Subject: Disclosure under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Press Release

Dear Sir/Madam,

Pursuant to Regulation 30 read with Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we are pleased to enclose herewith a copy of the Press Release issued by Blue Cloud Softech Solutions Limited titled:

“Blue Cloud Softech Powers India's First AI Multilingual FIR Recorder – ‘AI-CopWriter’ – for Hyderabad City Police”

The press release relates to the successful development and deployment, by the Company in collaboration with the IT Cell of Hyderabad City Police, of “AI-CopWriter” – described by the Hyderabad City Police as India's first AI-powered multilingual complaint-recording application – which was formally launched by the Commissioner of Police, Hyderabad City.

The enclosed press release is being disseminated to the media for public information and is also being made available on the Company's website at: https://bluecloudsoftech.com/wp-content/uploads/2026/07/Press-release-AI-CopWriter.pdf_8050.pdf

This is for your information and record.

Thanking you.

Yours faithfully,

For Blue Cloud Softech Solutions Limited

**MHVSN Sambhu Prasad
Company Secretary and Compliance Officer
Encl: as above.**

PRESS RELEASE · FOR IMMEDIATE RELEASE

Blue Cloud Softech Powers India's First AI Multilingual FIR Recorder – “AI-CopWriter” – for Hyderabad City Police

A citizen speaks in their mother tongue; a complete FIR draft is ready in seconds. Built by BCSSL with the Hyderabad City Police IT Cell, across ten Indian languages, and launched by the Commissioner of Police at the Telangana Integrated Command and Control Centre.

Hyderabad, India – 6th July 2026 – Blue Cloud Softech Solutions Limited (BSE: 539607) (“BCSSL” or “the Company”), an AI-first technology company, today announced the successful deployment of “AI-CopWriter” – described by the Hyderabad City Police as India's first AI-powered multilingual complaint-recording application – developed by the Company in collaboration with the IT Cell of Hyderabad City Police. The application was formally launched by the Commissioner of Police, Hyderabad City, Sri V. C. Sajjanar, IPS, at the Telangana Integrated Command and Control Centre (TGICCC), Banjara Hills.

AI-CopWriter enables a citizen to narrate a complaint in their mother tongue, which the application transcribes and translates into a complete First Information Report (FIR) draft within seconds, across ten major Indian languages with automatic language detection. Each exported document is generated as a tamper-evident PDF that automatically embeds the FIR number, the names of the complainant and accused, the recording officer's name and badge identification, the police station and the relevant sections of law – ensuring attribution and record integrity.

“Language should never stand between a citizen and justice. With AI-CopWriter, it no longer will,” the Commissioner of Police said at the launch.

Justice, in the Citizen's Own Words

Designed for a global city that is home to migrants, tourists, women and senior citizens who may not speak the local language, AI-CopWriter is built to deliver measurable public value:

- **Equal access to justice** – a complainant's language is no longer a barrier at the police station;
- **Faster filing** – spoken complaints are converted into an FIR draft in seconds rather than hours, reducing dependence on human interpreters;
- **Higher investigation quality** – verbatim, attributed capture of statements strengthens the accuracy of records and the quality of investigations;
- **Record integrity** – tamper-evident PDFs with embedded case metadata standardise record-keeping across police stations.

Think Big | AI-First

The Hyderabad City Police have indicated that the application is intended to be rolled out across the city's network of police stations, standardising multilingual complaint registration across units.

“The true measure of artificial intelligence is not what it automates, but who it empowers. A grandmother, a migrant worker, a visitor – each can now walk into a police station in Hyderabad and be understood, in their own words, in their own language,” said **Sri Tejesh Kumar Kodali, Group Chairman, Blue Cloud Group.** *“I thank the Hyderabad City Police for the vision and trust with which they built India's first AI multilingual FIR recorder with us. What has been proven in Hyderabad is a template for the nation – and for every public service where language still stands between a citizen and their rights. This is the AI-first India we are building: faster, fairer and more human.”*

A Deepening Public-Safety Partnership

AI-CopWriter adds to BCSSL's growing portfolio of AI platforms deployed with law-enforcement and government agencies. The Company's work in the public-safety segment reflects a consistent strategy: productised, India-engineered AI that can be replicated across police forces, government departments and citizen-service agencies nationally.

Responsible Use, By Design

AI-CopWriter operates within the lawful processes of the police and is designed with record-integrity and attribution safeguards, including tamper-evident documentation and officer attribution on every record. The Company remains committed to responsible AI and to compliance with applicable law, including the Digital Personal Data Protection Act, 2023, in the handling of citizen data.

About Blue Cloud Softech Solutions Limited

Blue Cloud Softech Solutions Limited (BSE: 539607) is a publicly listed, AI-first technology company headquartered in Hyderabad, India, with a presence across the United States, the United Kingdom and the Middle East. The Company delivers digital transformation solutions with a focus on artificial intelligence and AIoT across verticals including government, homeland security, education, healthcare and cybersecurity. Its platforms turn raw data into proactive, real-time public-service and public-safety intelligence.
