Sub.: Press Release - KPI Green Energy achieves highest ever Capacity Energization of 630+ MW DC across IPP and EPC/PPP businesses in June-August quarter.

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we are enclosing herewith a Press Release titled "KPI Green Energy achieves highest ever Capacity Energization of 630+ MW DC across IPP and EPC/PPP businesses in June-August quarter."

This is for your information and records.

Thanking You,

Yours Faithfully,

For KPI Green Energy Limited

Moh. Sohail Yusuf Dabhoya

Whole Time Director

KPI GREEN ENERGY LIMITED

CIN: L40102GJ2008PLC083302

For immediate release

KPI Green Energy achieves highest ever Capacity Energization of 630+ MW DC across IPP and EPC/CPP businesses in June-August quarter.

KPI Green Energy Limited ("KPI Green Energy" or "the Company"), a leading Gujarat-based renewable energy company and part of KP Group, has energized **630+ MW DC** of capacity over the past three months across its **IPP - Independent Power Producer** and **EPC - Engineering, Procurement, Construction** businesses – the highest-ever capacity energized by the Company in a single quarter since inception.

This milestone spans a diversified mix of IPP assets and projects executed under the Company's EPC vertical, underscoring the scale, speed and consistency of KPI Green Energy's project execution engine. It marks yet another step forward in the Company's journey toward its stated ambition of scaling capacity in line with KP Group's broader target of over **10 GW** of renewable capacity by 2030 and reinforces its position as one of India's fastest-growing renewable energy platforms.

The Company has energized more capacity in this single three-month period than in the cumulative ~17 years since its inception through December 2024, when total energized capacity stood at **533 MW** across both IPP and EPC segments.

Dr. Faruk G. Patel, Chairman and Managing Director, KPI Green Energy, said, " Crossing 630+ MW DC of energization in a single quarter is the highest-ever pace of capacity addition in our history, and a clear reflection of the execution capability we have built across both our IPP and EPC businesses. Every megawatt we energize brings us closer to our long-term capacity goals and to India's energy transition targets. We remain focused on scaling responsibly, strengthening our annuity income base, and delivering sustained value to all our stakeholders."

With this achievement, KPI Green Energy continues to strengthen its operational portfolio and order-book conversion, positioning the Company for sustained growth as it advances toward its long-term capacity targets in India's rapidly expanding renewable energy sector.

About KP Group:

Established in 1994, by Dr. Faruk G. Patel, KP Group has grown into a multi-faceted conglomerate with core expertise in renewable energy, infrastructure, and innovation. Over the past three decades, the group has championed sustainability by spearheading transformative projects in wind, solar, hybrid energy, Battery Energy Storage System (BESS) and green hydrogen, thereby contributing to India's green energy mission. With a strong portfolio of renewable energy projects, KP Group has earned a reputation as a trusted partner for companies committed to reducing their carbon footprint. The group remains steadfast in its mission to contribute meaningfully to India's energy transition while setting new benchmarks in the renewable energy sector.
