Mamata Machinery Reports Q1FY27 Results. Healthy Order Intake, Execution Deferred on Customer Working Capital Pressures.

Ahmedabad, India – August 14, 2026: Mamata Machinery Limited ('Mamata' or 'the Company'), a leading machinery solution provider in the flexible packaging industry, announced its financial results for the quarter ended June 30, 2026.

Q1FY27 Highlights

REVENUE	EBITDA	PAT
3,628 Lakhs 6% YoY	(470) Lakhs	(347) Lakhs

Commenting on the results, Apurva Kane, Chief Executive Officer, said:

"Revenue from Operations for Q1FY27 declined 6% YOY, on account of slower execution as customers deferred machine deliveries, reflecting the continued effects of the polymer price escalation triggered by the West Asia crisis. Order intake & business visibility has remained healthy during the quarter, in line with our business outlook for FY27, and as reflected in our order backlog at the end of FY26. However, the sudden and significant rise in polymer prices has increased working capital requirements for our customers, particularly the converter category, leading them to divert capital from CAPEX projects towards the more urgent needs of immediate working capital. As a result, customers are requesting us to push back deliveries, making revenue booking and dispatches challenging in the near term. We expect execution to pick up in the latter part of the year as some of these pressures subside.

On the profitability front, gross margins remained healthy, registering an increase on both YoY and QoQ basis, signalling a healthy mix and underlying profitability. On the OPEX front, Other Expenses were higher due to exhibitions and trade shows during the quarter, including our presence at Interpack 2026 in Düsseldorf in May. Employee Benefit Expenses also registered some increase. These costs weighed on our EBITDA during the quarter, which should normalise, mainly as exhibition and trade show expenses normalise as a percentage of the top line over the rest of the year.

On the operational front, a key recent development was our recyclable film technology RecTech™ receiving 100% Recyclability Certification in the European Union in August, further establishing the case for the commercial viability of this technology. We now await the certification from the Association of Plastic Recyclers (APR), USA.

Looking ahead, we are cautiously optimistic about our business outlook for FY27. While some headwinds from the previous year, such as tariffs, have subsided, newer ones have emerged in the form of the West Asia crisis. We are navigating these strategically, ensuring business growth while maintaining a robust balance sheet position."

About Mamata Machinery Limited:

Mamata Machinery Limited is a leading global provider of total flexible packaging machinery solutions, offering a comprehensive range of products across the value-chain, from co-extrusion to converting and advanced packaging machinery. With over 35 years of industry experience, Mamata has established itself as a trusted engineering enterprise, boasting more than 5,400 machine installations in 80 countries worldwide. The Company is renowned for its consistent innovation and numerous industry-first product introductions, delivering cutting-edge solutions that address the evolving needs of the flexible packaging sector. Mamata's commitment to technology, quality, and customer-centric design has made it a preferred partner for businesses seeking reliable and efficient flexible packaging solutions on a global scale.
