Dear Sir/Madam,

Sub: Investor Presentation - Q2-2026-27 - Disclosure under Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

In terms of Regulation 30 and other applicable provisions of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we send herewith the Investor Presentation on the Unaudited Standalone and Consolidated Financial Results of the Company for the quarter and half year ended 30th September, 2026.

The said Investor Presentation is also being uploaded on the website of the Company (www.transformerindia.com).

Please take the same on your record.

Thanking you,

Yours faithfully,

For Transformers and Rectifiers (India) Limited

REENGINEERING
THE FUTURE OF
POWER

ISO 9001: 2015,

ISO 14001: 2015

ISO 45001: 2018 Certified Company

This presentation has been prepared by Transformers and Rectifiers (India) Limited solely to provide information about the Company to its stakeholders.

No representation or warranty, express or implied is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of such information or opinions contained herein. None of the Company nor any of its respective affiliates, advisers or representatives, shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising from any use of this presentation or its contents or otherwise arising in connection with this presentation.

The information contained in this presentation is only current as of its date. The Company may alter, modify or otherwise change in any manner the content of this presentation, without obligation to notify any person of such revision or changes. Certain statements made in this presentation may not be based on historical information or facts and may be "forward-looking statements", including those relating to the Company's general business plans and strategy, its future financial condition and growth prospects, and future developments in its industry and its competitive and regulatory environment. Actual results may differ materially from these forward-looking statements due to number of factors, including future changes or developments in the Company's business, its competitive environment, information technology and political, economic, legal and social conditions in India.

Please note that this presentation is based on the publicly available information including but not limited to Company's website and Annual Reports.

This communication is for general information purposes only, without regard to specific objectives, financial situations and needs of any particular person. Please note that investments in securities are subject to risks including loss of principal amount.

This presentation does not constitute an offer or invitation to purchase or subscribe for any shares in the company and neither any part of it shall form the basis of or be relied upon in connection with any contract or commitment whatsoever.

OVERVIEW OF TARIL

Leading Indian manufacturer of Power, Distribution & Specialty Transformers and Reactors

- Most preferred Indian Brand due to its designing expertise, technology know how and a legacy of 4 decades of operations
- Promoted by first generation entrepreneur Mr. Jitendra Mamtara, a bachelor's in electrical engineering and a well respected name in Indian Power Industry
- TARIL manufactures entire range of transformers viz. Power, Distribution, Furnace, Specialty, Rectifier Transformers & Shunt Reactors, Solar Application Transformers, Earthing Transformers creating a unique positioning for itself in the transformer industry
- Product capabilities across 5 kV-1,200 kV and 0.5 MVA-500 MVA
- Serves Utilities, EPC players, Industrials, and Renewable Energy Sectors
- Installed capacity of 75,000 MVA across 3 plants; supported by backward integrated manufacturing facilities in Gujarat
- International presence in 40+ countries

Q2FY27 & H1FY27: Operational Metrics & Updates

₹3,283 crore

New Order Inflow during the Quarter

Major Orders Received:

- Secured first-ever order in nuclear power sector, supplying Generator Transformers for NPCIL's Kaiga Units 5 & 6 project, marking a strategic entry into a high-value infrastructure segment.
- Received large transformer order from Megha Engineering & Infrastructures Ltd. in August 2026 with execution scheduled over the next 35 months.
- Received LOI from APTRANSCO in Aug 2026 for transformer manufacturing, with deliveries planned within 13 months.
- Won large order from Damodar Valley Corporation in Oct 2026 for manufacturing and supplying 500 MVA and 200 MVA Auto Transformers, to be executed within 15-28 months.
- Secured large order from GETCO in October 2026 for 80 MVAR & 125 MVAR Shunt Reactors and 500 MVA Auto Transformers, with delivery scheduled over 24-30 months.

₹7,237 crore

Un-executed Order Book

Order Book Growth

- 32% growth to Rs.7,237 crore from Rs.5,472 crore in H1FY26

Business Update:

- Completed dynamic short-circuit testing on 7 units
- This test assesses an electrical apparatus's ability (such as a power transformer) to withstand the intense mechanical forces and thermal stresses generated by a sudden fault. Conducted per standards like IEC 60076-5, it ensures components do not deform or fail under maximum peak currents

Revenue Visibility?

- UOB executable over the coming 18-24 Months

Enough manufacturing capacity?

- Adequate capacity in place to execute UOB.
- Expanded transformer manufacturing capacity supports revenue potential of Rs. 5,000-Rs. 6,000 Crore.

Key Monitorable?

- Timely availability of critical raw materials and unforeseen geo-political disruptions remain a key monitorable.

