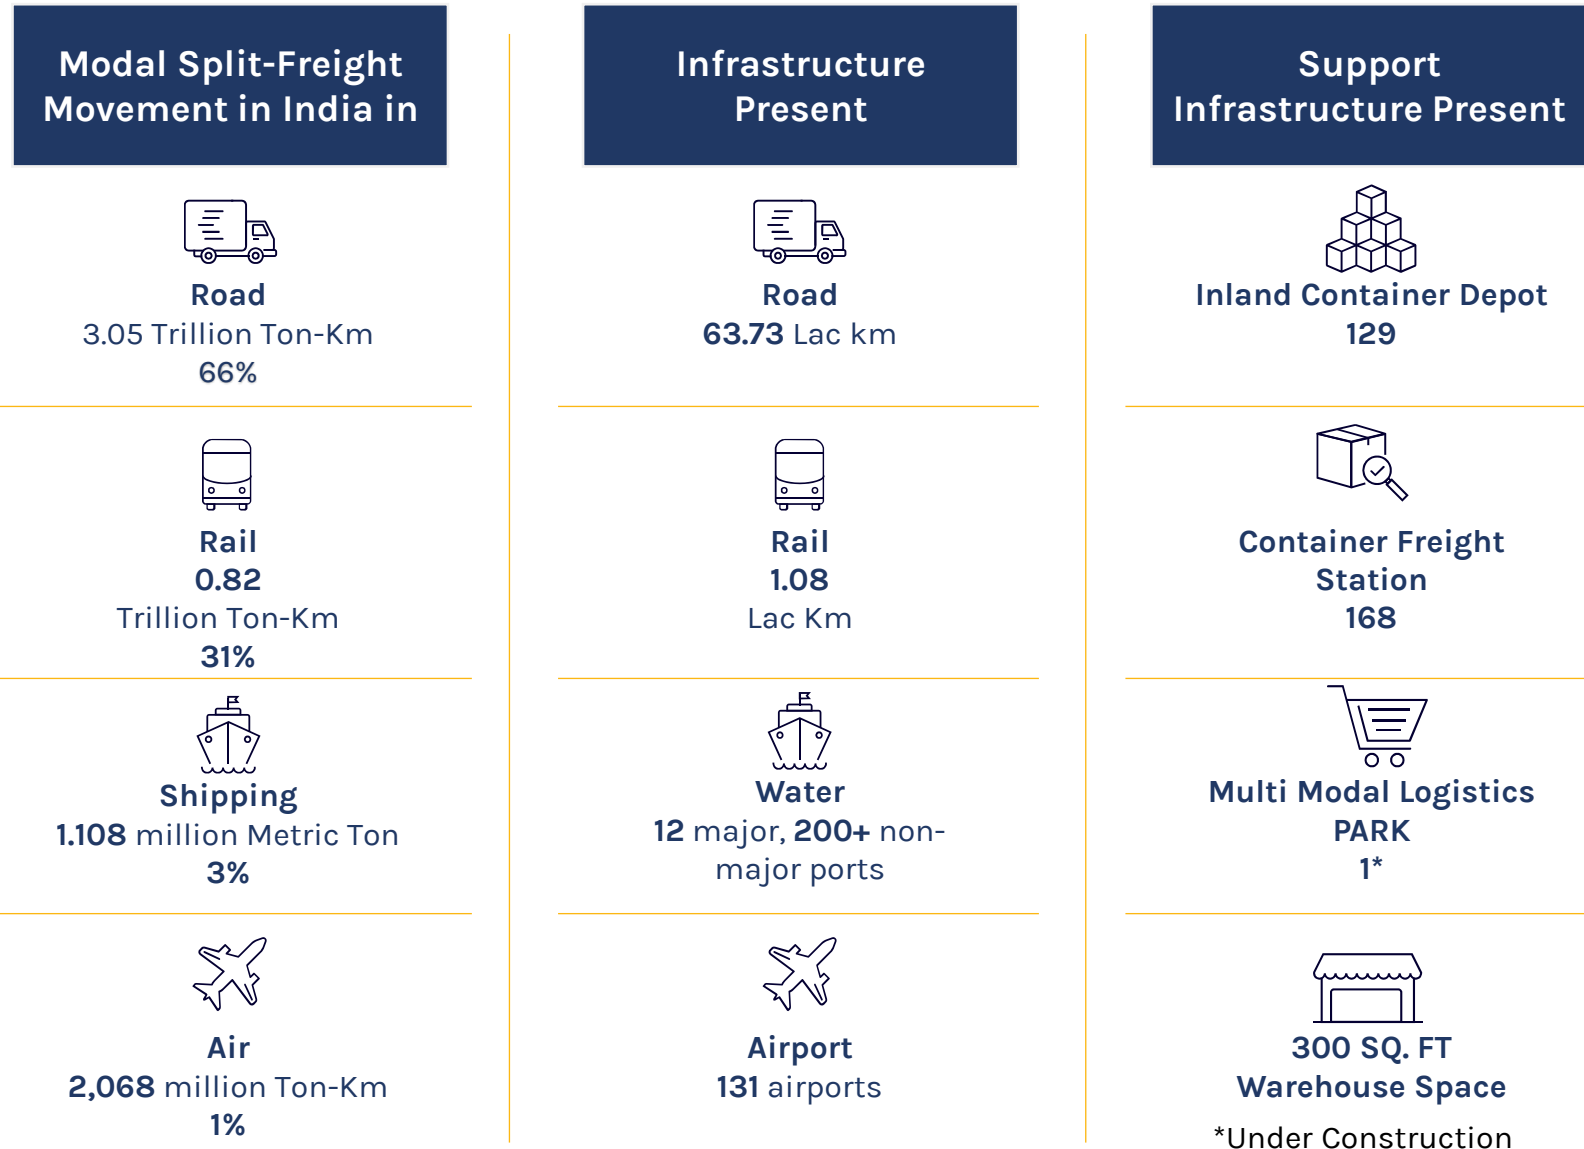

India's Transportation & Logistics Landscape

As of FY22, India's exports grew by 44.6% to US\$422b and imports grew by 55.4% to US\$613b. This growth has propelled the Indian transportation and logistics sector, which has grown between ~US\$160 and US\$200b (INR13- 16 Lakh cr.) in 2022.

