Q1 FY27

Investor Update

NSE: KSCL | BSE: 532899

Key Highlights

Quarter shaped by a deficient monsoon; underlying growth story intact

- A deficient monsoon impacted sowing in the major growth segments during the quarter
- The deficit translated into lower interest towards premium, high-value products
- In Cotton, the Company has established a strong foundation in the northern markets of Haryana, Punjab and Rajasthan
- Despite challenges from illegal cotton and reduced sowing acreage, cotton volumes were maintained constant vis-à-vis last year
- Revenues of selection rice were maintained despite adverse weather in the rice sowing states
- Should rainfall improve during Q2 FY27, the Company expects some spill-over demand
- New variants are under development across seed segments, with their share to be increased across maize, vegetables, rice and cotton
