Dear Sir/Madam,

**Subject: Submission of Press Release on Capacity Expansion**

Pursuant to Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, and in continuation of our disclosures made from time to time, we hereby submit the enclosed Press Release issued by the Company with respect to the announcement towards commissioning of Expanded Corn Wet Milling Capacity at Dhule Facility Total Capacity Set to Reach 2,350 TPD from 1,100 TPD.

The Press Release contains details regarding the Company's expansion plans, proposed increase in manufacturing capacities, strategic growth initiatives, and the expected impact on the Company's business operations and future growth prospects.

You are requested to take the same on your records.

Thanking you,

Yours faithfully,

For, Sanstar Limited

## **Announces Commissioning of Expanded Native Starch Capacity at Dhule Facility Total Capacity Set to Reach 2,350 TPD from 1,100 TPD**

**Ahmedabad, 12<sup>th</sup> May 2026:** Sanstar Limited (“Sanstar” or the “Company”) (BSE: 544217 | NSE: SANSTAR), one of the largest producers of maize-based specialty products and ingredient solutions in India, today announced the commissioning of its expanded native starch manufacturing capacity at its Dhule facility in Maharashtra.

This expansion marks a key milestone in the Company’s growth journey and is part of its broader capacity expansion plan funded through IPO proceeds. The entire amount of Rs. 1,816 million allocated towards the Dhule expansion has now been fully utilized.

With this commissioning, Sanstar has taken a significant step towards increasing its total installed capacity from 1,100 TPD to 2,350 TPD, positioning itself to become one of the largest manufacturers in India’s maize-based specialty products industry.

The Shirpur plant, following this capacity expansion, will become one of the largest plants in India in terms of operating capacity at a single location.

The expansion is being implemented in two phases. While the native starch capacity has now been commissioned, the derivatives facility is expected to be commissioned within FY2026-27.

The Dhule facility, strategically located near key maize-growing regions and major ports, provides strong logistical advantages and supports efficient sourcing and export operations. The expanded capacity is expected to improve operational efficiencies, enhance scale benefits and strengthen the Company’s ability to cater to growing domestic and international demand.

### **Commenting on the development, Mr. Gouthamchand Chowdhary, Chairman and Managing Director said:**

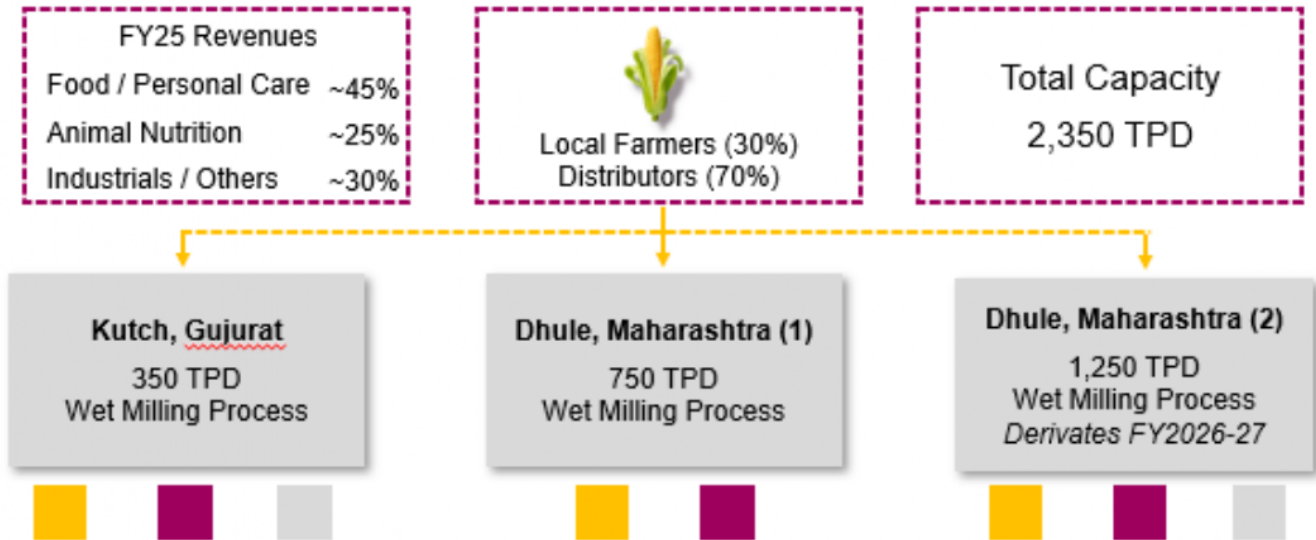

“The commissioning of our expanded native starch capacity at Dhule marks an important milestone in Sanstar’s growth journey. This expansion strengthens our manufacturing capabilities and enhances our ability to serve a diverse and growing customer base across industries.

Despite originally planning for a 1,000 MTPD expansion at the time of the IPO, the company has successfully scaled its installed crushing capacity to 1,250 MTPD, demonstrating strong execution capability and operational efficiency.

With the full utilization of IPO proceeds towards this project, we are now well positioned to scale our operations. The upcoming commissioning of the derivatives facility will further enhance our product portfolio, enabling us to move towards higher value-added offerings.

As demand for maize-based specialty ingredients continues to grow across food, pharmaceuticals and industrial applications, we remain focused on leveraging our expanded capacity, strengthening customer relationships and driving sustainable long-term growth.”

**India's #2 Maize-Based Specialty Products Manufacturer – 2,350 TPD Capacity**

### About Sanstar:

Sanstar Limited, headquartered in Ahmedabad, Gujarat is one of India's largest producers of maize-based specialty products and ingredient solutions and set to become the second-largest producer following the capacity expansion. The company's diverse portfolio includes native starch, modified starch, and derivatives for industries such as food, animal nutrition, pharmaceuticals, and Industrials. With manufacturing facilities in Dhule, Maharashtra, and Kutch, Gujarat, Sanstar operates at a combined capacity of 1,100 TPD, supported by advanced SCADA systems for quality and efficiency. The company has strong relationships with blue chip Indian and International customers. Through its capacity expansion, Sanstar will increase total capacity to 2,350 TPD, positioning itself for future growth in both Indian and export markets.