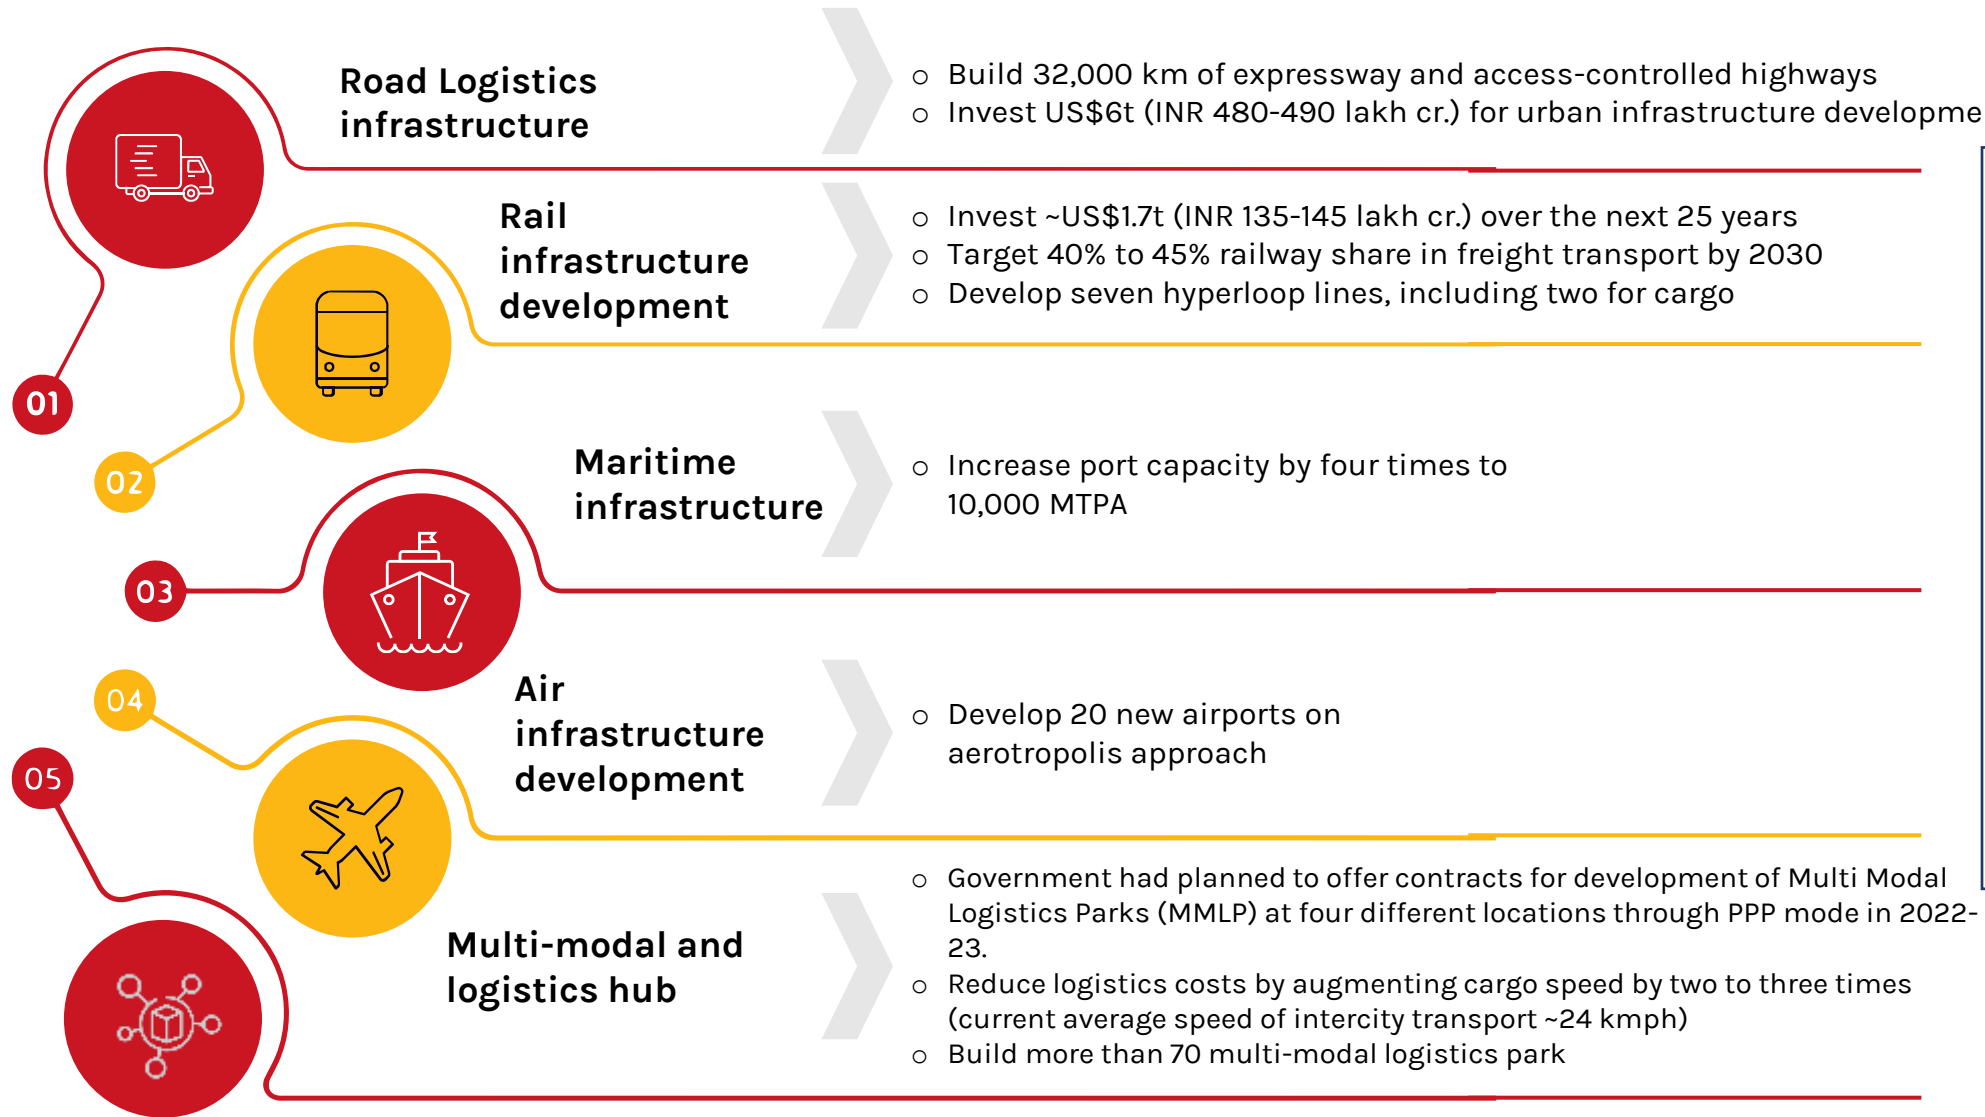

This uneven distribution of modes of transportation has led to low operational efficiency; prompting the GOI to undertake multiple logistics specific initiatives, such as GatiShakti, National Logistics Policy and others. These programs aim to streamline India's logistics sector by making it more green, agile, transparent and integrated.

India aims to reduce logistics cost from 13% to 14% of GDP, to 8% to 10% of GDP, by 2030. It is estimated that a 10% reduction in indirect logistics cost will result in 5% to 8% rise in exports.

(Source: EY Report on Future of Indian Logistics)

Government Initiatives To Improve Infrastructure Aid Logistic Growth

Vision@2047
 aims to set
 specific targets
 for 10 sectors to
 transition India
 into a developed
 nation by 2047.

Budget 2025 & Government Initiatives: Strengthening Infrastructure For Logistics Growth

1. National Infrastructure Pipeline (NIP)

- Aims to boost infrastructure growth, integrated with Make in India and PLI scheme.
- AAI & private airport developers targeting ₹98,000 Cr (US\$ 11.8B) investment.

2. Dedicated Freight Corridors & Gati Shakti Cargo Terminals

- Spearheaded by the Ministry of Railways to enhance freight transportation efficiency.
- Expected to reduce logistics costs and improve cargo handling.

3. Multi-Modal Logistics Parks

- Led by the Ministry of Road Transport & Highways.
- Focus on developing an integrated logistics network to streamline supply chains.

4. Logistics Data Bank (LDB)

- Uses RFID technology for real-time tracking of EXIM container movements.
- Helps in reducing logistics costs and improving transit times.

5. Gati Shakti Master Plan

- Focused on multimodal connectivity for economic zones.
- Part of the NIP with a planned expenditure of \$1.8 trillion by 2025

6. Digital Transformation in Logistics

- Digitization of freight movement for seamless tracking.
- Government focus on AI-driven logistics solutions aligns with tech-enabled supply chain management.

7. Sustainability & Green Logistics

- Incentives for EV adoption in freight transport, enabling logistic companies to expand its sustainable logistics solutions.
- Opportunities to leverage green logistics initiatives for ESG compliance and cost savings.

