Dear Sir/Madam,

Sub: Intimation under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 - Press Release

In compliance with Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby attach the copy of Press Release dated 26th September 2026 titled

"SWELECT Expands C&I Energy Solutions Portfolio with Rollout of SWEES EN⁺ Solar Hybrid Inverter Range"

The above information will be made available on the website of the Company www.swelectes.com.

We request you to kindly take on record the above intimation

Thanking you,

Yours faithfully,

For SWELECT ENERGY SYSTEMS LIMITED

Arulkumar Pudur Shanmugasundaram

SWELECT Expands C&I Energy Solutions Portfolio with Rollout of SWEES EN⁺ Solar Hybrid Inverter Range

- *Built to grow with C&I businesses, from 5 kW to 50 kW and beyond.*

Chennai, September 26, 2026: SWELECT Energy Systems Limited is rolling out its scalable SWEES EN⁺ hybrid inverter range for Commercial & Industrial (C&I) customers. The range is available from 5 kW to 50 kW and can scale beyond 50 kW. It is designed around the load profiles, solar generation and energy storage needs of businesses. Customers can start with a system sized to their current needs and add capacity as operations grow. SWELECT Energy Systems Limited is strengthening its energy solutions portfolio with the rollout of its SWEES EN⁺ solar hybrid inverter range from 5 kW to 50 kW, designed to address the evolving requirements of Commercial & Industrial (C&I) customers.

SWEES EN⁺ manages solar generation, battery storage and grid supply through a single system. The range is certified by the Bureau of Indian Standards (BIS) under the Compulsory Registration Scheme (CRS), which clears it for rollout on schedule in Q2 FY27.

As energy costs rise and power reliability becomes a bigger concern, businesses want to make better use of the solar power they generate on-site and add storage for backup. SWELECT designs each system around the customer's actual load profile and application rather than offering a one-size-fits-all product.

Commenting on the development, **Dr. Arulkumar Shanmugasundaram, CEO & Managing Director**, SWELECT Energy Systems Limited, said, "With the BIS certification for our hybrid inverters, we are now rolling out the SWEES EN⁺ range from 5 kW to 50 kW, with a strong focus on the evolving energy requirements of C&I customers. The range has been designed with scalability at its core, enabling solutions to be configured in line with varying load profiles, operational requirements and future energy needs."

The rollout of SWEES EN⁺ further strengthens SWELECT's growing portfolio of energy solutions and builds on the company's experience across solar manufacturing, EPC, power electronics and energy storage. Through continued investment in these areas, SWELECT aims to provide integrated and scalable energy solutions across a wide range of commercial and industrial applications.

About SWELECT Energy Systems Ltd.

Established in 1984, as a UPS and Power Protection Systems leader, SWELECT Energy Systems Limited has emerged as a leading solar power solutions company with a robust presence in the global energy market.

SWELECT has three core businesses — IPP Business with Energy Sales to C&I and Government Customers, Ground Mounted and Rooftop EPC business, and Channel-driven product business (Home, BESS solutions) for Residential and Commercial customers.

The businesses are built on a strong manufacturing base of Solar Photovoltaic (PV) Modules, Module Mounting Structures (MMS), String Combiner Boxes, ACDB, DCDB etc. With a vertically integrated manufacturing structure, all our businesses offer high-quality MADE IN SWELECT products in line with the Government's Atmanirbhar Bharat mission.

SWELECT also carries the strong legacy of Numeric, India's leading UPS solutions brand, under which it built deep expertise in power electronics and battery energy systems for over two decades. In 2012, the company transitioned from Numeric to SWELECT, symbolising its evolution from "Power to Energy" and establishing itself as a trusted leader in the solar energy sector. "We make every home, SMEs and C&I to save solar energy to enjoy extended green power when the sun shines and then after.."
