Press Release

JTL Industries Advances Maharashtra Facility Expansion with Hot Trial of Pickling Line and Cold Trial of GP Line

Chandigarh, 8th November 2026: JTL Industries Limited ("JTL" or "the Company") (BSE: 534600 | NSE: JTLIND), JTL Industries Limited ("JTL" or "the Company") (BSE: 534600 | NSE: JTLIND), a leading manufacturer of structural steel tubes and pipes, is pleased to announce the successful completion of the hot trial of the Pickling Line and commencement of the cold trials of the GP Line at its Maharashtra facility, marking important milestones in its expansion journey. The Company recorded 20.2% year-on-year growth in sales volume in H1 FY27, and these developments further support its endeavor to expand its value-added product portfolio through this facility and upcoming product additions.

Pickling is a surface-treatment process that removes oxide scale formed during the hot rolling of steel coils, resulting in a clean and uniform steel surface. The processed material, known as Hot Rolled Pickled and Oiled (HRPO), is suitable for further processing through Galvanising (GP) and Colour Coating Lines, and also finds applications in the automobile industry itself. The GP Line cold trial marks progress in the Company's downstream value-added processing capabilities.

The successful hot trial of the Pickling Line and commencement of the GP Line cold trial mark further progress towards operationalisation of the Maharashtra facility. The Colour Coating Line and other associated processes are also expected to commence shortly. The Company endeavours to further increase its value-added product portfolio through these capabilities and products planned for introduction in the future, while strengthening downstream processing and addressing a wider range of customer requirements.

With the successful hot trial of the Pickling Line and cold trial of the GP Line, alongside progress towards commissioning of the Colour Coating Line at the Maharashtra facility, the Company believes it is on track to achieve 30% growth for the full financial year.

Commenting on the development, Mr. Madan Mohan, Managing Director of JTL Industries said:

"The successful hot trial of the Pickling Line and commencement of the GP Line cold trial at our Maharashtra facility mark important milestones in our expansion journey. With progress towards commissioning of our Colour Coating Line, we are steadily strengthening our downstream capabilities and expanding our presence in value-added steel products. These investments are expected to enhance our product mix, improve our ability to meet evolving customer requirements and create a stronger foundation for sustainable growth. With these milestones, we believe we are on track to achieve 30% growth for the full financial year.

About JTL Industries Limited

JTL Industries Limited is among the fastest growing steel tube and non ferrous metal products manufacturers, with its registered office situated in Chandigarh. The company operates manufacturing facilities in Punjab, Maharashtra, Chhattisgarh and Himachal Pradesh (including its subsidiaries). Its cumulative pipe manufacturing capacity is approximately 9,36,000 MTPA, with around 3,00,000 MTPA dedicated to backward integration. The company is a recognized Three Star Export House. Its product range includes DFT Structural Pipes, GI Pipes, MS Black Pipes, Hollow Sections, Solar Structures, HR Coils and Phosphorous Bronze, Copper and Brass Alloys, among others, which cater to various industrial and infrastructural applications.