8. Growth in E-Commerce & Retail Logistics

- Increased budget for rural development and digital connectivity to drive demand for express logistics.
- Growth in domestic production to boost demand for supply chain solutions.

India aims to become a developed nation by 2047, celebrating the 100th anniversary of its independence. This vision encompasses a high quality of life, a robust economy, and advanced technological infrastructure.

These initiatives demonstrate the government's dedication to reshaping the logistics sector. They aim to cut costs, boost efficiency, create significant job opportunities, and foster gender inclusivity, all to support sustainable economic growth.

Government Initiatives to Boost Infrastructure with Freight Corridors

India's **2,843-kilometer Dedicated Freight Corridor network** is driving a major economic shift, enhancing freight efficiency and reducing transit times and costs. The Eastern Dedicated Freight Corridor (EDFC) is fully operational, while the Western Corridor (WDFC) is 93.2% complete, with final stages planned for FY 2024-25. This transformative infrastructure is positioning India as a powerful force across industries.

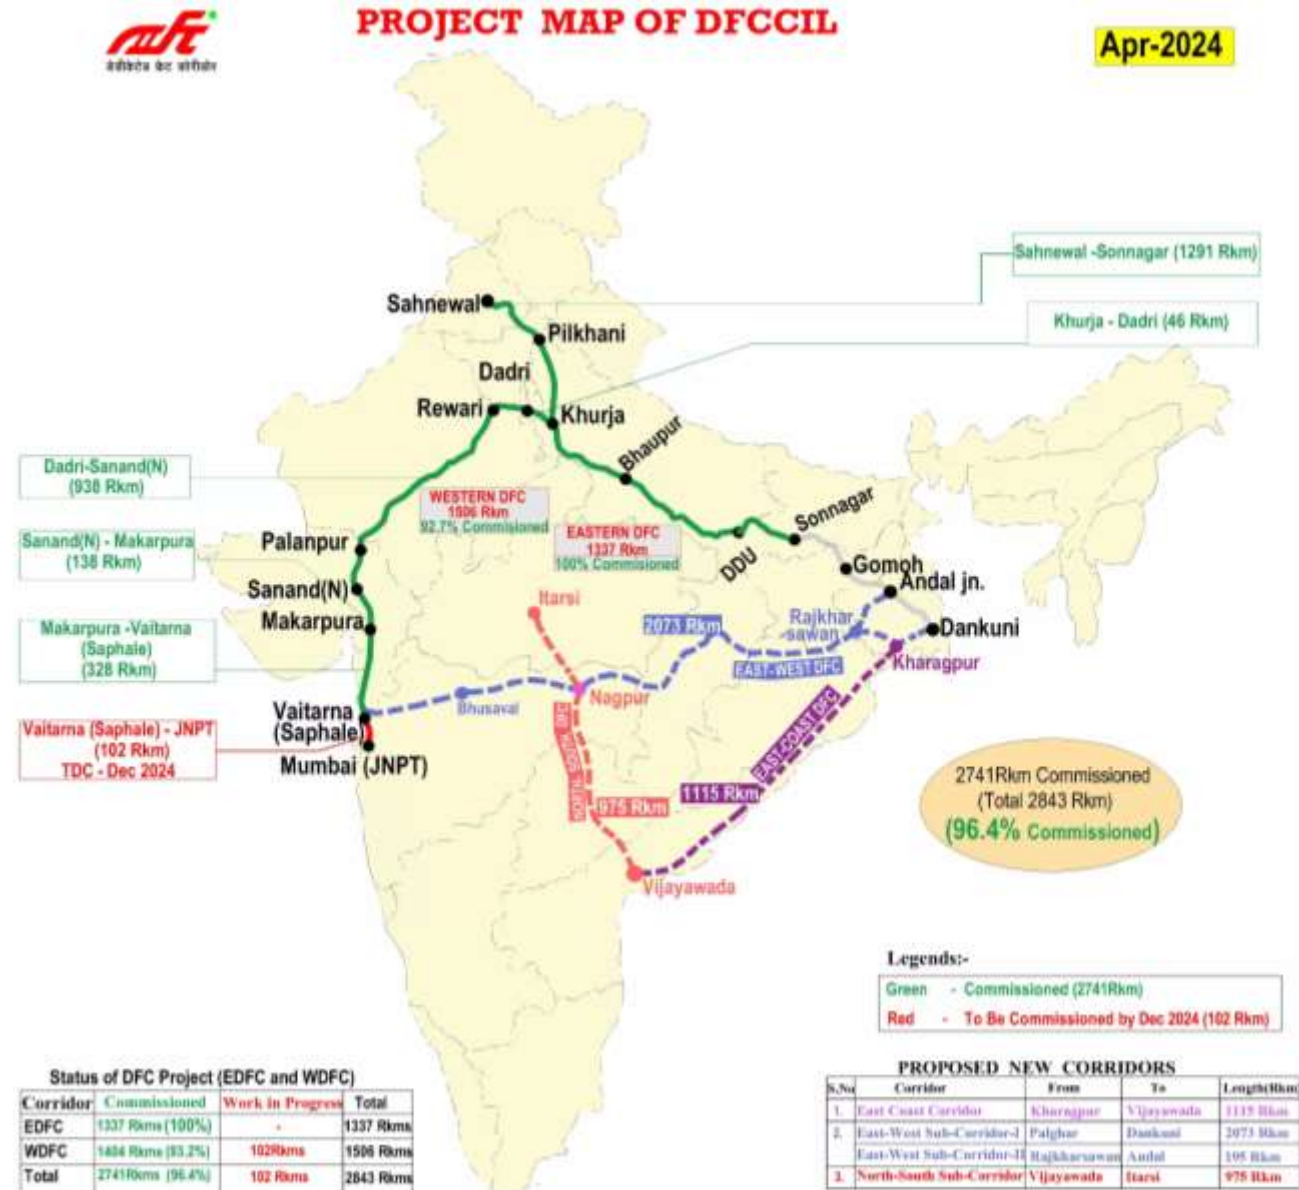

The **Western Dedicated Freight Corridor (WDFC)** covers 1,506 km, connecting Mumbai's JNPT port to Dadri in Uttar Pradesh, passing through Maharashtra, Gujarat, Rajasthan, Haryana, and Uttar Pradesh. The **Eastern Corridor (EDFC)** spans 1,337 km, divided into sections: Sahnewal-Khurja (401 km), Khurja-Bhaupur (351 km), Bhaupur-DDU (402 km), DDU-Sonnagar (137 km), and Khurja-Dadri (46 km).

Impact of Dedicated Freight Corridors on India's Economy and Logistics:

The DFCs aim to transform India's economy and infrastructure, targeting logistics costs **under 10%** as per the National Logistics Policy.

- EDFC and WDFC connect northern landlocked states to western ports, cutting transport times significantly.
- Reduced transit times have lowered power plant inventory costs by **20-30%** and cut NCR-to-port transit times by over half.
- The DFCs support **agriculture, industry, and MSMEs** by enabling faster transport of perishables, reducing spoilage, and boosting income.
- Integrating DFCs with **MMLPs** could streamline operations and reduce logistics costs for e-commerce.

Future Plans: DFCCIL's roadmap includes approved East-West, East Coast, and North-South corridors, with a proposed Southern Corridor, set to transform goods movement and position India as a global logistics hub.

Rails of Progress: Navigating Challenges and Accelerating India's Cargo Growth

In 2022, cargo moved by Indian railways increased by ~7.5% YoY to 1,497 million tons.

Currently, the share of Indian railways in total cargo moved is ~31% and GOI aims to increase this to 44% by 2051. To achieve this growth, challenges such as low level of containerization, higher cost for movement of lighter cargo and insufficient first and last mile connectivity need to be addressed.

