- ~1.9 MW group captive wind-solar arrangement commissioned; expected annual savings of ₹1.75 Crores approx

Commenting on the performance, Mr. Ramswaroop Radheshyam Thard, Chairman and Managing Director, said:

"This quarter demonstrates the resilience of our business. Despite a sharp rise in raw material prices and softer export demand amid geopolitical uncertainties, we delivered strong growth while maintaining our operating margins, as robust domestic demand more than offset lower exports.

As a leader in rigid thermoformed food packaging in India, our vision is to build a diversified packaging business with technology, product innovation and capital efficiency at its core. We continue to increase the share of value added products and are expanding our injection moulding range for the domestic market, giving us the agility to rebalance our sales mix when export markets are disrupted.

Olive Ecopak, our paper packaging joint venture, delivered a strong quarter despite a flood related disruption and was profitable at the PBT before Exceptional Item (flood loss - Insurance Claim under Process once approved this will be reversed). Together, our plastic and paper packaging capabilities enable us to serve wider customer needs.

Our newly commissioned group captive wind-solar plant will make a meaningful contribution to profitability from next year while advancing our sustainability goals.

Moving ahead, we will deepen customer relationships, improve manufacturing productivity and pursue growth through disciplined capital allocation. With healthy cash generation and an improving balance sheet, we are well placed to build a more diversified, competitive and profitable business."