₹21,000 crore

Inquiries under Negotiation

MD & CEO Comment on Q2FY27 & H1FY27

- During Q2FY27, TARIL delivered 66% YoY revenue growth, 97% in Order Inflow and 32% in Order Book.
- During H1FY27, TARIL delivered 35% YoY revenue growth, 161% in Order Inflow and 32% in Order Book.
- Revenue growth is attributable to improved utilization levels at Changodar & Moraiya plant. With the transformer manufacturing expansion nearing completion and commercial production expected to commence around Diwali, we are well positioned to further scale our manufacturing capabilities in H2FY27.
- **FY27 Outlook:** Our performance in Q2 reinforces our confidence in delivering our FY27 guidance, comprising 25% revenue growth, an EBITDA margin of 16%, and a PAT margin of 9% to 10%.
- **Manufacturing Capacity:** Existing and expanded capacities are adequately positioned to support the company's growth objectives, with no additional capacity constraints.
- **Backward Integration:** Commercial commissioning of all facilities put together targeted by Q1 FY28 (after considering delay of up to one quarter)
- **Capital Allocation & Funding:** Capex to be funded through a balanced mix of QIP proceeds, leasing arrangements, internal accruals, and debt if required.
- **QIP Utilization:** Approximately ₹121 Cr of unutilized proceeds from the 2024 QIP remains earmarked for backward integration initiatives.

INVESTMENT CASE

**Industry Tailwinds, Business Model,
Product Portfolio, Manufacturing
Base to Drive Sustainable Growth**

1

Play on Power & T&D Capex Cycle

Beneficiary of strong demand from renewables, grid expansion, electrification & infra spend
Strong opportunity from renewables, HVDC, exports & industrial capex

2

Shift to High-Voltage & Niche Products

Increasing mix of EHV transformers driving higher margins & entry barriers

3

Order Book Visibility

Healthy order book (~₹7,237 Cr) with strong inquiry pipeline ensures sustained growth

4

Preferred Partner to Utilities & Industrial Customers

Customer relationships backed by a proven track record of quality, reliability and execution excellence

5

Operating Leverage & Backward Integration Driving Profitability

Improved capacity utilization & backward integration initiatives leading to faster EBITDA growth vs revenue

Global Transformer Market Set to Double Driven by Grid Modernization & Energy Transition

\$68BN

Global Transformer
Market size 2025

\$137BN

Project Market size by
2036

6.6% CAGR

Strong Long-Term
Growth 2025-2030

+\$65B

Opportunity
Incremental Market Creation

Market expected to nearly double in size over next decade

Key Growth Drivers:

- **Grid Modernization** - Expansion of transmission infrastructure
- **Renewable Integration** - Wind & solar driving transformer demand
- **Aging Infrastructure** - Replacement of outdated grid assets
- **Energy Transition Trends** - Storage + distributed generation growth

Global Transformer Market (\$Bn)

Segment Leadership

- Power transformers dominate demand
- Closed core holds ~38% share

Regional Growth Hotspots

- US: 7-8% CAGR
- India : 8.3% CAGR
- Europe: ~6-7% CAGR

Key Challenges

- Supply chain & lead time issues
- High raw material cost volatility
- Limited component suppliers

Transformer demand is structurally tied to global electrification, renewable integration, and grid resilience investments

India's Growth Opportunity Driven by Energy Transition & Grid Expansion

- India is one of the fastest-growing transformer markets globally
- India transformer market projected at ~\$5–5.6B by 2030–34 (from ~\$2.5–2.6B)
- Strong growth trajectory at ~8.3% CAGR
- New Demand Segments are from data centres expansion, railway electrification and EV charging + hydrogen

Demand driven by

Rapid power consumption growth & urbanization

Grid modernization & T&D investments

Large-scale renewable integration (solar + wind)

Structural demand drivers

Aging infrastructure replacement

Smart grids & digital transformers

Industrial & data centre load growth

Massive Infrastructure Opportunity

Transmission Investment

- ₹7.9 Lakh Crore grid investment planned
- Supporting 900 GW non-fossil capacity by 2035

Renewable Energy

- 500 GW renewable target by 2030
- Solar + Wind expected > 660 GW by 2035

Electricity Demand Growth

- Peak demand to reach ~459 GW by 2035
- Total capacity expected ~1,100+ GW

India Transformer Market Size in USD Bn

~8.3% CAGR growth driven by grid & renewable investments

Transmission

Rs 7.9 L Cr Opportunity
Grid expansion backbone

Renewables

500 GW by 2030
Massive grid integration demand

Data Centres

Rapid Capacity Growth
High-reliability transformer demand

Energy Transition

Hydrogen + EV + Storage
Next-gen load drivers

Industry leader in manufacturing wide range of high voltage Transformers

Power Transformer

Upto 1000 MVA,
1200 kV class

Manufactures a wide range of power transformers with ratings, catering to power generation, transmission, and grid interconnection requirements.