Average goods train speed in India increased by 83.5% to 43.2 kmph from FY20 to FY21. However, this pales in comparison to the high-speed freight train (350kmph) running in China.

Rail share in traffic having lead distance of 300 km reduced from 51.5% in FY2008 to 32.4% in FY2019.

Development of new infrastructure and launch of super freight trains like 3.5 km long Super Vasuki is a welcome step for improving rail freight efficiency.

Targets

2030 Goal: Transport 3,000 million tones of cargo.
Revenue Target (2023-24): ₹13,227 Cr from miscellaneous goods.

Environmental Impact

This initiative aligns with global trends in sustainable transportation. By leveraging railways' energy efficiency, it contributes to lower carbon emissions compared to road transport.

Unlocking India's Potential in Cold Chain Logistics

- The India Cold Chain Logistics Market is projected to be valued at **USD 11.64 billion in 2024**, with an anticipated growth to **USD 18.19 billion by 2029**, reflecting a compound annual growth rate (CAGR) of **9.72%** over the forecast period from 2024 to 2029.
- India, a major producer of milk, fruits, vegetables, seafood, meat, and poultry, faces substantial food losses due to insufficient cold chain infrastructure. The Food and Agriculture Organization estimates these losses at **1.3 billion tonnes** annually, costing up to USD 15 billion.
- Currently, India produces **400 Mn MT** of perishables, with a wastage level of 0.9% to 15.9% and the annual value of losses in agricultural produce stands at over **Rs. 92,500 crores**.

India is well-positioned for substantial growth, driven by several key factors that offer significant potential for expansion.

- Over 40% of food losses after harvest highlight the need for better cold chains logistics.
- FAO recommends energy-efficient cold chains to increase food supply by over 15%, or 250 million tons.
- In FY 2021-2022, India exported USD 1.53 billion in fruits and vegetables, mainly to the UAE and neighboring countries.
- With India set to be the fifth-largest economy by 2027, government-backed investment in cold chain infrastructure is being boosted.

	<p>Pharmaceuticals And Healthcare Industry</p> <ul style="list-style-type: none"> ○ Pharmaceutical cold chain logistics market to reach \$21.3 billion by 2024. ○ Precise temperature control during transport is critical for medicines, vaccines, etc.
	<p>Chemical Industry</p> <ul style="list-style-type: none"> ○ Cold chain management ensures quality and safety in chemical transportation. ○ Precise temperature control is essential due to chemicals' value and hazards. ○ Semiconductor advancements demand stricter storage standards.
	<p>Cut Flowers</p> <ul style="list-style-type: none"> ○ Cold chain logistics ensures flowers stay fresh, preventing early blooming and wilting. ○ Professional services guarantee undamaged delivery. ○ Reliable cold chain is crucial for wholesalers to boost sales and reduce losses.
	<p>Processed Foods and Beverages</p> <ul style="list-style-type: none"> ○ Cold chain logistics ensures temperature-controlled storage for: <ul style="list-style-type: none"> ▪ Perishable Fruits, Vegetables & Dairy: 7°C to 14°C ▪ Fresh Produce: 14°C to 24°C

Green Logistics: A Sustainable Approach

- According to the World Bank, transport-related emissions currently make up nearly **20%** of global energy-related CO2 emissions, a number expected to increase by **60%** by 2050 if not addressed.
- India's transport sector is the **third-largest** GHG emitter, contributing **14%** of CO2 emissions, with growth expected as urbanization increases, requiring urgent action for net-zero by 2070.
- Road transport emits six times more than industrial enterprises and significantly more than rail transport.
- Rapid transition to alternative fuel technologies like EV, LNG, and CNG fleets to meet Net Zero targets and corporate ESG commitments.
- Air pollution is a major issue in India, with 35 of the world's 50 most polluted cities. Transport emissions, making up **20-30%** of urban pollution, directly impact public health.

