Re. Business Updates –Pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (Listing Regulations)

Dear Sir/Madam,

Eco Recycling Limited (“Ecoreco”), India’s pioneering and one of the leading professional e-waste management and lithium-ion battery recycling companies, wishes to inform stakeholders that the recent developments under the QUAD Critical Minerals Initiative and India’s growing strategic focus on critical mineral security present significant long-term opportunities for the organised recycling and urban mining sector.

The Quad nations — India, United States, Japan and Australia — have recently announced a coordinated framework to strengthen critical mineral supply chains, including mining, processing and recycling, with a broader objective of reducing import dependence and building resilient supply ecosystems. ([The Economic Times](#))

India has also accelerated its policy initiatives towards critical minerals and strategic resource recovery through various institutional and governmental efforts aimed at supporting domestic capabilities in recycling, refining and circular economy solutions. ([Moneycontrol](#))

In this context, Ecoreco is pleased to share that the Company has been shortlisted / empanelled for certain interactions and industry participation initiatives with the Ministry of Mines and Jawaharlal Nehru Aluminium Research Development and Design Centre (JNARDDC) relating to critical minerals and recycling ecosystem development.

With over two decades of operational experience in e-waste management, asset recovery, reverse logistics and sustainable recycling practices, Ecoreco believes that urban mining and recycling of electronic waste and lithium-ion battery waste will play an increasingly important role in strengthening India’s strategic materials security.

The Company, together with its technology and business associates across multiple geographies, continues to evaluate opportunities in the critical minerals recovery value chain, including extraction and recovery of strategic materials from electronic waste, battery waste and allied recyclable streams.

Ecoreco remains committed to supporting India’s circular economy vision through environmentally responsible recycling solutions aligned with global sustainability and resource security objectives.

The Company would like to clarify that, as of date, no definitive commercial contract, financial commitment or material order has been finalised under the aforesaid initiatives. Any material development, if and when concluded, shall be informed to the stock exchanges in accordance with applicable regulatory requirements.

We request you to take the above information on record.

Thanking you,

For Eco Recycling Limited

Arvindra Singh Parmar
