Dear Sirs,

Sub.: Suzlon 3 MW platform sales reach nearly 9 GW with a new 195 MW order from Sunsure Energy.

This is to inform that Suzlon 3 MW platform sales reach nearly 9 GW with a new 195 MW order from Sunsure Energy. The press release in this regard is attached herewith.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

Geetanjali S.Vaidya,
Company Secretary.

Encl.: As above.

For Immediate Release | 22nd May 2026

Suzlon 3 MW platform sales reach nearly 9 GW with a new 195 MW order from Sunsire Energy

Suzlon's most successful platform S144 secured over 2.4 GW of orders in FY26, reflecting strong market demand

Key Highlights of the Order:

Suzlon's orderbook crosses 2 GW in Karnataka with this order	Continued partnership with Sunsire Energy now nears 300 MW	Supplying 65 S144 WTGs with a rated capacity of 3.0 MW	Project to be executed in Bijapur district of Karnataka
--	--	--	---

Pune, India: In line with its continued growth momentum, Suzlon has secured a repeat order of 195 MW from Sunsire Energy, taking the total sales of its highly successful 3MW platform to nearly 9 GW. This milestone reflects strong and sustained market adoption for the Suzlon 3X platform. This order builds on the ongoing partnership between Suzlon and Sunsire, bringing the cumulative partnership to nearly 300 MW across Maharashtra and Karnataka, and is expected to grow further.

With this order, Suzlon's orderbook in Karnataka now stands at over 2 GW milestone, marking a key milestone in one of India's leading wind markets. Suzlon's current installed base in Karnataka stands at 1,500MW, contributing to 24% of Suzlon's installed base in South India.

Suzlon will install 65 state-of-the-art S144 wind turbine generators (WTGs), each rated at a 3.0 MW capacity. It will supply wind turbines, execute the project, including erection and commissioning. Suzlon will also undertake comprehensive operations and maintenance services post-commissioning. The project is set to be executed in the Bijapur district of Karnataka. In addition, Suzlon is also executing other large commercial and industrial (C&I) projects in the state, with a total capacity of 664 MW.

Girish Tanti, Executive Vice Chairman, Suzlon Group, said, *"As highlighted by Shri Narendra Modi in his recent Mann Ki Baat address, India's growing focus on renewable energy, especially wind is playing a critical role in building an energy-secure future. Our 3 MW platform is contributing to this vision immensely as our most successful innovation yet and a key driver for Suzlon's growth in India. Additionally, Karnataka has emerged as our largest market by orderbook with over 2 GW orders from our existing orderbook, making it a top priority market for us alongside Gujarat, Tamil Nadu, Rajasthan and Maharashtra. The strong growth is driven by rising demand from the large commercial and industrial (C&I) segment, where wind is increasingly preferred for RTC solutions."*

Shashank Sharma, CEO, Sunsire Energy said, *"The next generation of clean energy infrastructure will not be the one that works when the sun shines or the wind blows - it will be defined by its ability to deliver power when India needs it the most. At Sunsire Energy, we are pioneering this next generation of renewable energy infrastructure by building reliable, round-the-clock renewable power solutions that will power and decarbonize India's industries, emerging AI and data centre demand, electric mobility, and the broader deep electrification of the economy. As we rapidly scale our RTC portfolio, partnering with Suzlon for wind energy was a natural choice, given their proven track record of reliably executing large-scale projects. Backed by their advanced technology platform and strong lifecycle O&M capabilities, we believe this partnership will play a pivotal role in accelerating the growth of our renewable energy portfolio and shaping India's clean energy future."*

Ajay Kapur, Chief Executive Officer, Suzlon Group, said, *"We have built close to 300 MW of partnership with Sunsire Energy, driven by our consistent focus on quality, execution, and lifecycle support, which makes us a dependable partner for large and critical projects. This repeat order reflects the trust placed in our capabilities."*

About Sunsure Energy

Founded in 2014, Sunsure Energy is India’s preferred Round-the-Clock renewable energy solutions provider for leading businesses and utilities. As a leading Independent Power Producer (IPP), Sunsure enables corporations across India to embrace clean energy with ease and confidence through long-term Power Purchase Agreements (PPAs) that offset up to 100% of their power use with round-the-clock clean energy (RE-RTC) from solar, wind, and battery storage solutions. Sunsure is backed by Partners Group AG with an equity commitment of \$400 million towards its vision of building the largest industrial decarbonisation company in India and Southeast Asia. With 700 MW operational RE assets, 7.10 GW under various stages of development and construction across Maharashtra, Uttar Pradesh, Tamil Nadu, Rajasthan, and Karnataka, and a target of 10 GW operational capacity by 2030, Sunsure is committed to Making India’s Power Move. <https://sunsure-energy.com>

About The Suzlon Group

The Suzlon Group is a leading global renewable energy solutions provider, with ~21.5 GW* of wind energy capacity installed across 17 countries. Headquartered at Suzlon One Earth in Pune, India, the Group includes Suzlon Energy Limited (NSE: SUZLON, BSE: 532667) and its subsidiaries. A vertically integrated organisation, Suzlon has in-house R&D centres in Germany, the Netherlands, Denmark, and India, and world-class manufacturing facilities across India. With 30 years of operational excellence and a diverse workforce of 8,500+ employees, Suzlon is India’s No. 1 Renewable Energy Solutions company, having an installed base of 15.5 GW of assets and an additional ~6 GW installed outside India. Its portfolio includes the advanced 2.x MW and 3.x MW series of wind turbines.

**Global installations of Suzlon-manufactured wind turbine generators. Data as of 31st December 2025*