Green logistics for a better tomorrow

Given the environmental impact of logistics, exploring sustainable alternatives is crucial for a better future.

- Rising fuel costs are driving companies to adopt energy-efficient logistics, like electric vehicles and optimized routes, reducing expenses and carbon footprints.
- Consumer demand for sustainability is driving companies to adopt green logistics, boosting brand loyalty and competitiveness.
- Stricter regulations are driving companies to adopt green logistics to avoid penalties and meet growing demand for sustainability.
- CSR drives green logistics by meeting sustainability goals, boosting brand reputation, attracting eco-conscious consumers, and improving efficiency while ensuring regulatory compliance.

Electrification of Logistics : The Tipping Point

Electric vehicles (EVs) are no longer a niche experiment; they are becoming a mainstream logistics solution, particularly for urban and last-mile deliveries.

- **Market Growth:** The global electric commercial vehicle market is projected to reach \$558 billion by 2030, growing at a 31% CAGR.
- **Cost Efficiency:** EVs have up to 40% lower operating costs than diesel alternatives due to reduced fuel and maintenance expenses.
- **Infrastructure Expansion:** India targets 46,000 public EV charging stations by 2030, with policies incentivizing fleet adoption.

Green Logistics: Government Support for a Sustainable Planet

The Sustainable Development Goals aim to create a better, sustainable future by addressing global challenges like poverty, inequality, climate change, and peace. All 17 interconnected goals must be achieved by 2030 to leave no one behind.

Green logistics, which emphasizes eco-friendly practices in transportation, distribution, and supply chain management, is crucial for achieving these SDGs. By focusing on these areas, we can protect the planet, preserve ecosystems, and ensure a sustainable future for all.

BHARATMALA
ROAD TO PROSPERITY

BharatMala Pariyojana

BharatMala Pariyojana contributes to green logistics by optimizing road traffic, reducing fuel consumption through efficient routes and bypass roads, and promoting the development of Multi-Modal Logistics Parks (MMLPs) for integrated transportation.

Additionally, the inclusion of dedicated freight corridors enhances freight movement, reducing emissions and encouraging the use of more eco-friendly transport modes like rail and waterways.

SAGARMALA
PORT-LED PROSPERITY

Sagarmala Programme

The Sagarmala project enhances green logistics by modernizing port infrastructure, promoting Direct Port Delivery (DPD) and Direct Port Entry (DPE) to reduce emissions, and encouraging modal shifts to coastal and inland waterways, which are more fuel-efficient.

The development of Coastal Economic Zones (CEZs) further optimizes supply chains, minimizing transportation distances and lowering fuel consumption and emissions.

Multimodal Logistics Parks

20% less congestion from larger truck and rail freight.

Inter-modal connectivity with rail, highway, and port/airport links.

Reduced handling costs with advanced mechanized infrastructure.

Enables hub-and-spoke transport, reducing costs with an efficient fleet.

Part Truck Load: A Flexible Solution in Modern Logistics

- Estimated domestic market size: Approximately \$11 billion, surpassing B2B express logistics.
- PTL has a wider reach and is more cost-effective than express logistics.
- Post-GST, PTL's share increased due to fewer state-specific constraints.
- Industry is evolving due to changing consumer behavior, modern trade, and digitization.
- PTL serves various sectors like Textile, Automobiles, Electronics, e-commerce, FMCG, and more.
- Growth in Multi Modal Logistics Parks (MMLP) offers opportunities for PTL.
- Expect consolidation of small, unorganized players in the PTL industry through collaboration or mergers and acquisitions.

The PTL segment has grown at a CAGR of 8-10% in the last 5 years. Historical data indicate that the PTL industry grows at one and half times of the nominal GDP growth rate. As per our estimate, the PTL segment may grow at a CAGR of 5.5%-6.6% in the short term and this growth may increase to 8%-9% in the longer term