Shunt & Series Reactors

Up to 765 kA

Manufactures Shunt and Series Reactors range up to 125 MVar, 765 kV Voltage Class

Distribution Transformer

500 kVA &
Above

Manufacturing range 500 KVA to 5000 KVA, 33 kV Voltage Class. Primary focus on industrial, renewable energy & special application transformer

Furnace Transformer

250 MVA/120 KA

Manufactures Arc Furnace, Submerged Arc Furnace, Ladle Furnace, Induction Furnace, D C Arc Furnace Transformers

Rectifier Transformer

Up to 160 kA DC

Transformers for AC-DC conversion offering stable voltage control, high efficiency, and low maintenance for electrolysis, smelting, and traction systems.

Specialty Transformer

Upto 1000 MVA

Locomotive Traction Transformers, Mobile Substation Transformers, Earthing Transformers and Reactors Inverter Duty Transformers

% Revenue*	56%	10%	6%	3%	1%	11%
5Y CaGR	20%	44%	51%	10%	-4%	-

- **Comprehensive Product Portfolio:** Transformer solutions spanning 33 kV to 1,200 kV, supported by a robust manufacturing capacity of 75,000+ MVA.
- **High-Voltage & Special Application Expertise:** Proven capability in manufacturing ultra-high voltage transformers (400–765 kV), along with custom-engineered rectifier transformers for industrial and electrochemical applications.
- **Advanced In-House Testing Capabilities:** NABL-accredited laboratories equipped for impulse testing, temperature rise testing, oil analysis, and CRGO material testing, ensuring stringent quality and compliance.
- **Integrated Manufacturing Excellence:** End-to-end in-house manufacturing, from core cutting and winding to final assembly and testing, enabling superior quality control and optimized delivery timelines.
- **Backward Integration Advantage:** Supported by a subsidiary companies dedicated to the manufacture of critical components such as bushings, transformer tanks, radiators, and CRGO ensuring reliability, consistency, and supply-chain control.

Preferred Brand for its Customized, Niche Transformers

2

taril

Magnum Opus

333 MVA, 1200 kV auto transformer dispatched to National Test Station BINA India through Power Grid. Highest AC Voltage in the world

132 MVA, 33 kV **Electric Arc Furnace duty Transformer** – 60 Hz Installed at Grupo, Mexico. Used across the Americas, reflecting TARIL's ability to engineer for grid specifications beyond India's own

70 MVA, 36 kV, **Electric Arc Furnace Transformers** – 50 Hz Installed at Yazd, Iran. Deepening TARIL's presence across the Middle East's steel and smelting industry.

156 MVA **single largest furnace duty transformer** TARIL ever installed at Novoross Steel, Russia. Extending expertise into world's most demanding industrial markets

Successful testing of a 220/253 MVA **Electric Arc Furnace**, milestone that puts TARIL in an exclusive group of global manufacturers capable of building at this scale

315 MVA, 400/220 kV **Auto Transformer** under Short Circuit test at KEMA, Netherlands. One of the world's most rigorous independent testing authorities for power

Order Book supported by pent up Industry Demand

Un-executed OB as on H1FY27 Rs.7,237

- Majority of the orders i.e. 83% are from power transformers.
- In Q2FY27, completed dynamic short-circuit testing on 3 units.
- This test assesses an electrical apparatus's ability (such as a power transformer) to withstand the intense mechanical forces and thermal stresses generated by a sudden fault. Conducted per standards like IEC 60076-5, it ensures components do not deform or fail under maximum peak currents.

- Large ratings of furnace duty transformers (>100 MVA)

- Medium Power Transformers up to 160MVA, 220KV voltage class
- Transformers for Renewable sector
- Furnace transformer up to 100 MVA rating
- Transformers for rectifier application and traction duty for railways

- Upto 10 MVA 66 KV voltage class rating including distribution transformers from 500 KVA to 5 MVA

From core manufacturing to final testing, every critical process is executed in-house, ensuring uncompromised quality, tighter control, and faster delivery

Utilization%

Backward Integration help achieve Operational Efficiency

Existing products manufactured in-house by TARIL include:

