Sub: EKI Energy Services Expands Global Plastic and Circular Economy Portfolio with First Verra-Registered Plastic Project in Bangladesh

Dear Sir(s),

EKI Energy Services Limited is pleased to announce that the Company has **successfully registered its Plastic Waste Reduction Project in Bangladesh, Phase I, with Verra**. Notably, this marks the first registered plastic waste reduction project in Bangladesh.

The project is registered under Verra's Plastic Waste Reduction Standard and represents a strategic expansion of EKI's plastic waste recovery, recycling and circular economy solutions across international markets.

A copy of the Press Release issued by the Company in this regard is enclosed herewith for your information and record.

The above information will also be made available on the website of the Company at www.enkingint.org.

We request you to kindly take the above information on record.

Thanking you

Yours Faithfully

For EKI Energy Services Limited

Yash Joshi
Company Secretary and Compliance Officer

EKI Energy Services Expands Global Plastic and Circular Economy Portfolio with First Verra-Registered Plastic Project in Bangladesh

- *It marks a significant milestone in EKI's expansion of plastic waste solutions across international markets.*
- *It strengthens EKI's growing portfolio of plastic waste recovery, recycling and circular economy solutions.*
- *It reinforces EKI's position as a leading global Carbon Credit Developer & Supplier and strengthens its presence across emerging environmental markets.*

India - 19th August, 2026: EKI Energy Services Limited (EKI), a leading global Carbon Credit Developer and Supplier, has announced the successful registration of its Plastic Waste Reduction Project in Bangladesh, Phase I, with **Verra**. Notably, this marks the first registered plastic waste reduction project in Bangladesh.

The project is registered under Verra's Plastic Waste Reduction Standard, a global framework established to support plastic waste collection and recycling activities while developing credible environmental markets for waste reduction. For EKI, this milestone reinforces its strategy of providing solutions that address climate change alongside broader environmental challenges.

This initiative represents a strategic expansion into a major South Asian market. Through the project, EKI aims to implement structured approaches to plastic waste recovery, contributing to the development of more circular material flows.

Addressing the significant global challenge of plastic pollution requires channelling environmental finance toward activities that improve waste management systems. By adhering to Verra's rigorous monitoring, verification and certification processes, the project will generate Plastic Credits that help increase the collection of waste and the availability of recycled plastic feedstock, preventing valuable materials from entering landfills or leaking into the environment.

Commenting on the development, Mr. Manish Dabkara, Chairman and Managing Director of EKI Energy Services Limited, said: *"The registration of our first plastic project in Bangladesh is an important milestone in EKI's journey of expanding environmental solutions across geographies. Plastic waste is a global challenge that requires structured systems for collection, recovery and recycling, supported by credible environmental markets. Our experience in developing a plastic project in India gave us valuable insight into the potential of this sector. Taking that experience into Bangladesh strengthens our ability to support the development of circular economy solutions while creating new opportunities for environmental finance. We remain focused on building a global portfolio of high-impact projects that can deliver measurable environmental value and contribute meaningfully to a more sustainable future."*

“EKI will continue to explore opportunities to develop and scale credible plastic waste reduction projects across geographies, supporting the growth of environmental markets while contributing to practical solutions for plastic pollution.”, he added.

This successful registration reflects the continued evolution of EKI’s global portfolio. With operations and clients spanning multiple countries, the company is broadening its offerings beyond traditional carbon asset management to address emerging environmental challenges. By combining its established expertise in climate finance and project development with innovative solutions in plastic waste management, EKI continues to drive practical interventions for the circular economy.

About EKI Energy Services Limited

EKI Energy Services Limited (EKI) is a leading Carbon Credit Developer & Supplier across the globe. Founded in 2008, the Bombay Stock Exchange (BSE) listed company has been passionately working towards rehabilitating the planet to a future of net-zero carbon emissions. EKI offers sustainable solutions for climate change and carbon offsets with global standards including CDM, VCS, Gold Standard, GCC, IREC, TIGR and others. With an aim to contribute to the development of a climate-resilient global economy, EKI offers strategic solutions to businesses and organisations globally to achieve their climate ambitions. The company’s offerings span Carbon Credit and Asset Management, Carbon Credit Generation, Carbon Credit Supply, Carbon Credit Offsetting, Carbon Footprint Management, Sustainability Audits, Carbon Neutrality and Climate Positive initiatives, alongside emerging environmental solutions.

EKI is present in 16+ countries and has 3,500+ clients across 40+ countries worldwide. As on date, EKI has supplied over 200+ million offsets. The company has also established a strong track record in environmental markets, including becoming the first company to list a plastic project from India with Verra.
