While domestic demand remains stable, the company continues to monitor external risks that could influence the operating environment. Factors such as geopolitical developments, volatility in crude oil and commodity prices, exchange-rate movements, and potential supply-chain disruptions could affect production costs. Against this backdrop, the Company expects to drive cost savings initiatives to mitigate the external headwinds and deliver further margin improvement in FY27. This will be supported by new business ramp-ups, and continued efficiency initiatives across its manufacturing plants.