Radiators upto **765 kV**
6,000 MTPA

Transformer Tanks Fabrication is **6000 MTPA**

OIP Bushings upto **245 kV** and CTs upto **765 kV**

VPD

In total they comprise between **10%-15%** of the total RM requirement

New facility set-up for products to be manufactured in-house by TARIL include:

CTC
8,000 MTPA*;
24,000 MTPA**
Q3FY27

Pressboard (Insulation)
5,000 MTPA*;
10,000 MTPA**
Q4FY27

RIP/OIP Bushings
3,000 No. PA*;
6,000 No. PA**
Q4FY27

Fabrication
25,000 MTPA*;
50,000 MTPA**
Q1FY28

CRGO
20,000 MTPA*;
40,000 MTPA**
Operational

In total they comprise between **80%-85%** of the total RM requirement

* Phase I; **Phase II

Benefits of being Backward Integrated:

Guarantees reliable and uninterrupted supplies

Quality controls remain in order

Ensures timely delivery

Generates cost advantage

In-house products retain intellectual property

Mr. Satyen Mamtora
Managing Director & CEO

Diploma in Electrical Engineering from Uxbridge College of Engineering, London, UK

- 20+ years of association with TARIL
- Spearheads production, marketing division
- Played a key role in consolidating the organisation's presence in the power utilities segment across the country
- Aggressive role in strategizing and putting in place a global marketing plan which has successfully ensured TARIL's presence in African, Asian and South American geographies.
- Lifetime member of IEEMA

Management Team

Technocrat Promoters supported by Qualified and Professional Senior Management

Praveen Srivastava
Chief Marketing Officer

- MBA from IIT, Delhi, B.Tech in Mechanical Engineering from BIET Jhansi.
- 26 years of experience across power transmission, renewable, EPCs and private developer.
- Worked with Hitachi Energy India, ABB India, Flowserve Sanmar, Kirloskar Brothers

Mehul Shah
Chief Financial Officer

- CA with 26+ years of experience in strategic accounting, fund management, budgeting, compliance, taxation, corporate governance.
- Worked with Nirma, Adani Enterprise, Reliance Group, Arvind SmartSpaces, Gujarat Ambuja, Asian Granito managing key finance/ business responsibilities.

Mukesh Jha
Commercial Head

- 20+ years in Supply Chain, Procurement & Contract Management across the Power sector.
- Worked with Vikram, KEC, Sterlite, Adani, UB Group & Reliance.
- Led Commercial functions, driving supply chain efficiency and growth initiatives.

Bhavin Vahia
CHRO

- 20+ years of experience in HR, led strategic people initiatives across talent, culture, leadership, organisational development.
- Worked with Zydus Lifesciences, Intas Pharmaceuticals, CLP Power and Apollo Hospital

Anirudh Jhala
Chief Technical Officer

- B.E in Electrical Engineering from L.E Collage, Morbi
- 18+ years of experience in Testing, Design, Product Development, Process Control, etc
- 18 years of association with TARIL
- Contributed about 33 technical papers in national/international seminars magazines

TARIL's Journey since Inception

1980-1993

Mr. Jitendra Mamtora, began his journey from repairing to manufacturing 33 kV class transformer

1994-2006

Incorporated TARIL and began manufacturing upto 110 kV class transformers at Changodar plant

Achieved key technological milestones with the first 7.5 MVA reactor, 100 MVA transformer, NTPC/PGCIL approvals, and international EAF transformer deployments, strengthening TARIL's position in utility and mission-critical power solutions.

2011-2015

Strategic alliance with ZTR Ukraine for 765 kV Transformer

Technology License agreement with Fuji Electric Co. Ltd. for 400 & 765 kV class reactor and generator transformers

2023

Raised ₹ 120 crore by way of preferential issue on private placement basis in October 2023

Only Indian transformer company having NABL accredited lab for electricals steel testing

2024-2026

Successfully Raised ₹500 crores through QIP

Bagged highest ever order for ₹ 740 crores from GETCO

Successfully made a strategic backward integration acquisition

Received HVDC transformer repair order from PGCIL

Successfully increased capacity from 40000 MVA to 75000 MVA

1980-1993

1994-2006

2007-2010

2011-2015

2016-2017

2018-2022

2018-2022

Manufactured Green Transformers and reactors (up to 400 kV) using natural ester fluid

Executed maiden order for 400 kV Generator Transformers,

Successfully type tested OIP bushings upto 145 kV

Listed on NSE & BSE raising ₹ 139 crore at price of ₹ 465/share.

Commissioned greenfield project at Moraiya in 2010

2007-2010

Successfully commissioned 1150 kV transformer

Developed and manufactured Electric Arc Furnace transformer upto 132 MVA

2016-2017
